

FUJITSU

The Intelligent Choice in Comfort

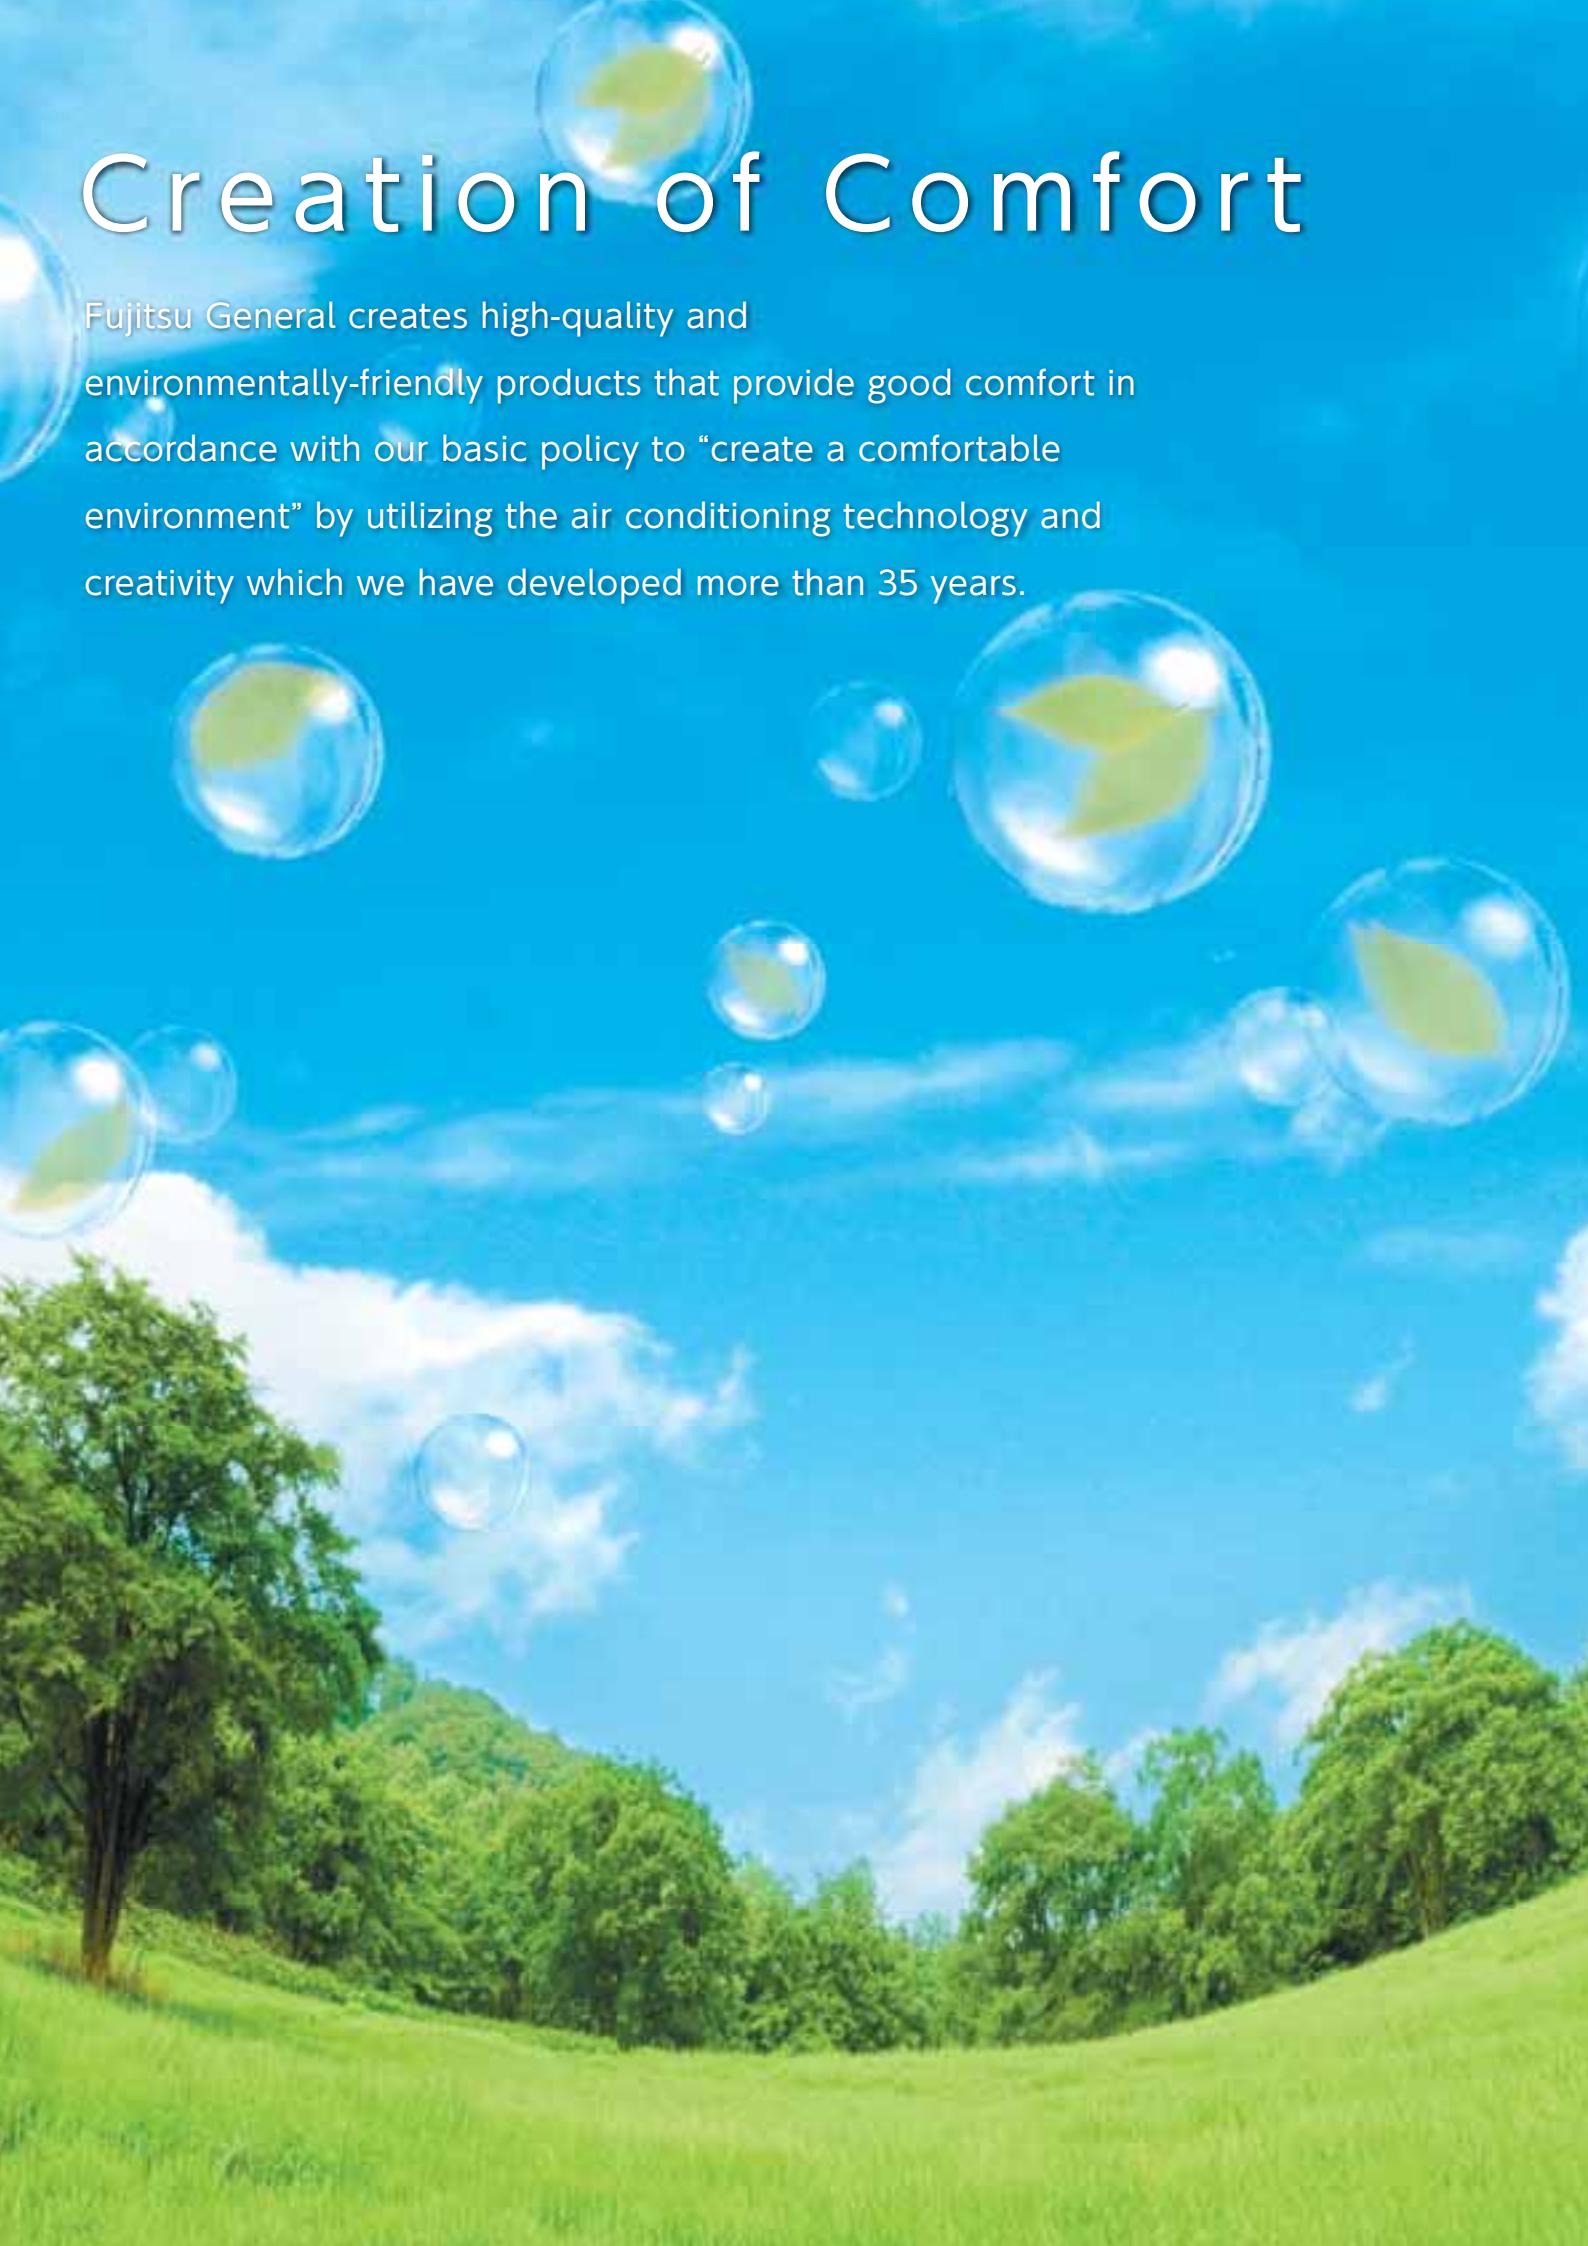

2011 PRODUCT CATALOGUE

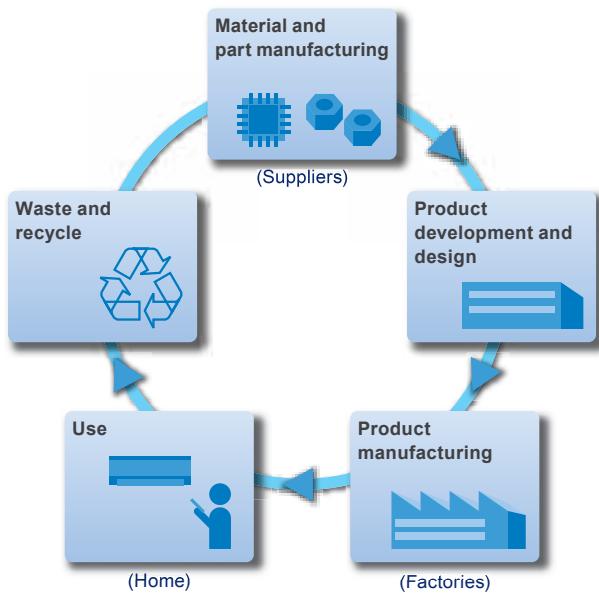

Air Conditioner of Fujitsu General

FUJITSU GENERAL LIMITED

Creation of Comfort

Fujitsu General creates high-quality and environmentally-friendly products that provide good comfort in accordance with our basic policy to "create a comfortable environment" by utilizing the air conditioning technology and creativity which we have developed more than 35 years.

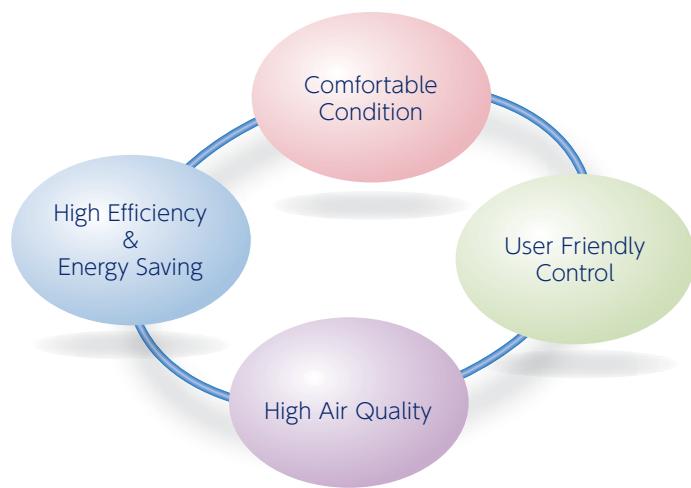

Harmony between Global Environmental Protection and Company Activities

The Fujitsu General Group strives for business activities that achieve harmony between contributing to protecting the global environment and company activities while making environmental protection activities an important issue in company management. The Fujitsu General Group is working to improve its environmental friendliness by building an environmental management system(EMS); taking environmental protection measures throughout the product lifecycle of materials procurement, product development and design, manufacturing, and recycling; and by taking the environment into consideration during business activities such as by saving energy and resources and reducing waste.

Creating top-class products with core technology

Fujitsu General air conditioners bring quality air to people and provide true comfort, energy saving, and clean environment through our core technology

High Quality Development and Production Environment

The Headquarters-Kawasaki R&D Center is equipped with a wide range of testing equipment envisioning a variety of operating conditions. This includes a testing tower with a 60m height difference for buildings. We provide high quality & reliable products that meet the customers' needs from all over the world through this advanced R&D center and 6 production companies based in China and Thailand.

High Efficiency Technology

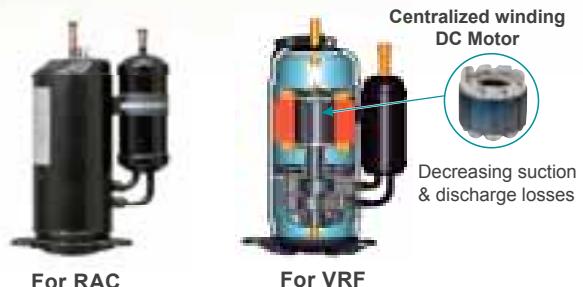

By All DC inverter control, electricity loss is decreased and power consumption is substantially reduced. In addition, annual power consumption amount is saved by high efficiency technology.

ALL DC

All DC Inverter Technology

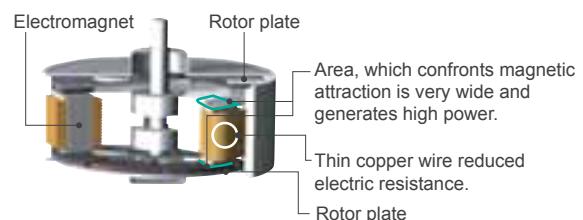

DC Twin Rotary Compressor

The high efficiency DC inverter type "2-cylinder rotary compressor" is used for large capacity of split system. It has achieved higher energy efficiency compared with equal class of compressors by optimizing the structure inside the compressor.

Axial Gap Fan Motor

Compact size with 1.5 more power output Self-driven method increases rotating efficiency by 10%. Our electromagnetic field simulation technology enables low vibration and low noise.

DC Fan Motor

DC fan motor realises high power, wide operation range, and high efficiency.

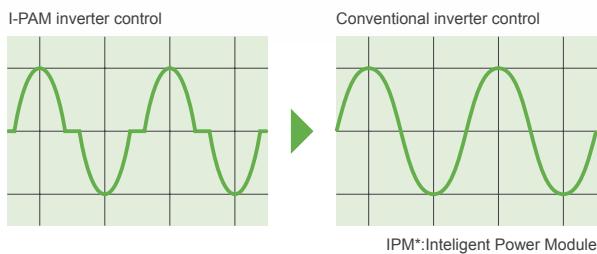

Optimized Inverter Control

I-PAM (IPM*+PAM)
Inverter control

I-PAM inverter control is a technology which reduces loss by adjusting the current waveform to a better sine waveform. This promotes the effective use of the input power supply to attain high performance.

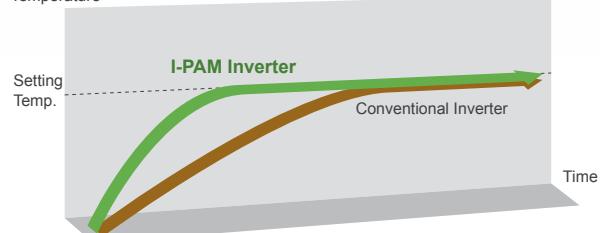

V-PAM (Vector+I-PAM)
Inverter control

V-PAM inverter control reduces the effects of magnetic flux and increases the maximum speed and efficiency of the compressor by vector control technology. With this technology, further miniaturization, higher efficiency, and better performance are attained.

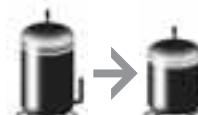

In addition, the voltage is raised at the start of operation and fast comfort is attainable by more powerful operation.

Temperature

This technology enables miniaturization and high performance of the compressor.

More compact than
conventional models

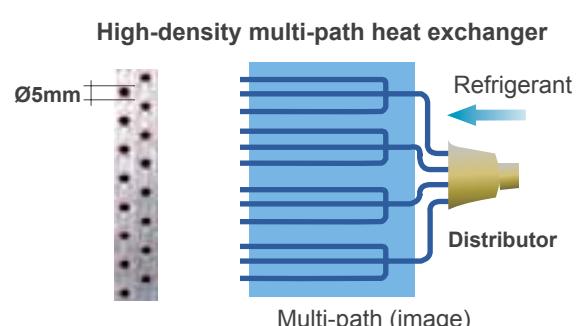

It becomes more powerful with the newly developed high efficient compressor motor control.

High Efficiency Heat Exchanger

High density multi-path heat exchanger

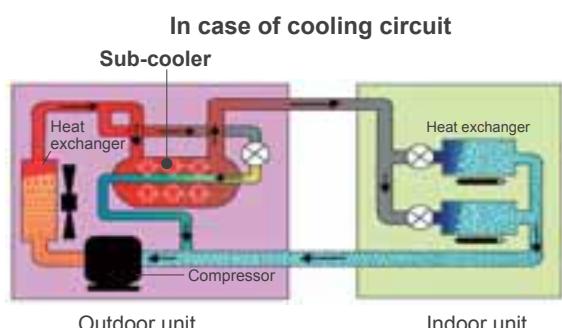

Heat exchange performance is substantially improved by thin and high-density heat exchanger and multi-path efficiency technology.

High performance Grooved Piping with expanded heat exchanger area is used.

High performance sub-cool heat exchanger

Higher performance achieved by mounting of counter type bypass circuit. (Large multi type, VRF)

Energy Saving Control

Economical and comfortable air conditioning environment is realized by various energy saving technologies such as sensor technology, original automatic filter cleaning function, and economical set temperature control, etc.

Human sensor control

Human sensor catches movements of people in a room, and operates with lower capacity when the room is empty, which can save electric expense. When people come back to the room, it returns to previous operating mode.

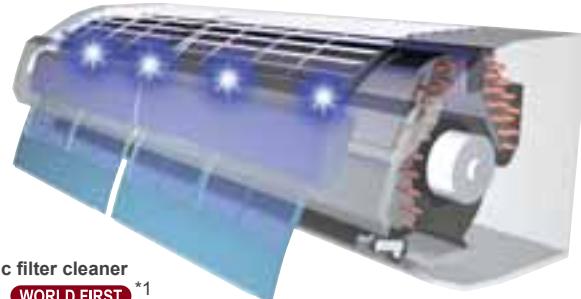

Energy saving operation by detecting someone's movement

Energy Saving Control

Automatic filter cleaning

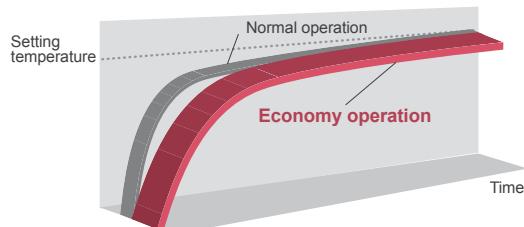

This function allows an energy saving of more than 25% a year and maintains a smooth airflow by preventing the filters from being clogged with dust.

Automatic filter cleaner
WORLD FIRST *1

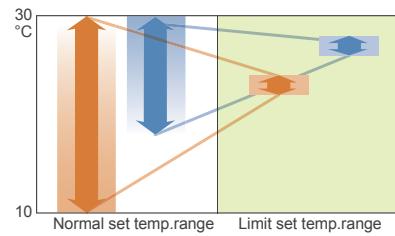

Economy operation

Limits the maximum operation current, and the power consumption is cut down and the maximum load is suppressed.

Room temperature set point limitation

The minimum and maximum temperature range can be set giving further energy saving while considering the comfort of the occupants.

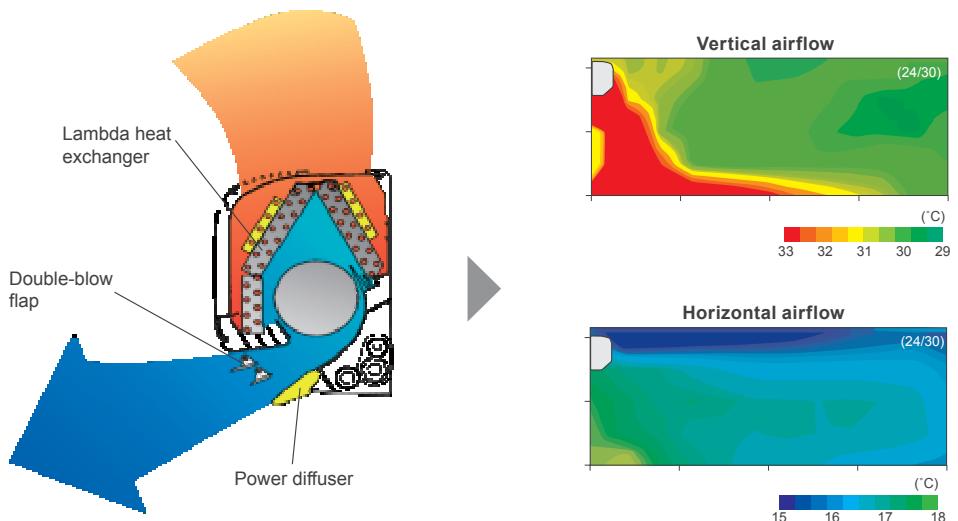

*1 Announced September 9, 2002. In room air conditioner for the home (our company's investigation)

More Comfort

Fujitsu General realizes a comfortable environment at all times by developing original air flow control. In addition, we pursue the various control technologies to provide you with a pleasant air-conditioned life.

Comfort Airflow

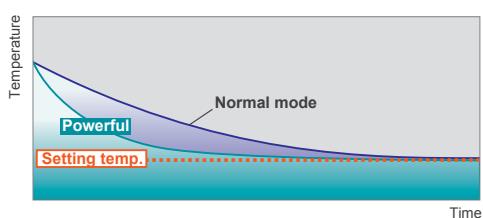

Precision wind direction control is realized and ventilation efficiency is also improved by 3 technologies. Our airflow control makes your environment more comfortable.

Quick Comfort

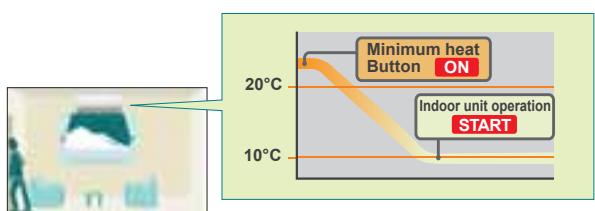

Powerful operation

Continuous operation by maximum air flow and maximum compressor speed after a certain period of time allows the temperature to reach the setting temp. quickly.

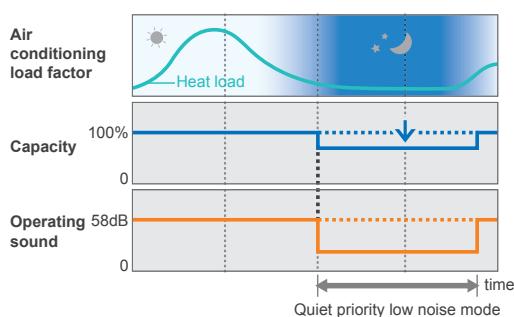

10°C Heat operation

When you leave, minimum heating operation is performed to maintain the room temperature.
(maintain at 10°C)

Quiet Control

Users can choose low noise levels, depending on the installation environment. The operation time can be set using the timer.

High Air Quality

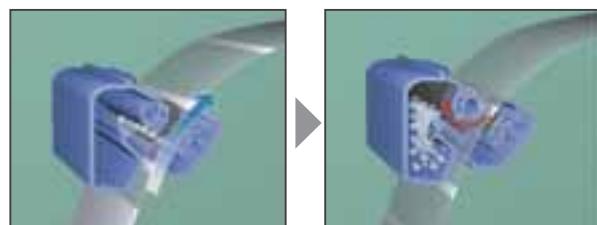

Perfect comfort pursued by removal of dust and odors and bacteria, etc. in the air, intake of fresh air, and other clean air conditioning technologies which always take health into consideration.

Clean Function

Automatic filter cleaning

Drives away the bacteria and refreshes the air.
The dirt and dust are bacteria-eliminated by photocatalytic filter
High density air filter surely catches the dust in the air.
The collected dust is automatically removed, and the air is always cleaned in a clean state.

WORLD FIRST *1

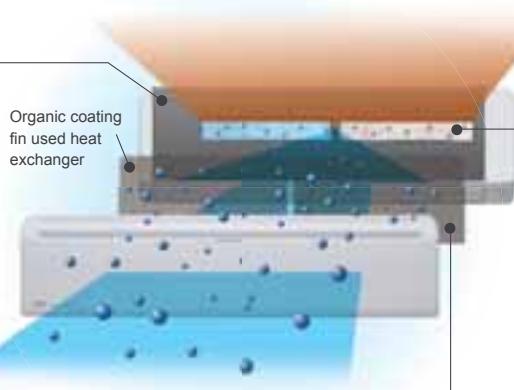

Clean Filter

Long-life Ion Deodorization Filter

The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine-particle ceramic.

Air conditioner filter features

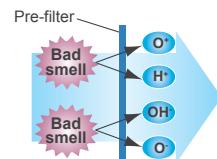

Apple-catechin Filter

Fine dust, invisible mold spores, and harmful microorganisms are absorbed onto the filter by static electricity, and further growth is inhibited and deactivated by the polyphenol extracted from apples.

Deodrand & Anti-bacteria Filter

Deodrand and anti-bacteria filter can resolve the constituent of bad smell by the pre-filter mixed with special ceramic powder which gives near infrared rays effect.

*1 Announced September 9, 2002. In room air conditioner for the home (our company's investigation)

User Friendly Control

Fujitsu General is using ergonomics to expand the use of user friendly designs such as easy-to-read large LCD displays, easy-to-operate buttons, and displays with easily recognizable colors and icons.

We are producing control systems that provide greater convenience for both individual and centralized control with operability suitable for the application and such features as one-touch selection and a range of batch control operation methods.

Class A Proves Trust

Our models have earned the "Class A" ranking, the highest energy saving standard that is shown on energy labels in Europe.

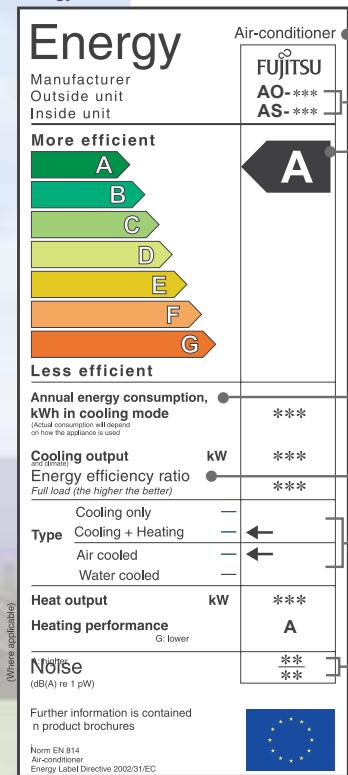

CLASS
A

Energy-Efficiency Classifications

According to a new EC Directive, the indication of the Energy Efficiency classification on household air conditioners became compulsory. This aims to provide consumers with clear and objective information regarding energy-saving, and to encourage them to select products that are environmentally friendly. An Energy Label, like that shown in the sample below, will be provided in shop displays. In the label, the equipment is rated, with "A" being the most efficient. You may notice these labels and ratings appearing soon in shops that sell air conditioners. For easy understanding, the following information will be indicated for each model.

Energy Label

Classifications

There are seven classifications of energy efficiency, from A to G. The most efficient level is "A" and the least efficient level is "G".

Energy efficiency class of the unit in COOLING mode

A	$3.20 < \text{COP}$
B	$3.20 \geq \text{COP} > 3.40$
C	$3.00 \geq \text{COP} > 2.80$
D	$2.80 \geq \text{COP} > 2.60$
E	$2.60 \geq \text{COP} > 2.40$
F	$2.40 \geq \text{COP} > 2.20$
G	$2.20 \geq \text{COP}$

Energy efficiency class of the unit in HEATING mode

A	$3.60 < \text{COP}$
B	$3.60 \geq \text{COP} > 3.40$
C	$3.40 \geq \text{COP} > 3.20$
D	$3.20 \geq \text{COP} > 2.80$
E	$2.80 \geq \text{COP} > 2.60$
F	$2.60 \geq \text{COP} > 2.40$
G	$2.40 \geq \text{COP}$

These classifications are for split and multi-split air conditioners.

Approach to New Energy Saving Standards

High performance and efficiency during actual operation are becoming important increasingly.

FUJITSU GENERAL challenges the industry leader to making products that meet the new energy saving standards.

Improved rated operation efficiency
to seasonal operation efficiency

Actual performance taking into consideration
local and seasonal characteristics

Reduced non-operational
energy consumption

Low noise

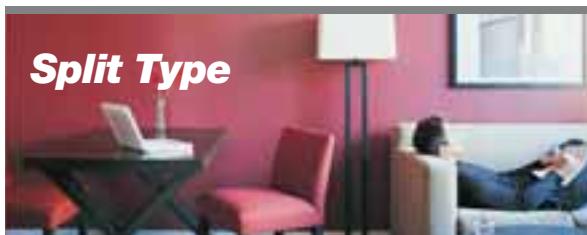

Studying new refrigerants
with less environmental load

FUJITSU GENERAL Solutions

Fujitsu General develops air conditioners which meet a wide range of needs from residential use to commercial use. New Air to water with low CO₂ discharge adopting heat pump technology are also available and we offer the air conditioners perfectly matched to the various worldwide environments.

Energy saving design to provide a comfortable indoor environment while being environment-friendly.

An air conditioner that is people-friendly is also environment-friendly. Fujitsu General offers a broad lineup of products from large living rooms to bedrooms and children's rooms. We make your room more comfortable with a wide range of air conditioner types from ceiling wall type with automatic filters and cleaning functions to wall mounted type that improve the air cleaning function. Of course these models feature highly efficient operation that conserves electricity.

Automatic filter cleaner **WORLD FIRST**^{*1}

- Entire filter is cleaned automatically in approx. 2 minutes.
- Since the filter is cleaned automatically, energy saving capability is displayed without regard to the load on the air conditioner.
- Energy saving CLASS A cleared with a margin to spare.
- 2 exhaustive bacteria eliminating and deodorizing countermeasures keep the air in the room clean.

Clean & energy saving technology

a Dirt and dust are bacteria-eliminated by photocatalytic filter^{*2}

b Drives away bacteria and refreshes the air by UV (ultraviolet rays) illumination

c Energy saving by automatic filter cleaning function^{*1}

This function allows an energy saving of more than 25% a year and maintains a smooth airflow by preventing the filters from being clogged with dust.

d Computer-designed fan provides a larger airflow than conventional models

New air trunk, which provides a smooth airflow, and axial gap fan motor increase the max. airflow by 10% over that of conventional models.

CAE (Computer aided engineering) analysis

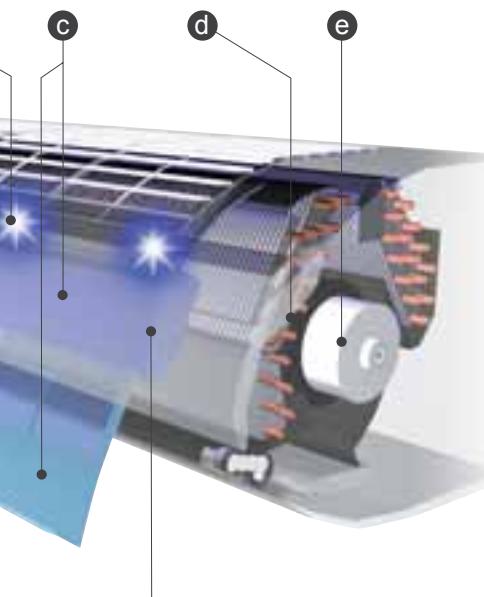

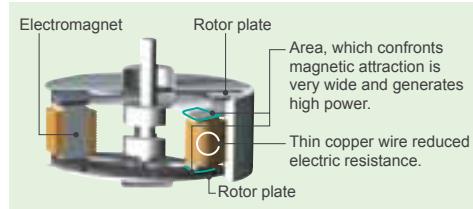

e Axial gap fan motor enables nonconventional high power and high efficiency^{*3}

Axial gap method

Rotor plates are installed above and below electromagnets.

Features (Compared to conventional models)

Compact size with 1.5 more power output
Self-driven method increases rotating efficiency by 10%. Our electromagnetic field simulation technology enables low vibration and low noise.

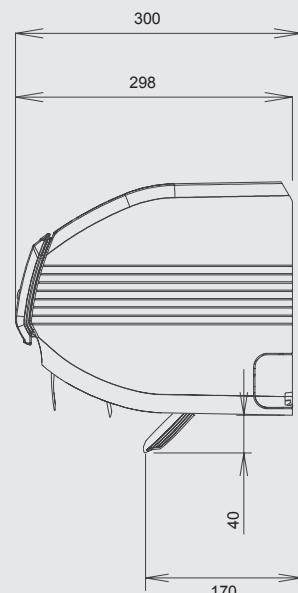

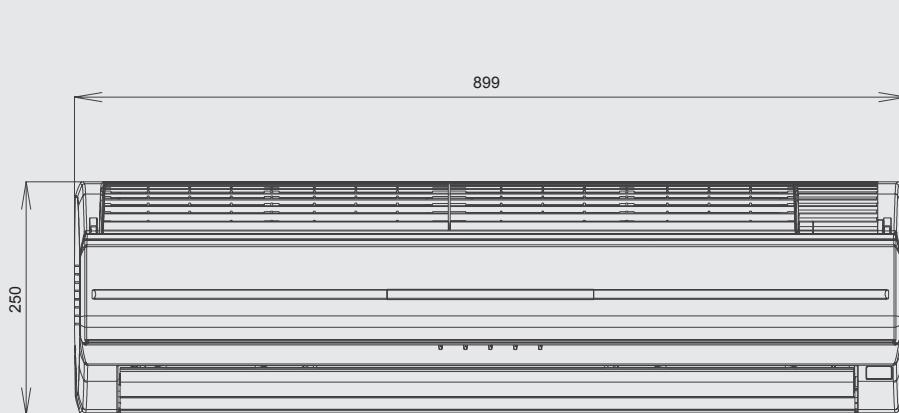

*1: Announced September 9, 2002. In room air conditioner for the home (Our company's investigation) *2: Displays double the effect of a conventional optical medium and retains its property for a long time to suck in and remove approx. 99.99% of cigarette odors and bacteria, etc. *3: Announced December 13, 2004. As fan motor for air conditioner (Our company's investigation)

Energy saving control

Human sensor catches movements of people in a room, and operates with lower capacity when the room is empty. When people come back to the room, it automatically returns to previous operating mode.

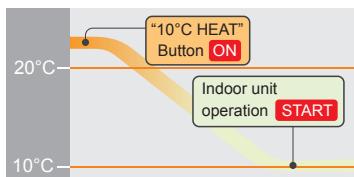

Energy saving operation by detecting someone's movement

10°C HEAT Operation

*Only available with Wireless RC.

The room temperature can be set to go no lower than 10°C, thus ensuring that the room does not get too cold when not occupied

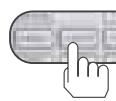

Caution

- When the room temperature is higher than 10°C, "10°C HEAT" operation does not start. Operation starts and maintains the room temperature at 10°C for 48 hours when the temperature drops below 10°C.
- When "10°C HEAT" operation stops, the room set temperature quickly returns to the preset temperature.

3 Mode timer (Weekly/Program/Sleep)

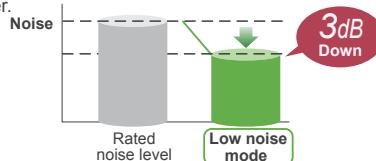

Weekly timer can be easily set by wireless remote controller.

ON, OFF can be set up to 4 times in 1 day and up to 28 times in 1 week. For other modes, program timer and sleep timer can be also selected by one push.

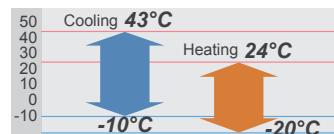

Low noise mode for outdoor unit

Low noise mode of outdoor unit can be selected by wireless remote controller.

Low ambient operation

Optional parts

Wired Remote Controller: UTY-RNNYM

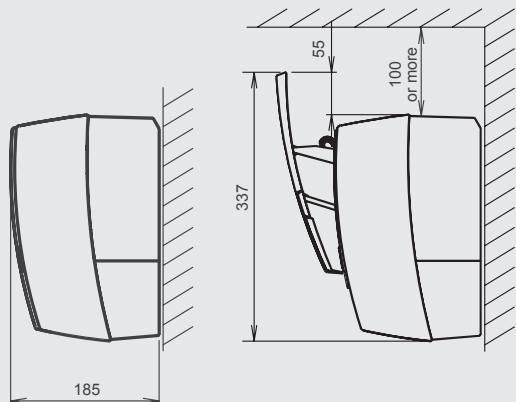

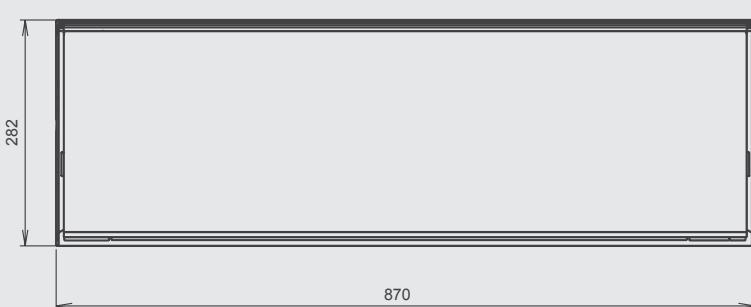

Simple Remote Controller: UTY-RSNYM

Communication Kit: UTY-TWBXF

Dimensions

Models: ASYG09LT / ASYG12LT

(Unit : mm)

INVERTER Wall Mounted

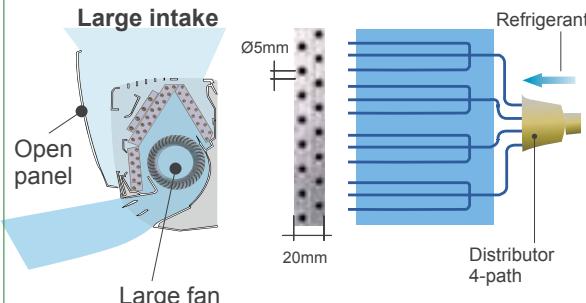

Thin & Slim design

Thin and slim design is realized by Ø5mm heat exchanger and high efficiency wind blower.

Big open panel and High density multi path heat exchanger

Powerful output in spite of small size

Though the indoor unit is compact, it features a large, high pressure cross fan (90mm diameter) in a center mounted configuration and a lambda type heat exchanger to provide plenty of power. The extra long diffuser provides a wide outflow opening for air. This ensures a large air outflow volume over a wide area to cool or heat all areas of the room.

Auto swing louver

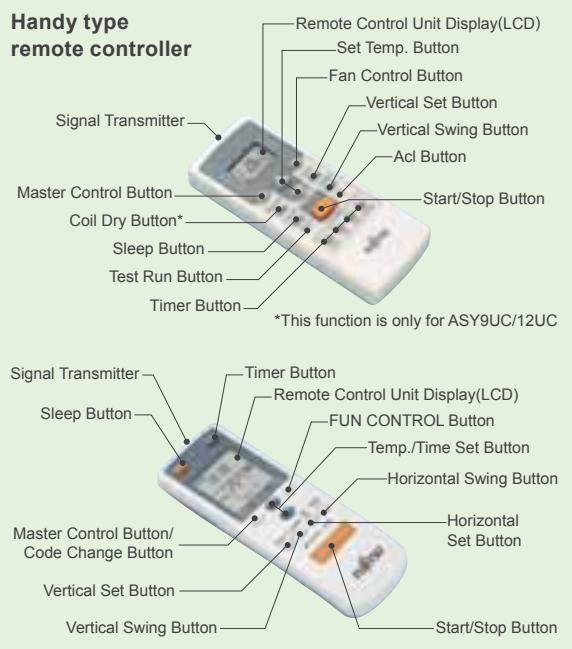

Symmetrical design

Symmetrical, clean design that suits all interiors.

Easy maintenance

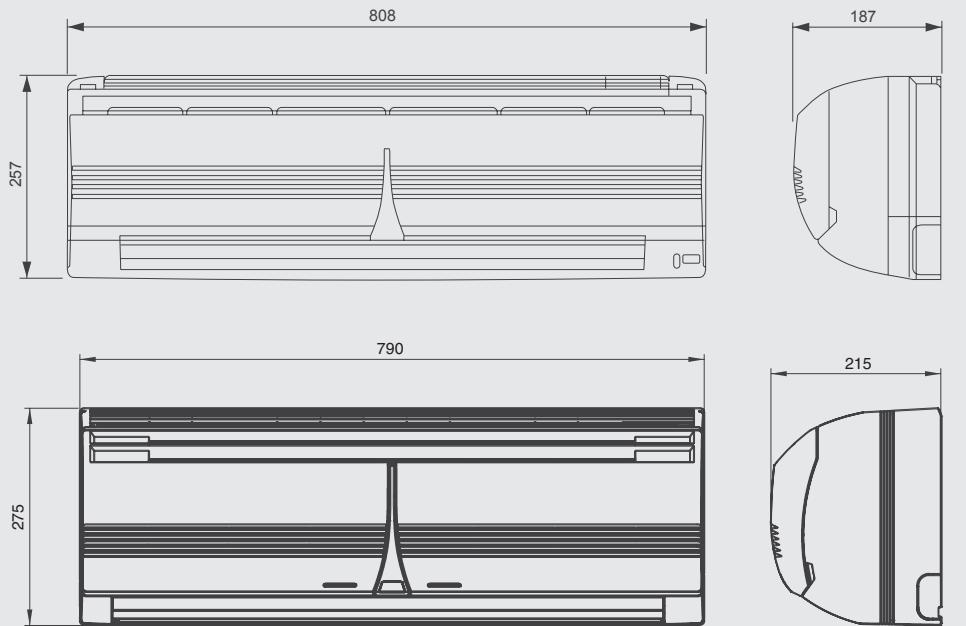

Easy maintenance has been realized as the front panel can be removed for easy access.

Easy maintenance

① Maintenance of fan motor and fan

Maintenance of the fan motor and fan can be done easily after taking off the panel as the bell mouth of the fan can be removed easily.

A : Fan motor B : 2-stage turbo fan
C : Bell-mouth D : Panel

② Long life filter

: standard equipment

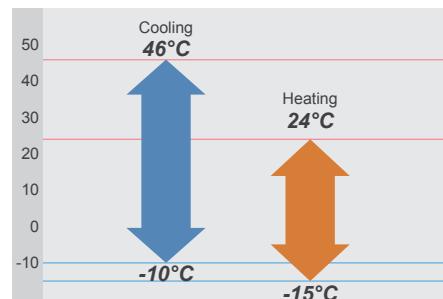

③ Adaptation of transparent drainage parts

During installation, maintenance and operation, the drain pump and kit can be checked easily.

High lift drain pump

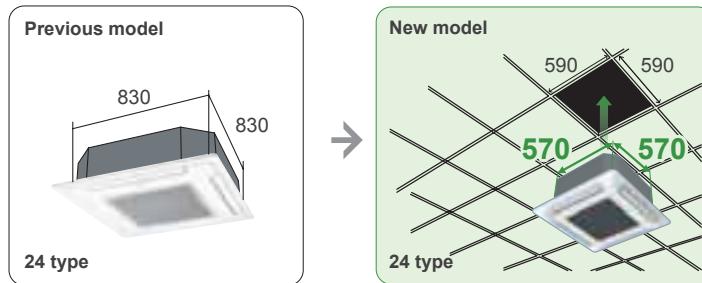

Low ambient operation

Compact design

World's first 24,000Btu model in the compact cassette category
(Easy installation by taking off ceiling panel of 600 x 600 size)

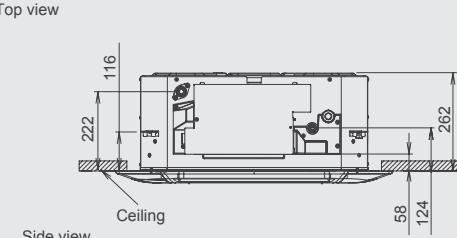

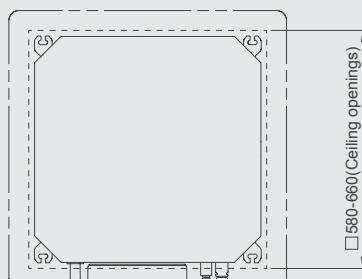

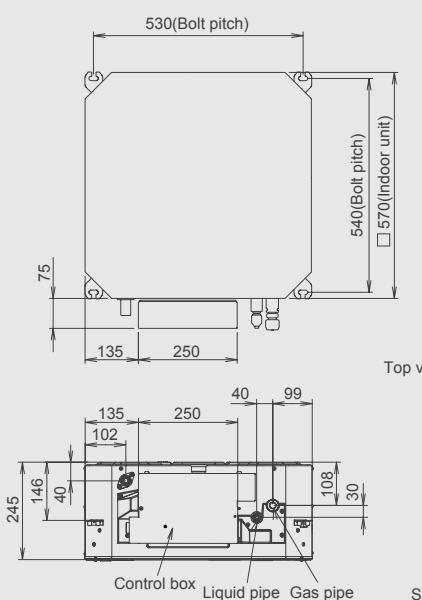

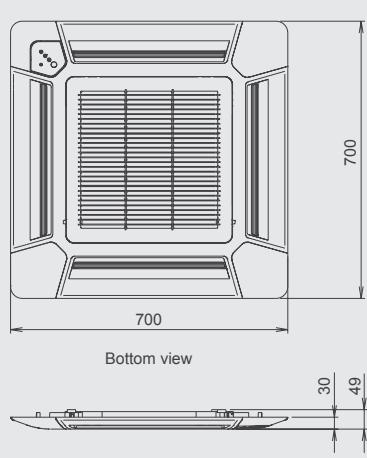

Optional parts

Air Outlet Shutter Plate:	UTR-YDZB
Wired Remote Controller:	UTB-YUD
Insulation Kit For High Humidity:	UTZ-KXGC
External Connect Kit:	UTY-XWZX
External Control Set:	UTD-ECS5A
Fresh Air Intake Kit:	UTZ-VXAA

High efficiency turbo fan with 3-dimensional blade

Previous turbo fan: Air passing through the heat exchanger was uneven and the air would only flow close to the ceiling.

New turbo fan: High efficiency airflow distribution has been achieved by the introduction of a 3 dimensional blade which increases the air passing over the heat exchanger.

Condensate lift-up mechanism (Option)

Optional drain lift-up mechanism allows flexible installation.

Low noise mode of outdoor unit (45/54 types)

2 stage low noise mode can be selected.(Option)

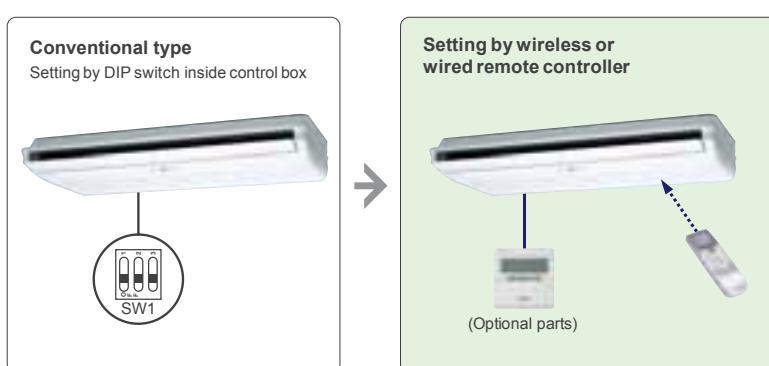

Easy installation

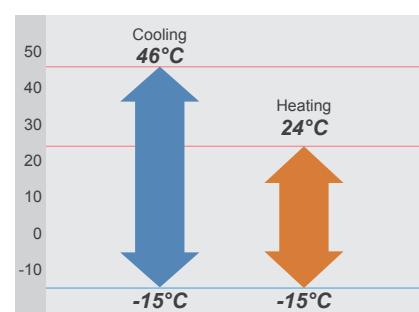

Main work settings can be done easily from the remote controller at installation

Main work settings

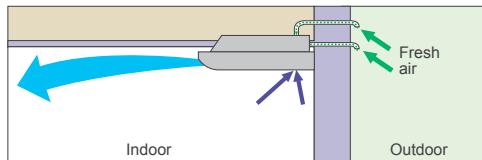

- High ceiling setting
- Auto restart
- Temperature adjustment when cooling / heating

Low ambient operation

Fresh air intake

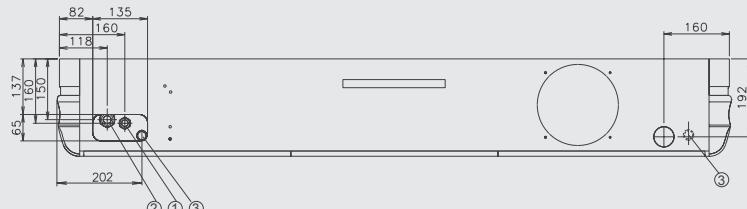

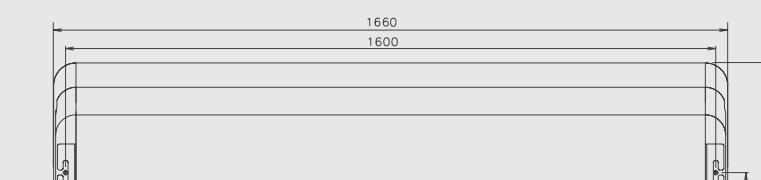

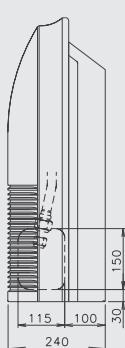

Optional parts

Wired Remote Controller:	UTB-YUD
Drain Pump Unit:	UTR-DPB24T
External Connect Kit:	UTY-XWZX UTY-XWZXZ2
External Control Set:	UTD-ECS5A

Dimensions

Models: ABYA30LB / ABYA36LB / ABYA36LC / ABYA45LC / ABYA54LC

(Unit : mm)

Installation

Open

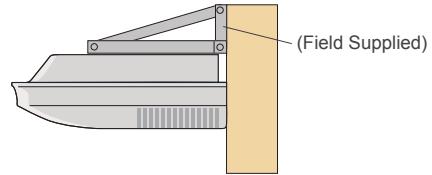

General installation pattern which suspends the indoor unit from the ceiling.

Concealed

Installation pattern where part of the indoor unit is embedded into the ceiling.

Wall mounted

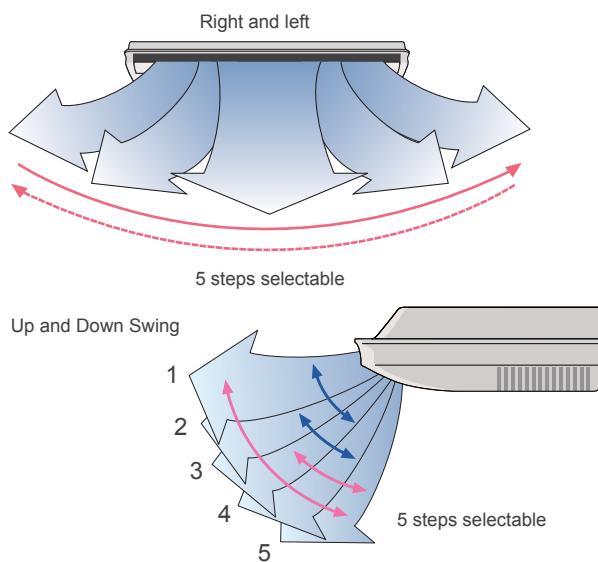

Installation which fixes the indoor unit to the wall by the use of wall brackets (Field supplied). This type of installation can be used when the ceiling space is insufficient.

Dimensions

Models: ARYC45LC / ARYC54LC

(Unit : mm)

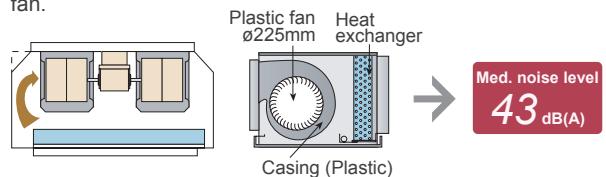

- ① Refrigerant piping flare connection (Liquid)
- ② Refrigerant piping flare connection (Gas)
- ③ Drain piping connection

Low noise

Indoor unit

Cutting off the corners has enabled less turbulent air flow. Low noise is realized by adopting a plastic case and a plastic fan.

Outdoor unit

2 stage low noise mode can be selected.(Option)

Easy installation & maintenance

- 4 directions piping connection
- Error & operating information are explained by LED display.

Optional parts

- Long-Life Filter: UTD-LF60KA
- External Connect Kit: UTY-XWZXZ2
- External Control Set: UTD-ECS5A

High Static Pressure Duct

Design also corresponding to high static pressure

Model: ARY90TL

Multi Split

Control several indoor units with one outdoor unit.
Build the optimum system you desire.

If you want to keep a large floor as well as many rooms comfortable, we recommend you use Multi Split to build a simple system using one outdoor unit.

Choose from a large lineup the air conditioner types that match your rooms.

You can mix and match them at will.

Build the system that is just right for you.

2 & 3-4 Rooms Multi

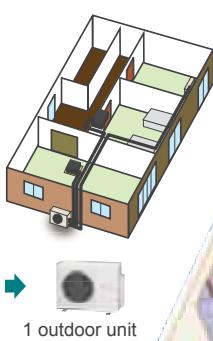

Space-saving installation

Multiple indoor units can be connected to 1 outdoor unit, and long piping connection is also possible. Compared with single type, the outdoor unit can be installed in various places to realize the space-saving installation.

Ex.) Single type installation

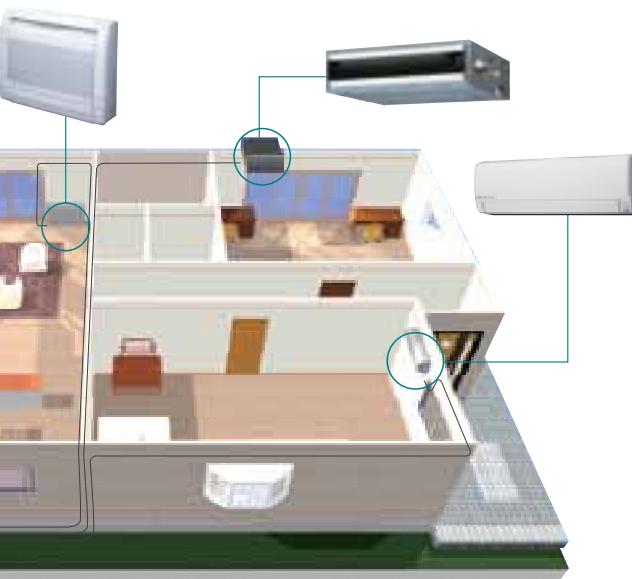

Multi type installation

Wide range of indoor units with various models

6 types, 20 models are lined up in the capacity range from 2kW to 7kW class.

The wide-ranging needs can be met from the private room of residence or hotel to large shop.

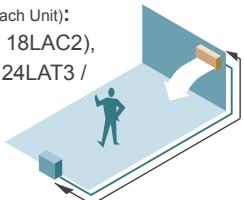

Flexible installation

Up to max. piping length 70m (AOYG30LAT4), max. height difference 15m can be supported. Multi type can be installed at large-size residence or multiple floors.

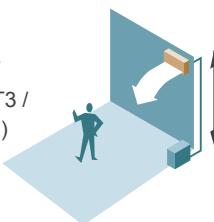

Max.Piping Length (Each Unit)*

20m (AOYG14LAC2 / 18LAC2),
25m (AOYG18LAT3 / 24LAT3 /
 30LAT4)

Max.Height:

15m (AOYG14LAC2 /

INVERTER

8 Rooms Multi

- Suitable for large homes, shops, small buildings, and a variety of other multi installations
- Up to 8 indoor units can be connected
- Excellent installability, lightweight, compact yet high efficiency operation outdoor unit

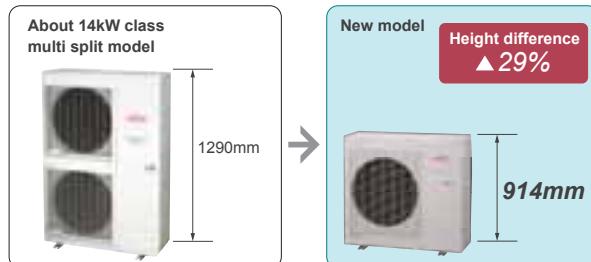

ALL
DC

AOYG45LAT8

High Efficiency & Compact

Compact outdoor unit

Innovated technology

High efficiency large fan :
New high efficiency fan is mounted.

DC fan motor :
High performance and high efficiency has been realized by using a small DC fan motor.

Heat exchanger :
Reduced compact size and energy saving has been realized by utilizing high density piping design and 3-Row heat exchanger.

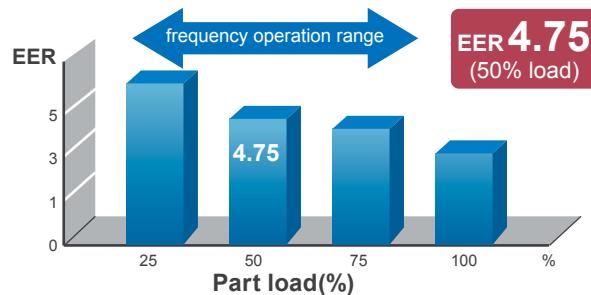

High efficiency DC twin rotary compressor :
A high performance, low noise, large capacity DC twin rotary compressor is used.

High seasonal efficiency

The actual performance is conducted under various outside temperatures depending on weather and seasons, furthermore, especially for multi system, not all the rooms are operated all the time. So over 90% of actual operation time, air conditioners are operated at partial capacity instead of rated capacity.

Considering these, we focused on energy-saving performance which is based on actual use.

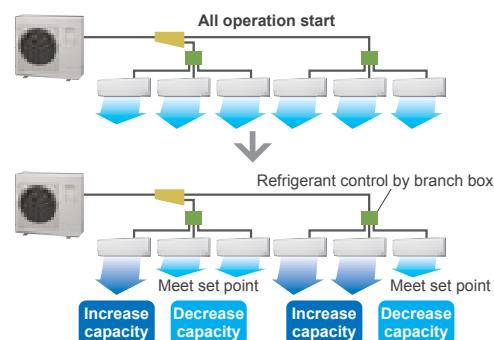

Efficiency of part load performance was drastically improved by developing ALL DC and our own inverter system.

More Comfort

Quick comfort by optimized refrigerant control

Every room meet set point most quickly and comfortably by optimized refrigerant control.

Central Remote Controller

Option

Central remote controller developed for residential applications.

All indoor units can be batched controlled using simple operations. Schedule management and other functions can be used to achieve even greater energy savings.

Central & Individual Control

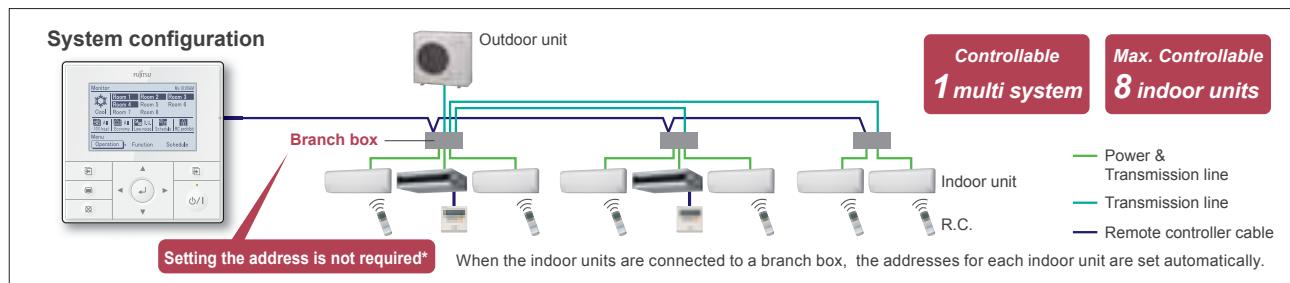

Batched control of up to 8 indoor units. The temperature, airflow volume, and remote control prohibition settings of all indoor units can be batched.

User-friendly operation

- Large backlight LED screen
- Large easy-to-see operation panel

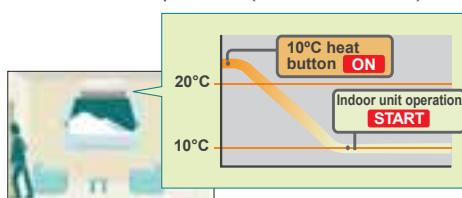

Multiple language support

Corresponds to 9 different languages (English, German, French, Spanish, Russian, Portuguese, Italian, Greek, and Turkish)

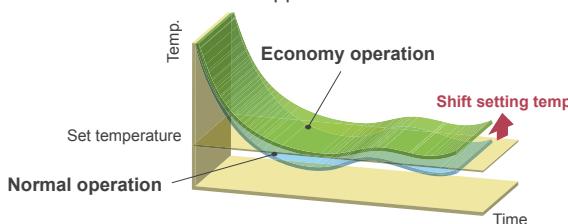

10°C heat operation

When you leave, minimum heating operation is performed to maintain the room temperature (maintain at 10°C).

Economy operation

Economy operation is energy saving, as the set temperature of indoor unit is shifted by 1°C and the maximum electric value of the outdoor unit is suppressed.

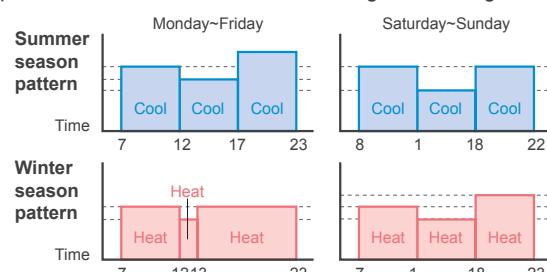

Prohibited Settings

The remote controller operation of all indoor units comes with a lock function to prevent unapproved operations in the various rooms. The central remote controller also has a key lock function to prevent children from playing with it, etc

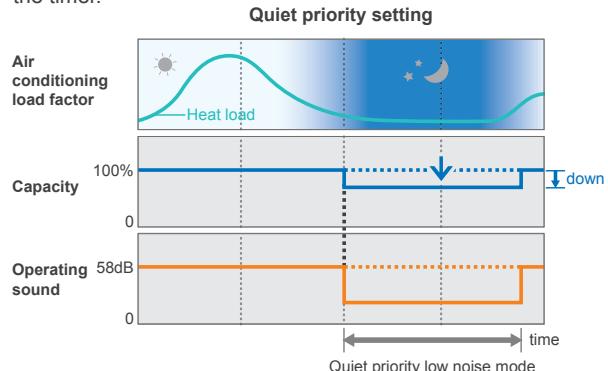

Weekly schedule timer

The ON/OFF setting can be set for 4 times a day. Two weekly patterns can be set to match the cooling and heating seasons.

Low noise operation

Users can choose from 4 low noise levels, depending on the installation environment. The operation time can be set using the timer.

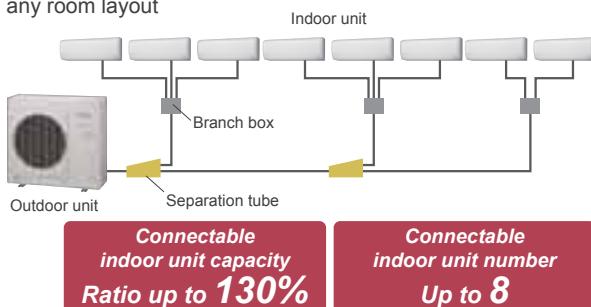

INVERTER

8 Rooms Multi

Flexible Design & Easy Installation

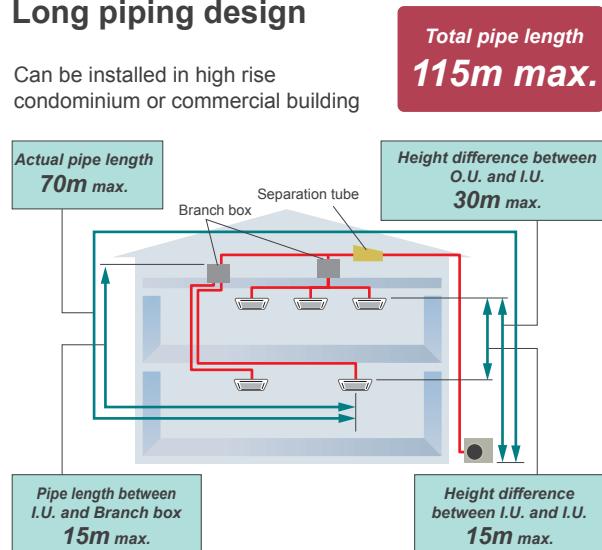

Large capacity connection

Up to 8 indoor units can be connected to one outdoor unit. A maximum of 130% indoor unit connectable capacity. Match any room layout

Long piping design

Can be installed in high rise condominium or commercial building

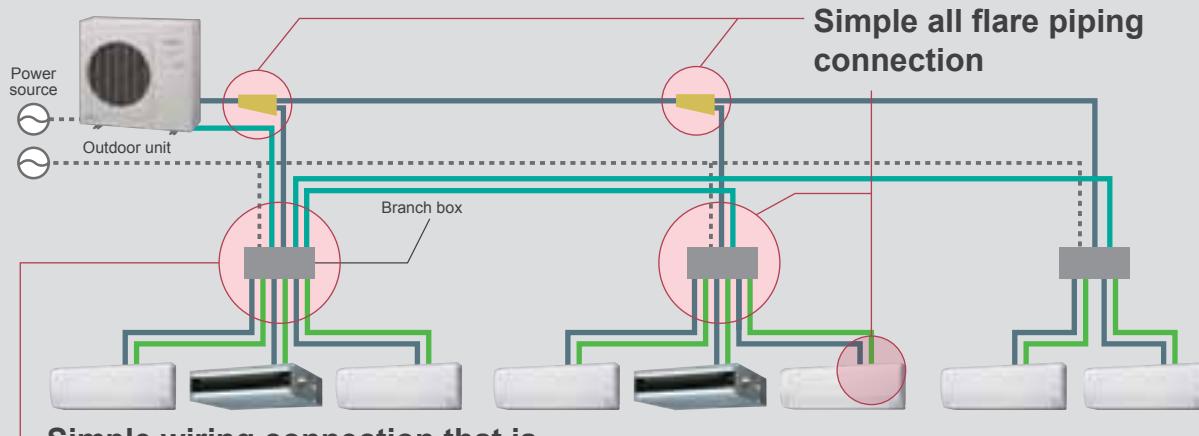

All flare piping connection and simple installation that minimizes wiring mistakes.

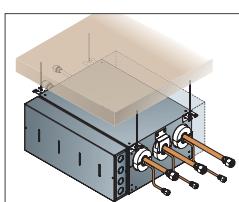

Wiring mistake automatic check function

The check operation detects wiring mistakes in advance.

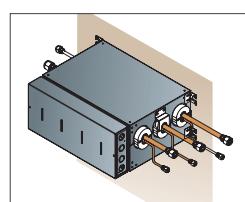

Branch Box can be mounted flexibly.

Allowed Branch Box Mounting Direction

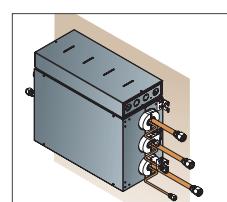

Hanging from the ceiling

Do not hang from the ceiling when performing a vertical installation.

Horizontal Wall Mounting

Install the unit with its top side facing upwards.

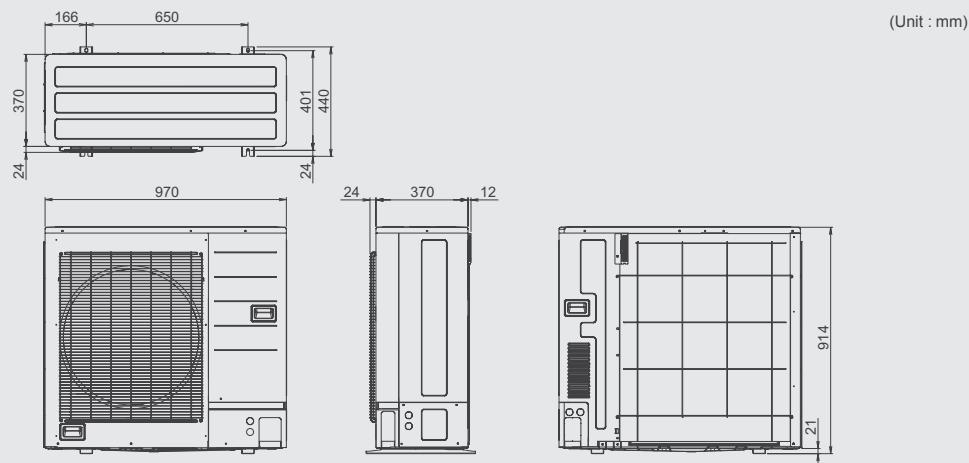

Vertical Wall Mounting

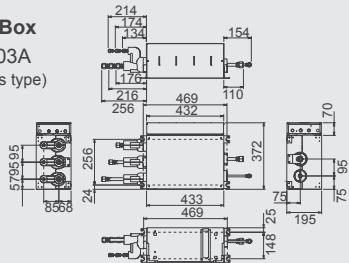

Install the unit with the control box facing upwards.

ASYG07LJ

ASYG09LJ

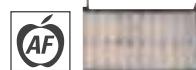

ASYG12LJ

Compact flat design**High density heat exchanger arrangement****Air clean filter**

Long-life* Ion Deodorization Filter

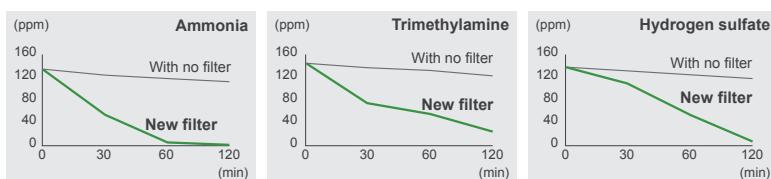

The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine-particle ceramic.

(*The filter can be used for approx. 3 years if it is washed under water to restore its surface action when it is dirty.)

Apple-catechin Filter

Fine dust, invisible mold spores, and harmful microorganisms are absorbed onto the filter by static electricity, and further growth is inhibited and deactivated by the polyphenol extracted from apples.

Deodorizing effect (Odor reduction rate)

Testing organization : Environmental Sanitary Inspection Center Test method : Deodorization Test

3 Room	12	12	12	2.27	6.80 (1.8 - 8.3)	1.94 (0.50 - 2.87)	3.51 A

Note: *Indoor unit combinations shown here are the patterns of units operating, not patterns of units connectable. However, at least 2 or more indoor units should be connected.

*Cooling capacity is based on 27°CDB/19°CWB (indoor temperature), 35°CDB (outdoor temperature).

*Pipe Length: 7.5m, Height difference: 0m (Outdoor unit to Indoor unit)

*1: When ASYG18L is connected, connect at least 1 wall mounted type for 9kBTU.

Note: •Indoor unit combinations shown here are the patterns of units operating, not patterns of units connectable. However, at least 2 or more indoor units should be connected.

•Heating capacity is based on 20°CDB (indoor temperature), 7°CDB/6°CWB (outdoor temperature).

•Pipe Length: 7.5m, Height difference: 0m (Outdoor unit to Indoor unit)

*1: When ASYG18L is connected, connect at least 1 wall mounted type for 9kBTU.

Multi Combination Table

Note: •Indoor unit combinations shown here are the patterns of units operating, not patterns of units connectable. However, at least 3 or more indoor units should be connected.

•Cooling capacity is based on 27°CDB/19°CWB (indoor temperature), 35°CDB (outdoor temperature).

•Pipe Length: 7.5m, Height difference: 0m (Outdoor unit to Indoor unit)

Note: • Heating capacity is based on 20°CDB(indoor temperature), 7°CDB/6°CWB(outdoor temperature)

• Pipe Length: 5m (Outdoor unit to Branch box), 3m (Branch box to Indoor unit)

• Height difference: 0m (Outdoor unit to Indoor unit)

The values in this table should be used only as a guide. These values are calculated at standard conditions.

When you select models finally, select them according to "Model Selection" in the D&T manual

Note: • Heating capacity is based on 20°CDB(indoor temperature), 7°CDB/6°CWB(outdoor temperature)

• Pipe Length: 5m (Outdoor unit to Branch box), 3m (Branch box to Indoor unit)

• Height difference: 0m (Outdoor unit to Indoor unit)

• The values in this table should be used only as a guide. These values are calculated at standard conditions.

When you select models finally, select them according to "Model Selection" in the D&T manual

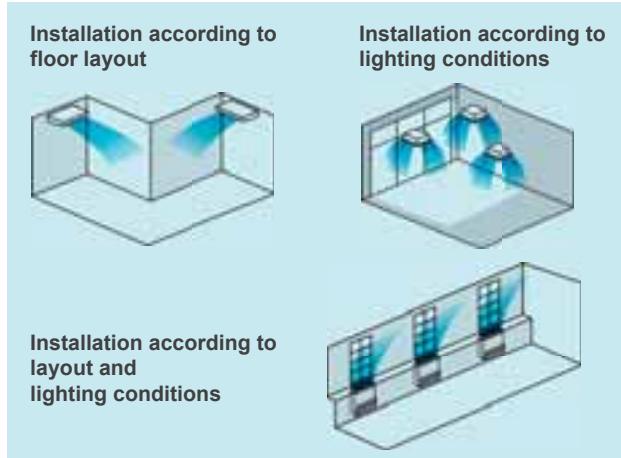

INVERTER

Simultaneous Multi Twin / Triple

Can support various installation scenes from office to commercial space by same place multi connection of up to 3units.

Indoor units distributed layout according to the shape and number of people and lighting conditions of the room even on wide floors and atypical floors. Ideal comfortable air flow distribution can be realized.

*Different type and capacity indoor units can not be connected .

Simultaneous control

Max 16 indoor units are simultaneously controlled with a wired remote controller.

Low ambient operation

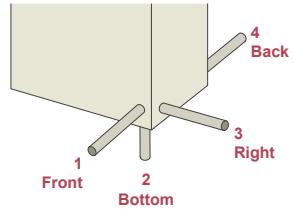

External input

Low noise mode: Suppresses night time operating sound.
Peak cut function: Suppresses maximum capacity and performs energy saving operation and can prevent breaker tripping.

Piping connection

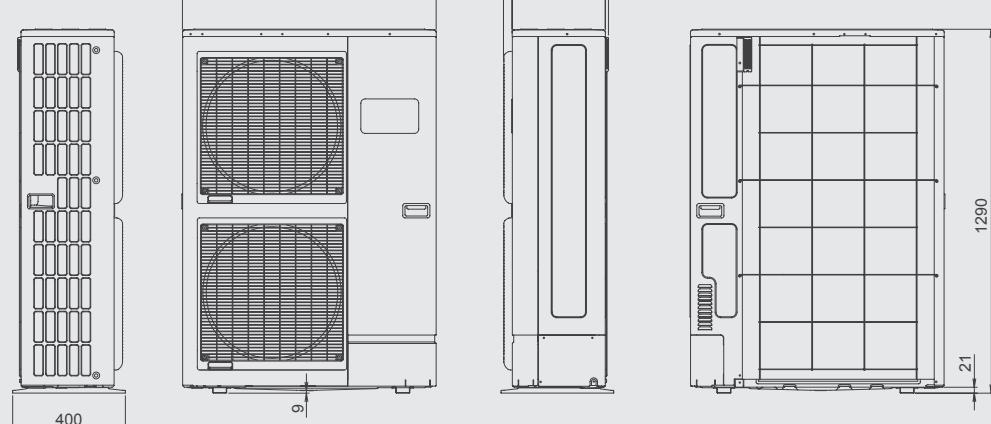

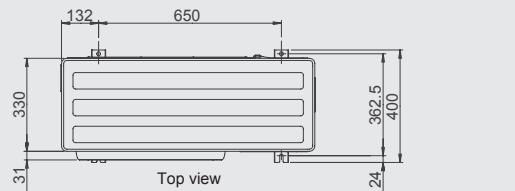

Four directions piping connection is possible. The perfect route can be selected according to the installation.

Dimensions

Models: AOYD36LATT / AOYD45LATT / AOYD54LATT

(Unit : mm)

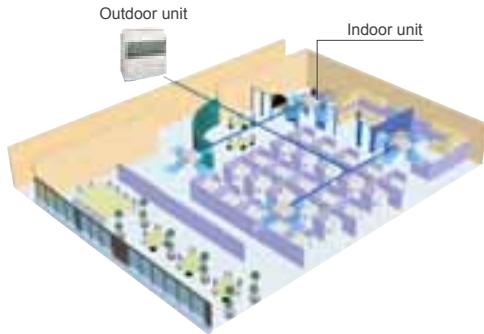

Big Multi

Simultaneous Operation

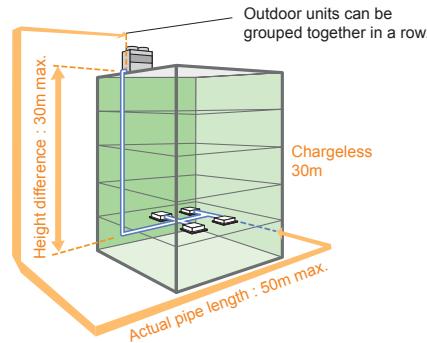

Features of System Operations

- Simultaneous Operating System suitable for large spaces such as offices, lobbies and waiting rooms of high-rise buildings.
- One controller can simultaneously control cooling or heating by 2~4 indoor units.

Indoor Unit Lineup

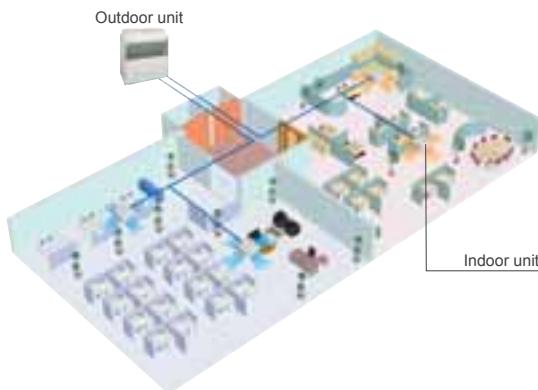

CAPACITY (BTU)	CASSETTE (COMPACT)	CASSETTE	DUCT	FLOOR/CEILING UNIVERSAL	CEILING (LARGE)
45,000		●	●		●

24,000				●	
18,000	●			●	

Individual Operation

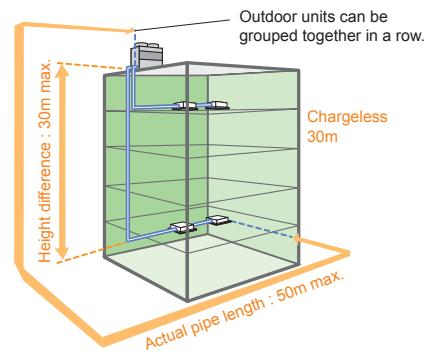

Features of System Operations

- Individual Operating System is suitable for large spaces such as hotels, commercial spaces, offices and restaurants.
- The system can cool and heat individually, because it has two refrigeration cycles.

VRF

AIRSTAGE™ creates a comfortable space with a wide range of series variations.

Comfort is required of spaces where people gather.

VRF is a large multi system that effectively air conditions a wide range of spaces from large buildings to personal residences.

This system makes a variety of spaces comfortable utilizing high environmental performance and powerful but pleasant operation.

096 AIRSTAGE™ J Heat pump type

104 AIRSTAGE™ S Heat recovery type

FUJITSU

Variable Refrigerant Flow system
For Home & Buildings

AIRSTAGE™

FUJITSU GENERAL LIMITED

Compact VRF System for use in apartments, homes, shops, offices and a broad range of other applications

Heat pump
AJYA54LCLR

Economy & Comfort

Powerful operation with low electricity consumption

Excellent EER/COP are attainable as shown in the table below.

Cooling EER	Heating COP
3.20*	3.40*

* "EER/COP" is the coefficient of performance (=capacity (kW) ÷ input power (kW)).
*EER/COP values are base on our own testing method.

Uses a high-performance DC inverter scroll compressor with variable capacity according to the load during cooling and heating.

Low noise design

Newly designed larger fan and double casing bell mouth construction reduce noise emissions.

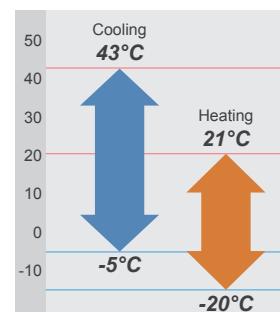

Large fan
Low speed design suppresses noise by using a larger fan.

Double casing bell mouth
Double casing bell mouth helps to reduce noise.

Wide operating range

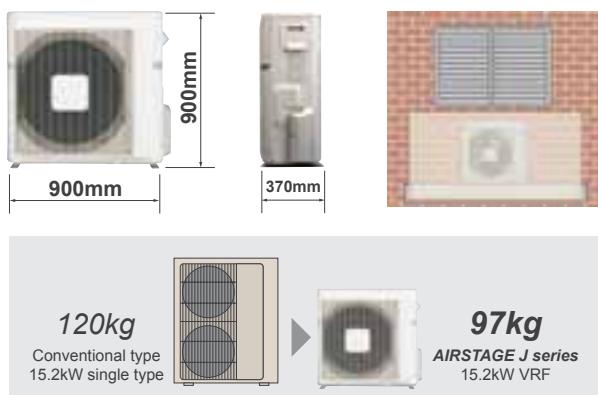

Outdoor unit operates over an ambient temperature range of -5°C to 43°C for cooling and -20°C to 21°C for heating.

Design Versatility

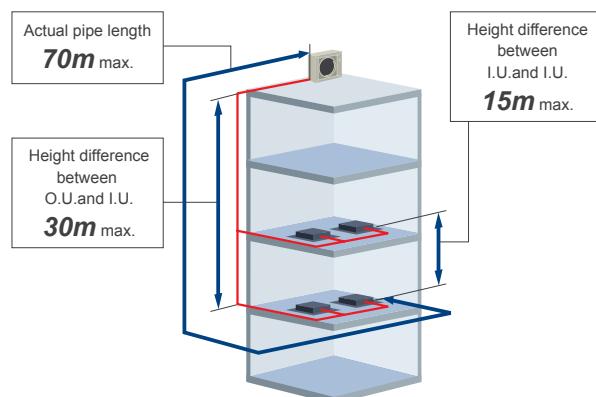

Compact design

Small, compact casing can be easily concealed. The low overall height allows the unit to be neatly positioned beneath a window.

Long piping length

The maximum piping length is 70m, and can cope with a wide range of applications from homes to offices.

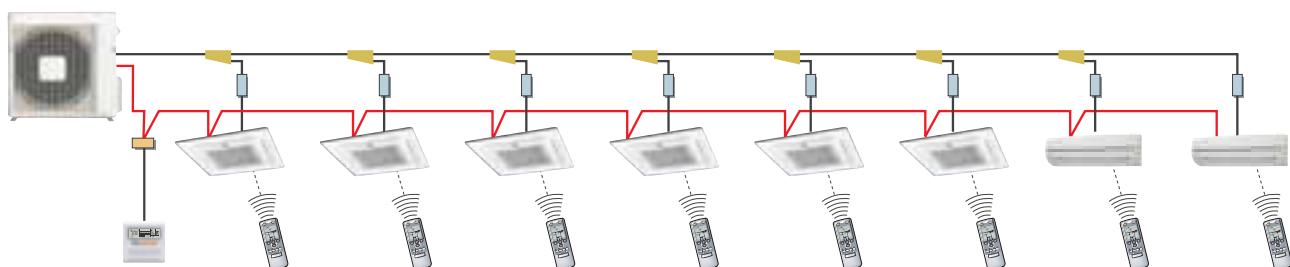

High capacity connection

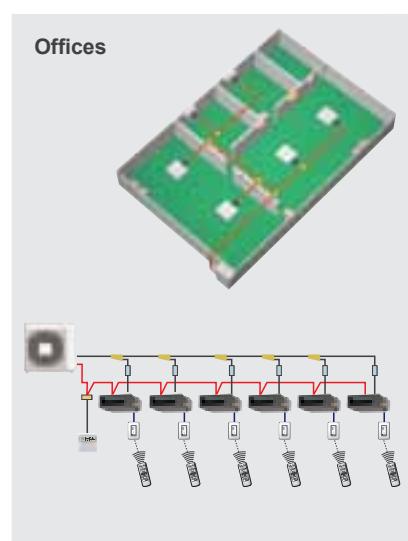

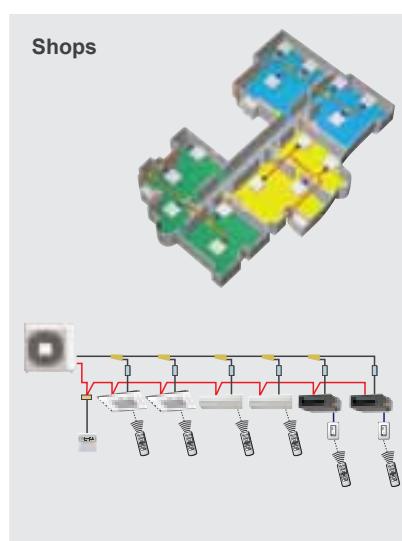

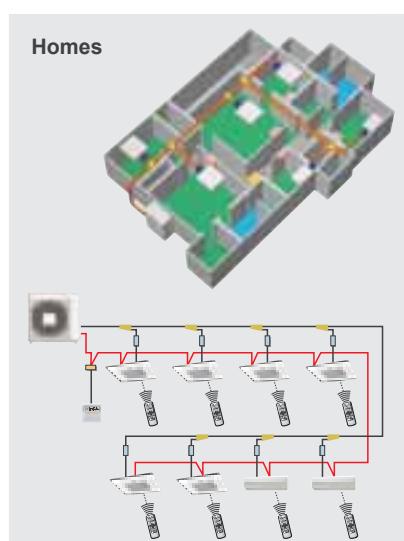

- Up to 8 indoor units can be connected to 1 outdoor unit. Furthermore, the indoor unit connection capacity can be up to 150% of the outdoor unit rating. This increases design flexibility.
- All indoor units are supplied with a Wireless Remote Controller.

Max. 8 indoor units connectable

Indoor unit connectable capacity 150%

System that allows individual air conditioning of multiple rooms

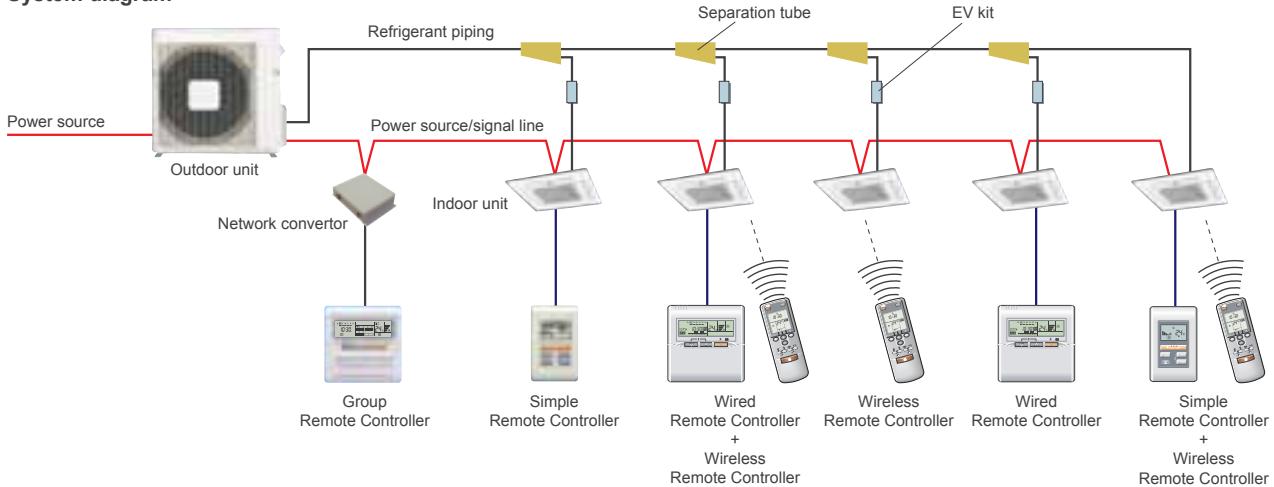

Easy Installation

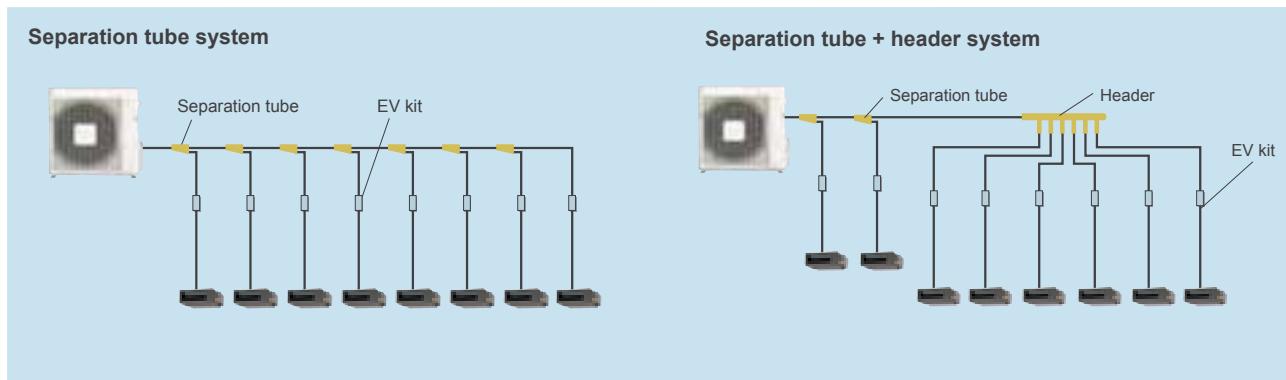

Simple piping system

The wiring work is simple in the connection wiring system one by one. The dedicated communication line is unnecessary. The electrical work is simple because of single-phase power supply.

System diagram

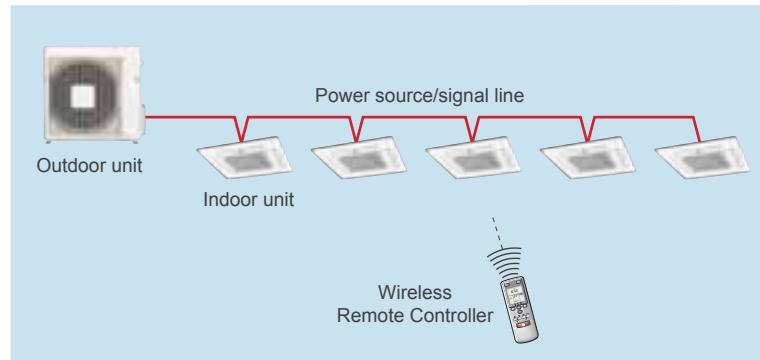

Piping connection examples

Easy system address setting

During installation work, system addressing can be performed using the wireless remote controller, thus eliminating manual switch setting.

Voltage: 230[V]

Maximum comfort from
inbuilt flexibility

Heat recovery
AO90MPCMF

High Efficiency

Operating system

Cooling and heating can be performed simultaneously within the same refrigerant circuit. Energy savings are made by transferring heat between the indoor units when in heat recovery operation.

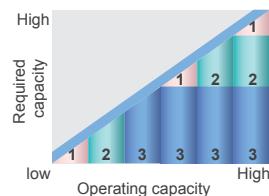

Cooling EER
2.98*

Heating COP
3.15*

*EER/COP values are base on our own testing method.

Smooth operation delivering high efficiencies

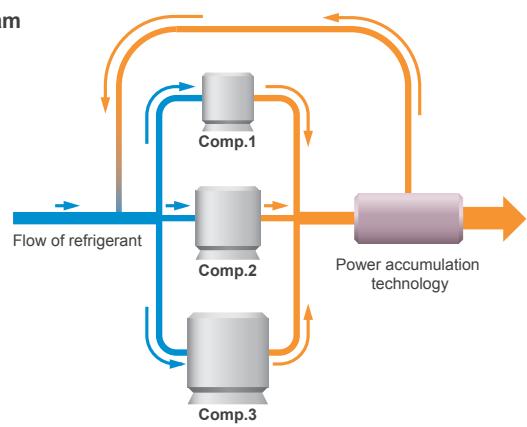

The configuration of 3 constant speed compressors with differing capacities and power accumulation technology ensure smooth step changes and highly efficient operation.

Power accumulation technology

Flow rate to the indoor unit(s) is controlled through the use of 3 differently rated compressors operating in a sequential step arrangement. While power accumulation technology controls the circulating load of the refrigerant flow between those steps.

Diagram

Comfortable Operation

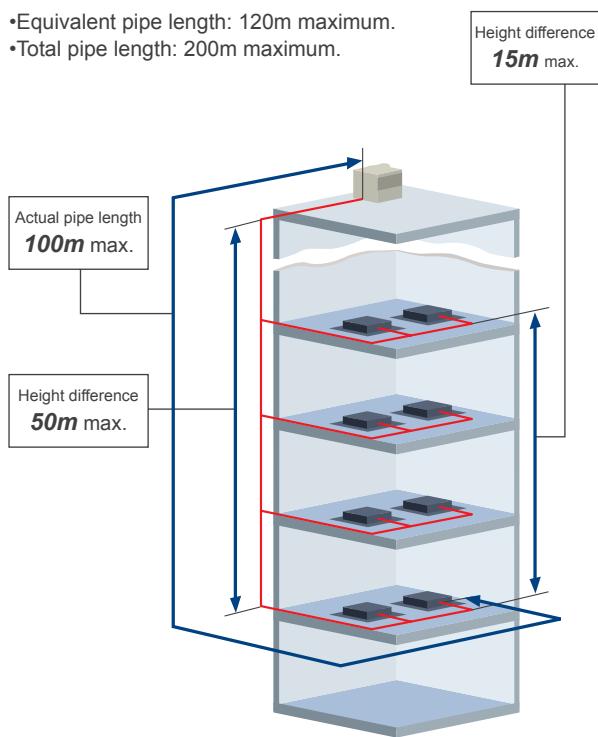

Heat recovery operation

Heat recovery operation is a cooling/heating free operation system, cooling and heating can be performed simultaneously in the same refrigerant system according to user needs. At the moment, the Heat Recovery operation is an extremely superior type that provides a still greater energy saving effect by moving heat between indoor units that are performing the cooling and heating operations. This is by having the compressors act like a pump.

Design Versatility

Long piping system design

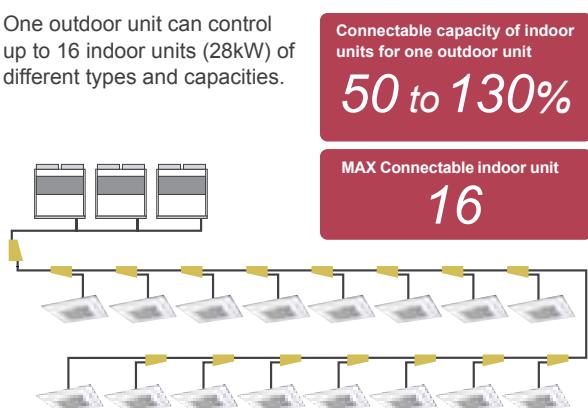

- Equivalent pipe length: 120m maximum.
- Total pipe length: 200m maximum.

*When outdoor unit is located above indoor unit. When outdoor unit is located below the indoor unit the height difference is 40m maximum.

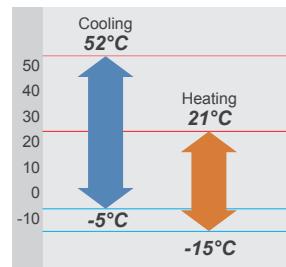

High capacity connection

One outdoor unit can control up to 16 indoor units (28kW) of different types and capacities.

Wide operating range

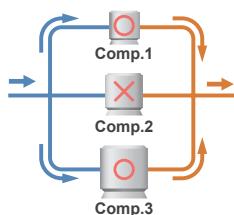

Outdoor unit operates over an outdoor temperature range of -5°C to 52°C for cooling and -15°C to 21°C for heating.

High Reliability

Recovery operation

Outdoor Unit: In the event of compressor failure an alarm is automatically triggered and the remaining compressor(s) will continue to operate, thereby ensuring continuous operation when possible.

Indoor Unit: Each indoor unit operates independently from the others and is, therefore, not affected by a failure within any part of the network.

Oil recovery operation

After a fixed period of time the oil recovery operation automatically returns accumulated oil found in the refrigerant circuit and indoor units.

Improved Comfort

Quiet operation

Operational noise has been reduced yet further through the application of a new dual casing bell-mouth and large fan. When set to silent operation, noise levels can be reduced by 5-6dB(A) compared to normal operation.

Normal operation mode	55dB(A)
Silent operation mode	50dB(A)

(380V)

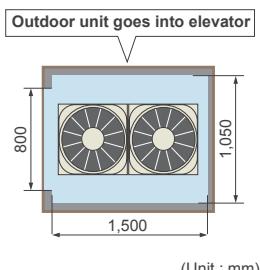

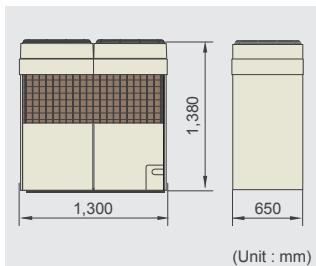

Easy Installation

Space saving

Space saving by setting side by side without space in between.

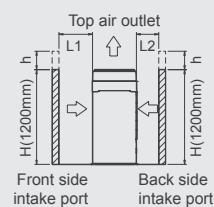

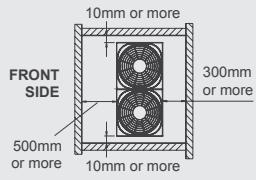

Setting size **5.72** (Unit: m²)

Dimensions

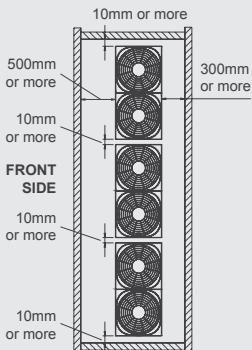

Installation space

For individually

For continuous

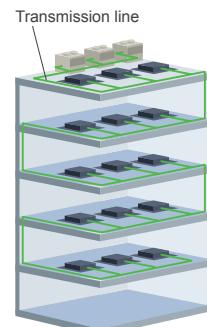

There is no height restriction for the side wall. The height(H) of front and rear wall should be less than 1,200mm. If the height of wall exceeds 1,200mm by h mm, add h mm to the service space width for L1 and L2.
H≤1,200 : L1≥500, L2≥300 H>1,200 + h : L1>500 + h, L2>300 + h

Easy wiring

Transmission line:

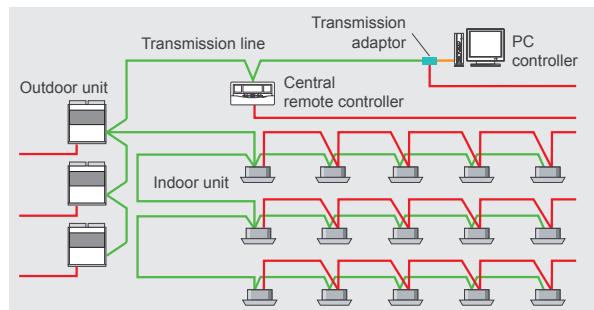

Non-polar 2-conductor transmission line prevents erroneous wiring.

Power supply wiring:

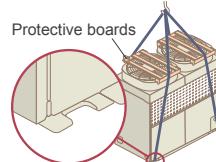

Power supply for outdoor and indoor units is different.

- **Outdoor unit**
3Ø 4W 380 - 415V 50Hz
- **Indoor unit:**
1Ø 2W 220 - 240V 50Hz

Craning into place

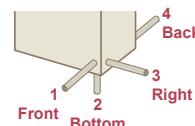

The outdoor unit can be lifted by crane and set down on the building roof.

Four-direction pipe

Four-direction piping allows a variety of installation configurations.

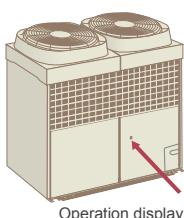

Easy installation and pipe direction setting.

Easy Maintenance

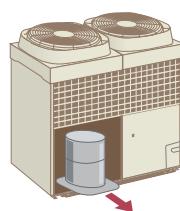

Operating display

By indicating the operating status and details of failures on a PCB in the outdoor unit, better service and quick and easy maintenance are possible.

Easy replacement

A pull-out plate ensures easy compressor replacement if necessary.

Pump down control

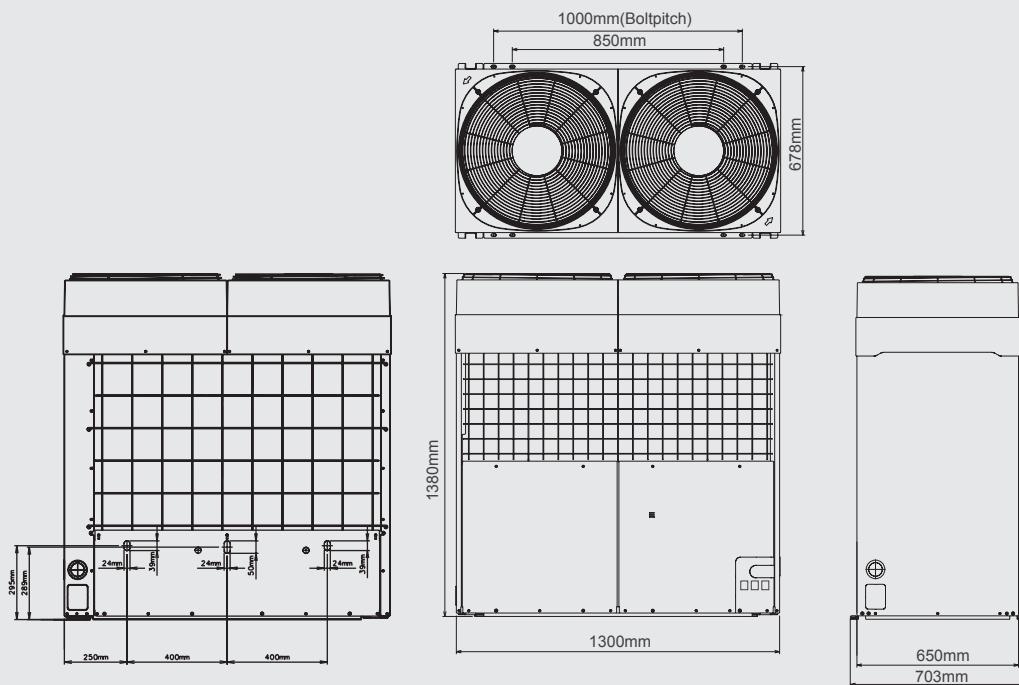

Pump down can be performed from the outdoor unit using the switch on the PCB.

Voltage : 230 [V].

Smart and cutting edge design
 Extensive lineup from 8HP to 48HP
 in 2HP increment
 Connectable indoor unit capacity ratio up to 150%

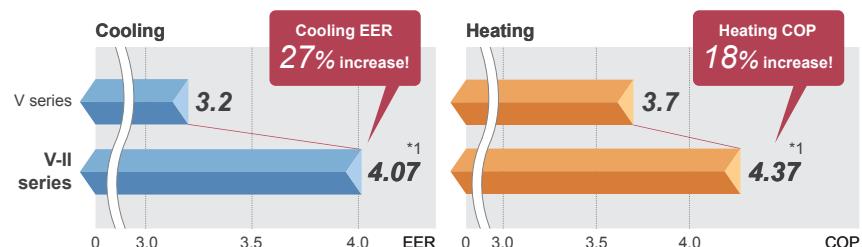

High Efficiency

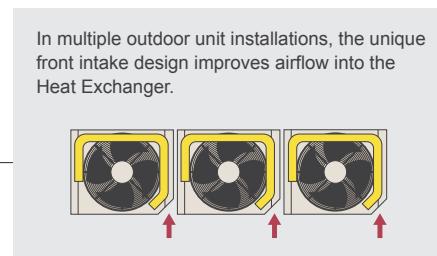

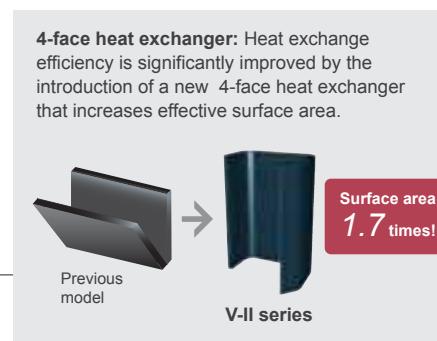

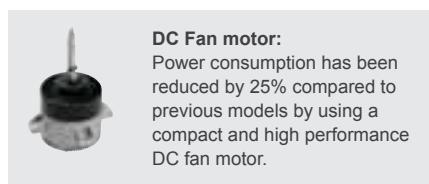

Significantly improved EER/COP

Significantly greater efficiency is realized by the use of a DC twin rotary compressor, inverter technology, and large heat exchanger.

* "EER/COP" is the coefficient of performance [$=$ capacity (kW) \div input power (kW)].
 *EER/COP values are based on our own testing method.
 **1. The data refers to a 8HP outdoor unit.

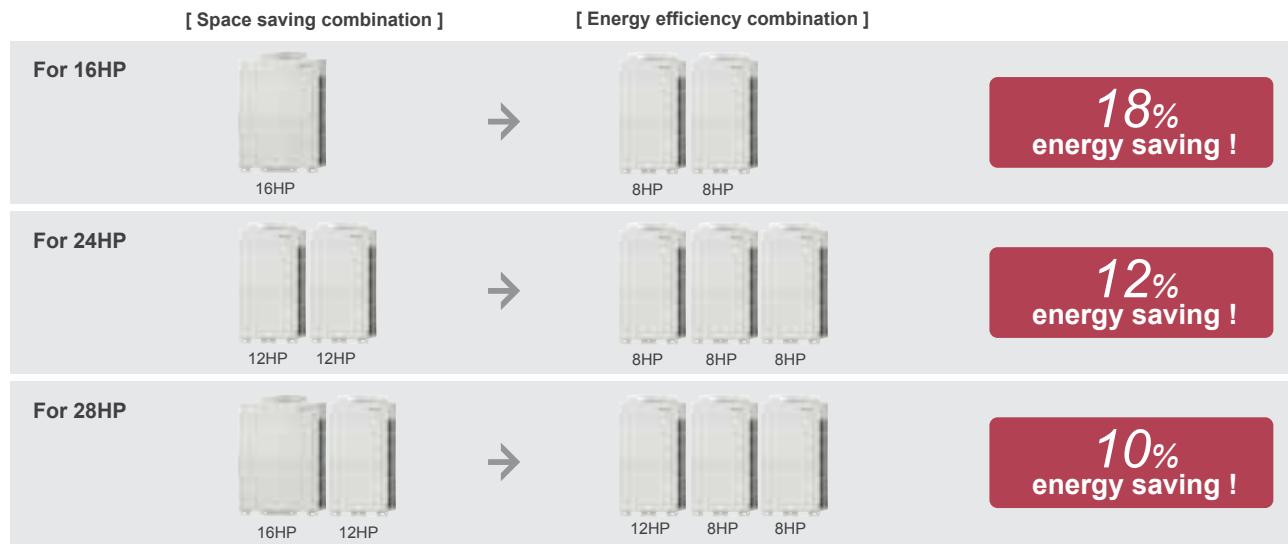

Energy saving technology that boosted operation efficiency

Energy Efficiency Combination

Choice of space saving or energy efficiency combinations

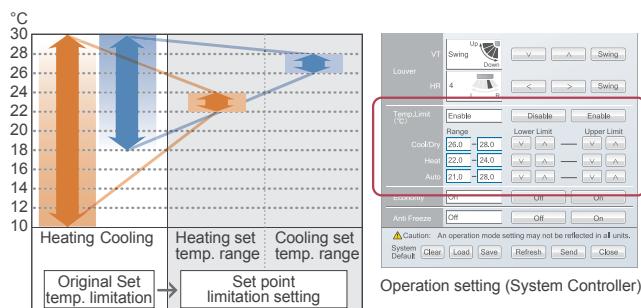

(Comparison of Average COP)

Various Energy Saving Features

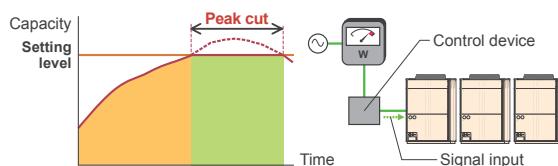

Room temperature set point limitation

The minimum and maximum temperature range can be set giving further energy saving while considering the comfort of the occupants.

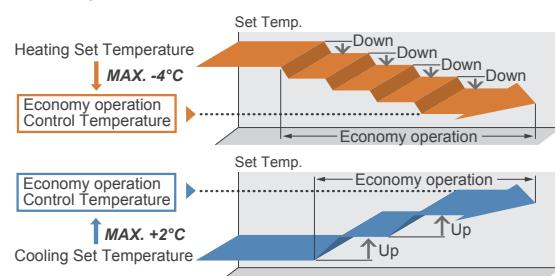

Peak cut operation

Operation capacity can be set in 4 steps for rated capability. The power consumption at peak is cut down and the maximum load is suppressed.

Economy operation

Economy operation can be set by remote controller. The temperature setting is offset automatically over a certain period of time.

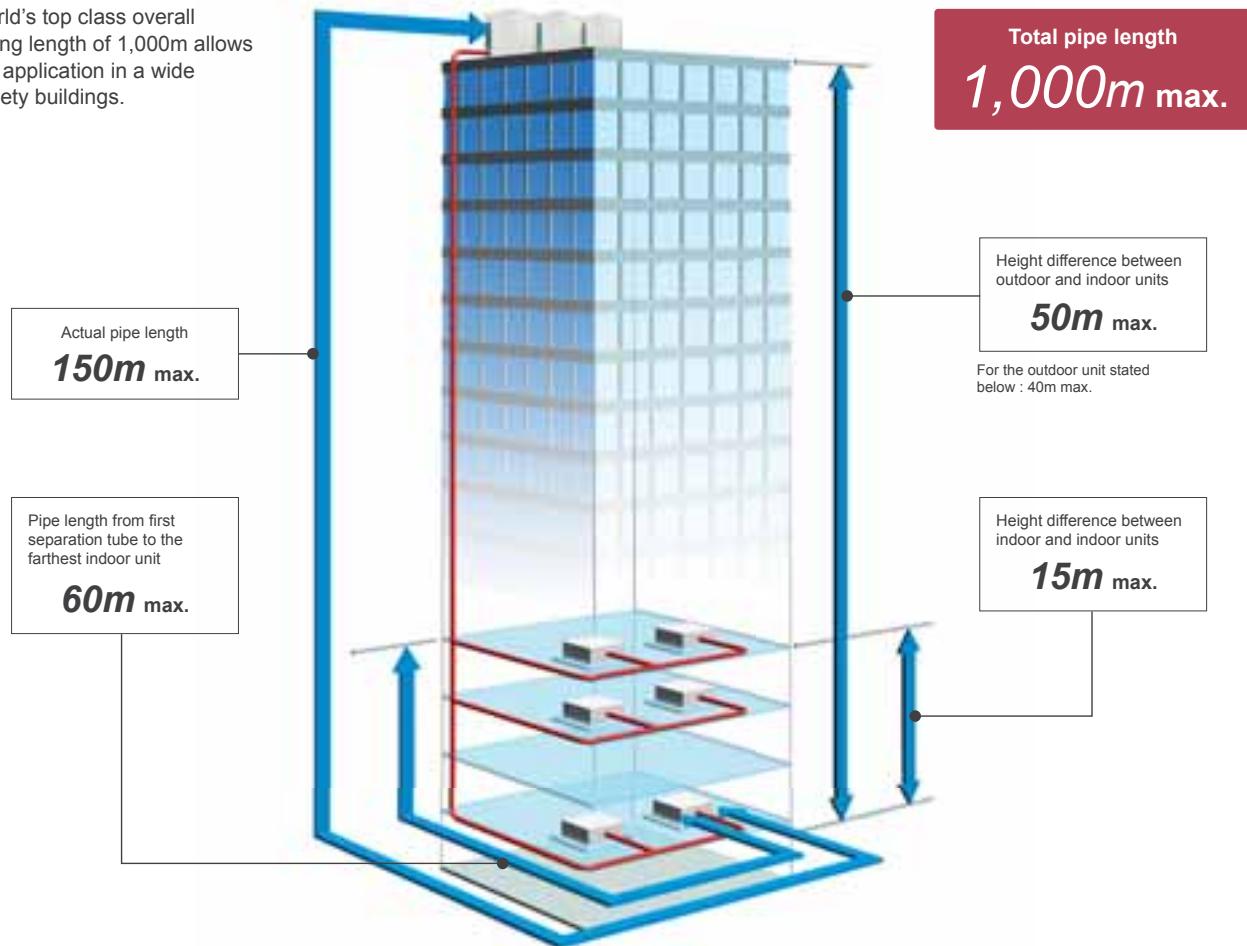

Auto-off timer

Each remote controller is equipped with an OFF timer function that automatically stops operation when a fixed time has elapsed from the start of operation. This prevents waste of energy.
(Note: Except simple remote controller)

Design Versatility

Overall piping length 1,000m

World's top class overall piping length of 1,000m allows for application in a wide variety buildings.

High static pressure of 80Pa

The outdoor unit can have a condenser hood easily connected with a static pressure of 80Pa standard. This allows outdoor units to be installed within plant rooms in high rise buildings.

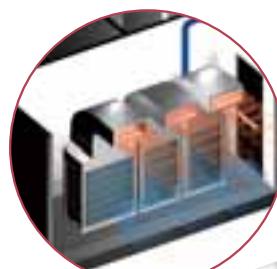

Powerful discharge with an external static pressure of 80Pa.

80Pa
as standard

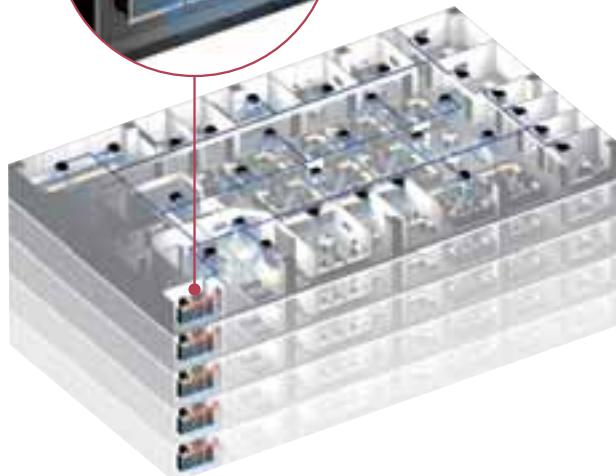

Previous model

V-II series

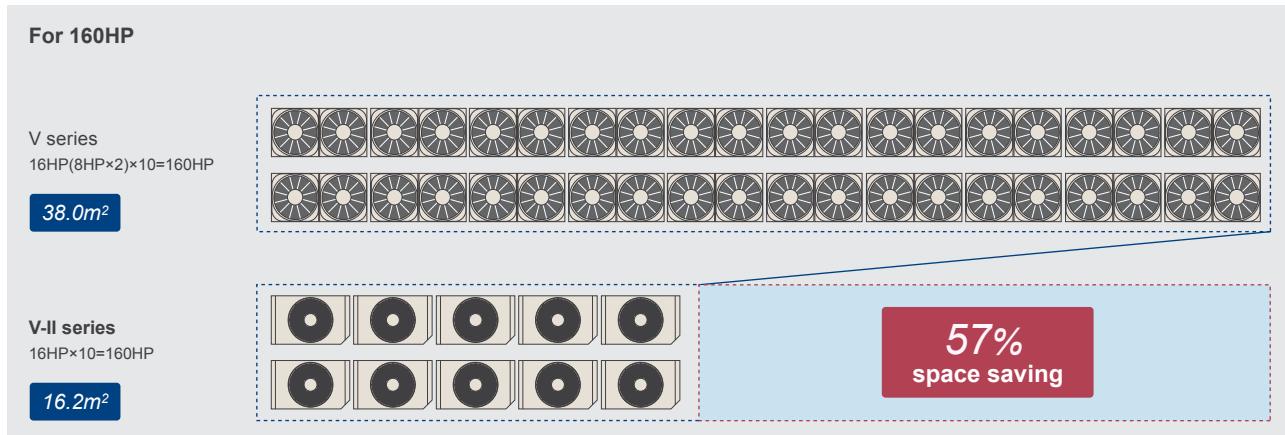

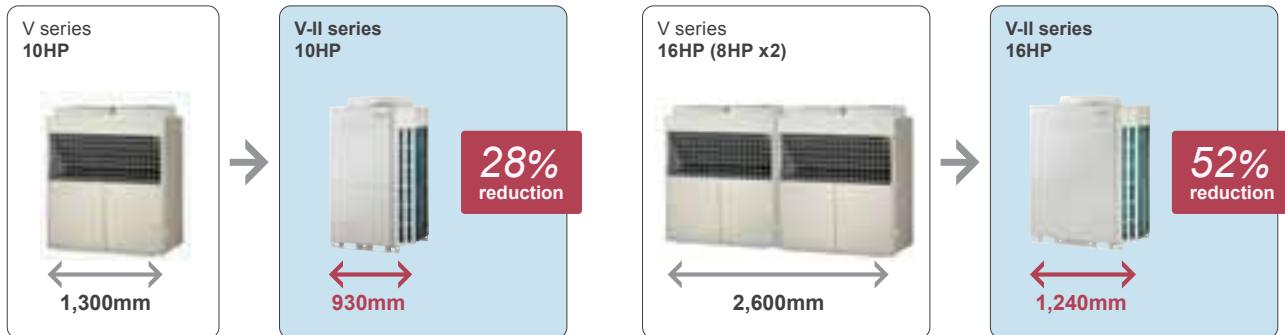

Installation Example

Large diameter fan and DC motor has been utilized allowing an external static pressure of 80Pa. This is approximately 2.6 times greater than the previous model.

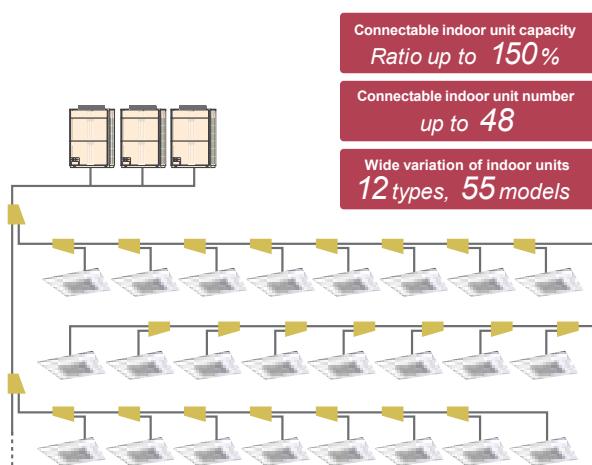

Space saving and compact size

Compact size has been achieved by significantly reducing the width of the outdoor units compared to previous models.

High capacity connection

Various combination from 8HP to 48HP with 2HP increments. 12 types, 55 models of indoor units can be selected ranging from 2.2kW to 25kW in capacity. A maximum of 150% indoor unit connectable capacity.

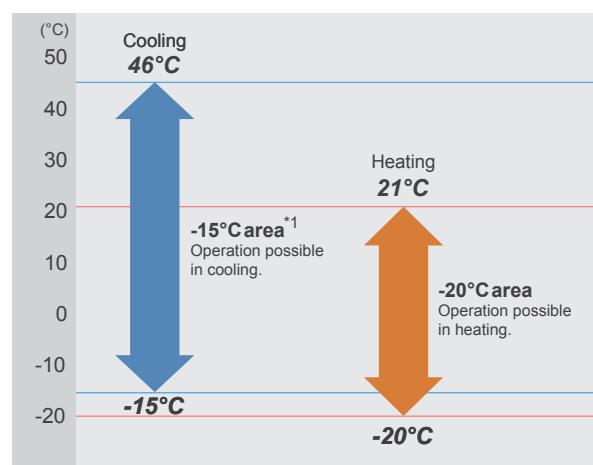

Note : when indoor unit connected capacity is greater than 100%, individual indoor units will operate at a slightly lower capacity when maximum capacity is required.

Wide operating range

Installation in extreme temperature conditions is possible due to an increase in operational range.

Cooling : -15°C~46°C

Heating : -20°C~21°C

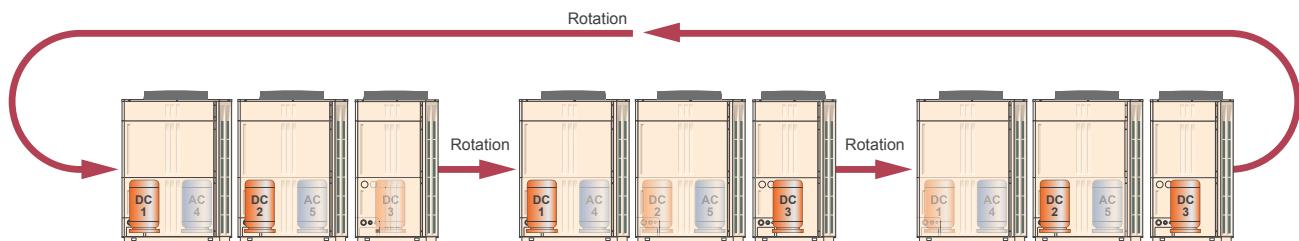

*1 Note : When a multiple outdoor unit connection is used, operating range is from -5°C to 46°C in cooling.

High Reliability

Life-extending operation

Outdoor unit operation rotation

The compressor starting order is rotated so that the running time is shared.

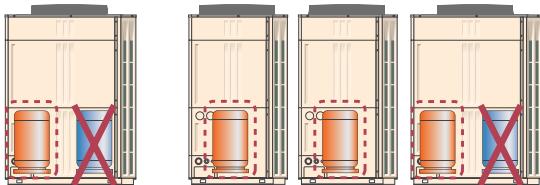

Note: The inverter compressors start in priority. Rotate operation is alternated by the start / stop timing of the compressors

Backup operation

If one of two compressors malfunctions, it will not affect the operation of the remaining outdoor units.

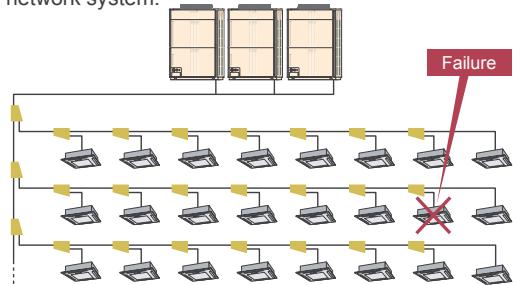

Outdoor Units

If one of compressors fails, backup operation will be performed by the remaining compressors as emergency.

Indoor unit continuous operation

Each indoor unit is controlled individually on the system network. This allows all indoor units to continue to operate unaffected even if an error should occur at any indoor unit's on the VRF network system.

Adoption of blue fin heat exchanger

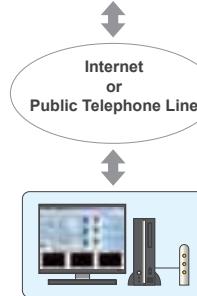

Corrosion resistant of the heat exchanger has been improved by the introduction of blue fin treatment to the outdoor unit's heat exchanger.

Remote monitoring

The Web Monitoring system allows you view system operation at all times over the internet ensuring trouble free operation.

Monitoring Side

VRF Network System Side

The operating VRF network system in the building can be monitored in real time over the Internet.

Easy Installation

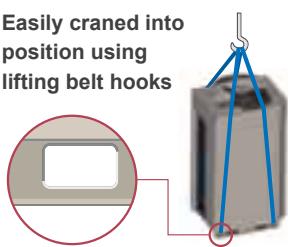

Easily transported

Light weight

20% weight reduction
(Than Previous model)

Note:
In the case of 14HP

Easily craned into position using lifting belt hooks

Design of outdoor unit allows for lifting straps to be used

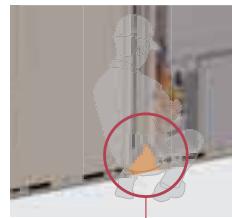

Transporting by forklift

Can be transported in a small elevator

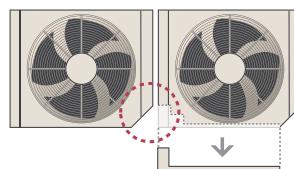

Easy access

By adopting a L-Shape front panel that can be removed, the work space for installation and service has been significantly expanded by this new design. For multiple installations, work is performed easily and efficiently even in a narrow space.

Expansion of work space

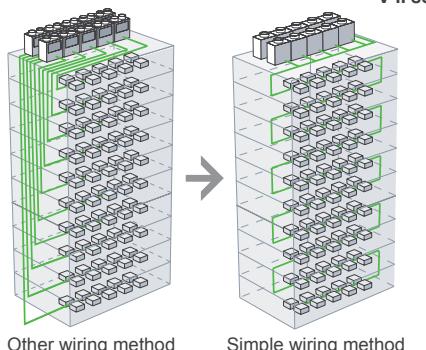

Simple signal line connection

Installation is made easier as the communications wiring can be connected continuously to any component.

Up to maximum length 3,600m

V-II series

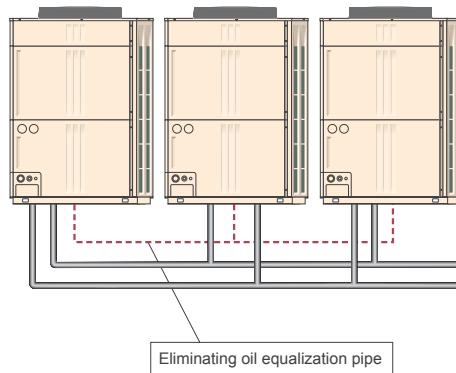

Other wiring method

Simple wiring method

Note: In a multiple refrigerant system installation, Automatic addressing sequence cannot be initiated

Easy piping connection

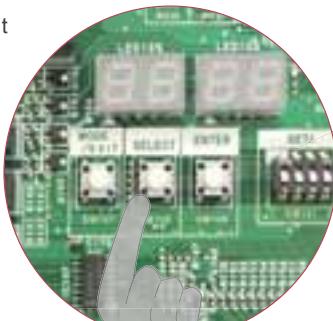

The need for a oil equalization pipe as required on the previous model has been removed. The installation costs have been reduced by employing a simple 2 pipe connection

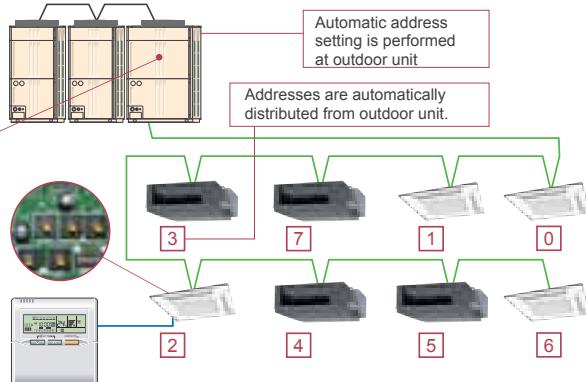

Eliminating oil equalization pipe

Automatic address setting

The address of each indoor unit can be automatically set by button switch of outdoor unit.

Press the pushbutton switch of outdoor unit.

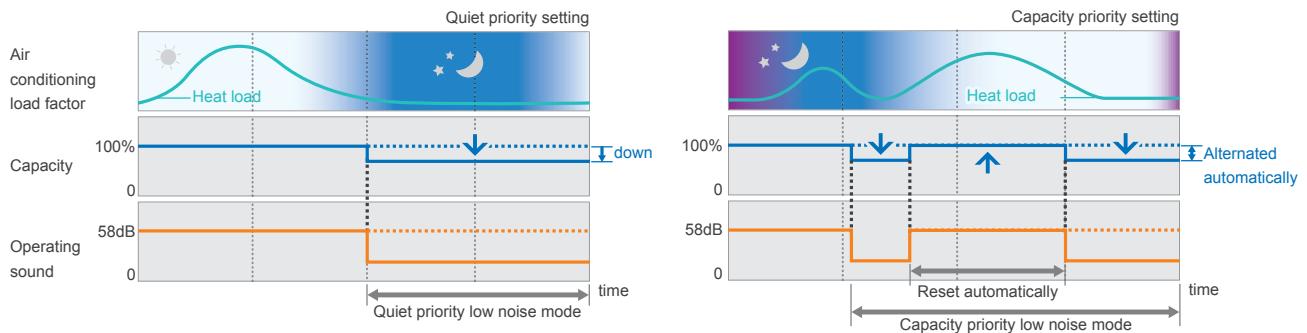

Manual address setting from indoor unit and remote controller is also possible.

Comfort and Convenience

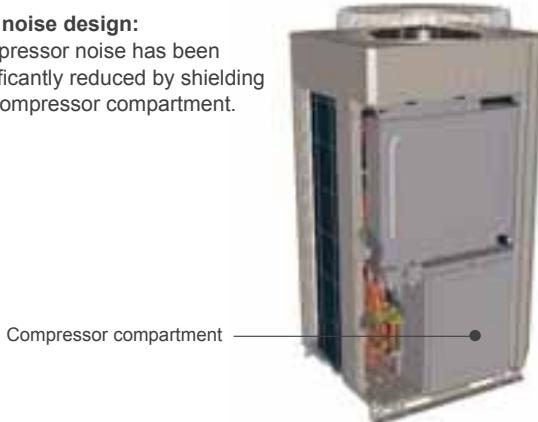

Quiet operation

Low noise mode: Two low noise modes can be selected automatically by quiet priority setting and capacity priority setting depending on the usage environment and outside temperature load.

Low noise design:

Compressor noise has been significantly reduced by shielding the compressor compartment.

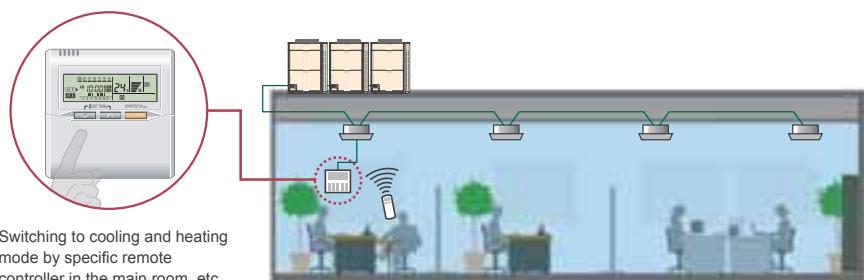

Indoor unit: Low noise indoor unit lineup

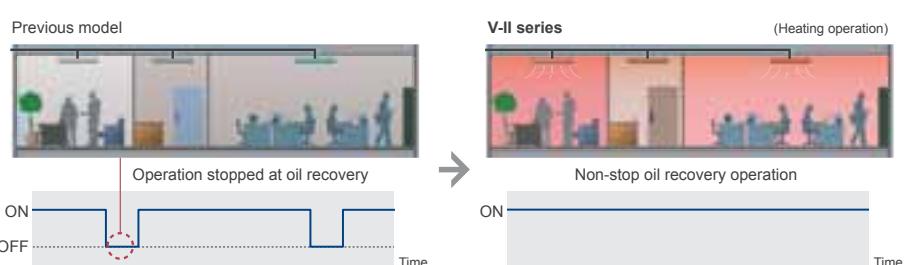

Auto changeover function

Auto changeover setting allows for the product to easily switch between cooling and heating modes regardless of the operation mode of other indoor units. This can be done via specific indoor unit with wired remote controller. This ensures comfortable operation all year round.

Non-stop oil recovery operation

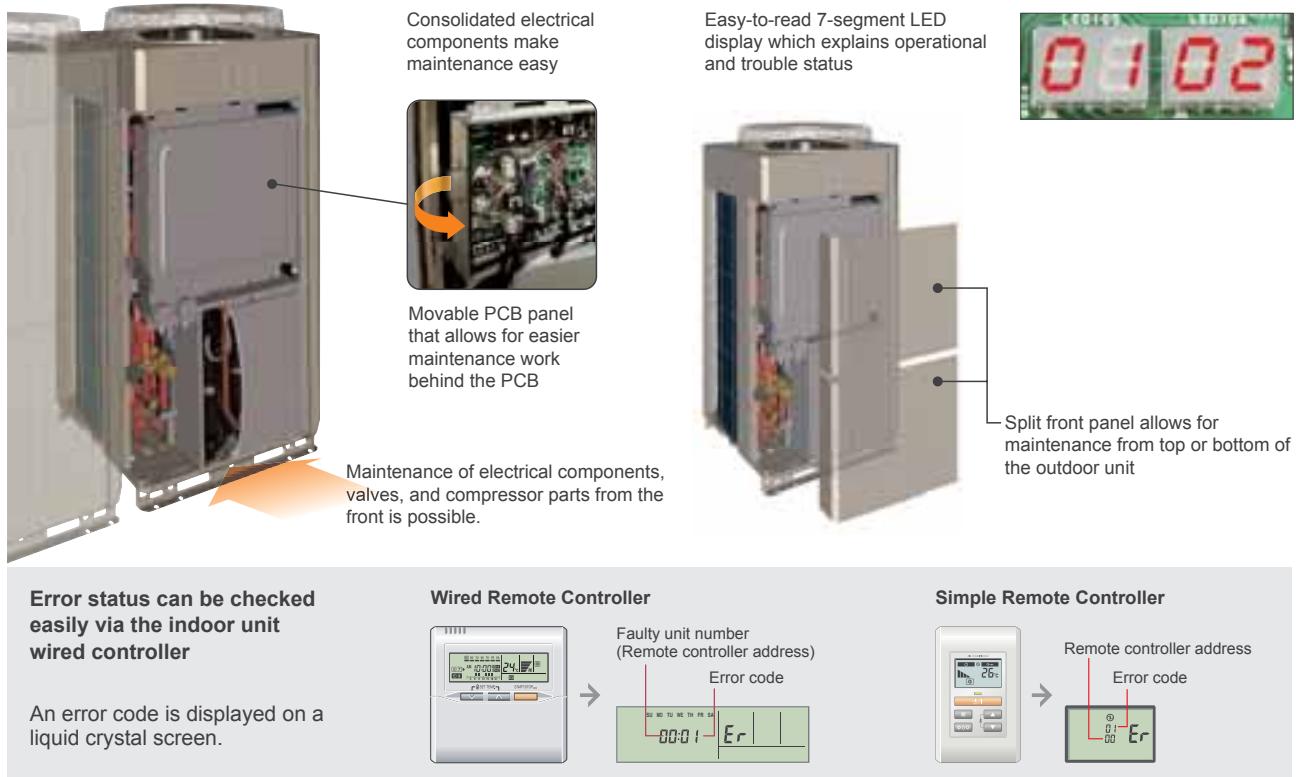

A comfortable room condition is maintained during oil recovery mode because the product continues to operate without stopping the cooling or heating operation.

Easy Service & Maintenance

Design for easy service and maintenance

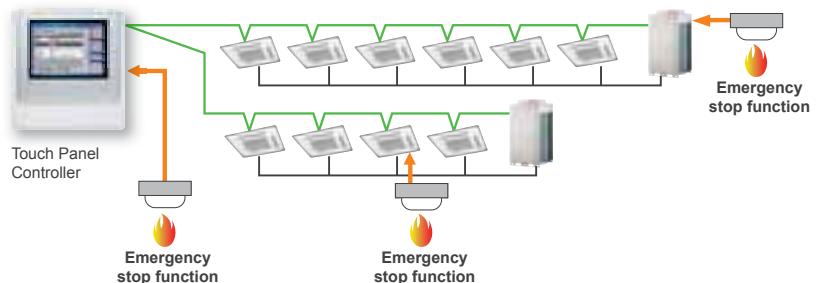

Inspection and replacement of main parts is easier due to innovative construction and an LED operational display.

Emergency stop function

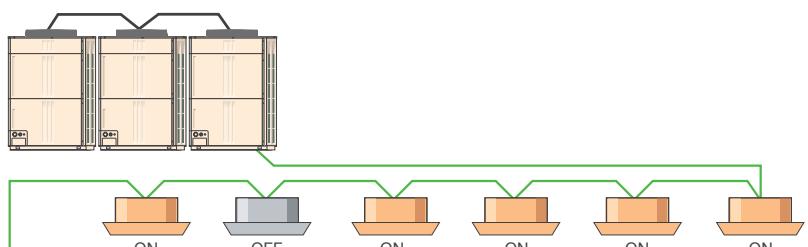

Emergency alarm can be received by indoor, outdoor units or Touch Panel Controller when they received it, all units will be stopped.

Note:
In case of received Emergency alarm by indoor/outdoor unit:
All units connected within same refrigerant system will be stopped. Touch Panel Controller: all unit connected within VRF network system with Touch Panel Controller will be stopped.

Continuous operation during maintenance

Non-stop operation: When servicing a specific indoor unit, maintenance can be performed even without turning off the other indoor units.

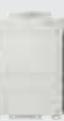

Outdoor units lineup

•Combinations other than the followings are not recommended.

Note : Specifications are based on the following conditions.
 Cooling : Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB.
 Heating : Indoor temperature of 20°CDB / (15°CWB), and outdoor temperature of 7°CDB / 6°CWB.

Pipe length : 7.5 m; Height difference between outdoor unit and indoor unit : 0 m.
 When cooling operation will be conducted at outdoor air temperature below -5°C, the outdoor unit must be installed in a position that is higher than or equal to those of indoor units.

*1 Minimum connectable indoor unit number is 2.

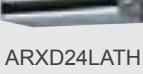

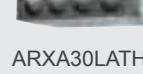

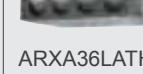

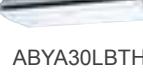

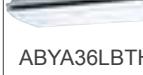

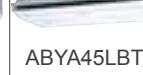

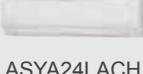

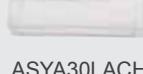

However ARXC72 and ARXC90 can be used signal connection.

*2 The noise value is the value when measured in an anechoic room.

When measured in the actual installed state, surrounding noise and reflections are received and the measured value is usually larger than the indicated value.

*1 "Master control" setting is not available for this model.

*2 This function is available only through external input. control.

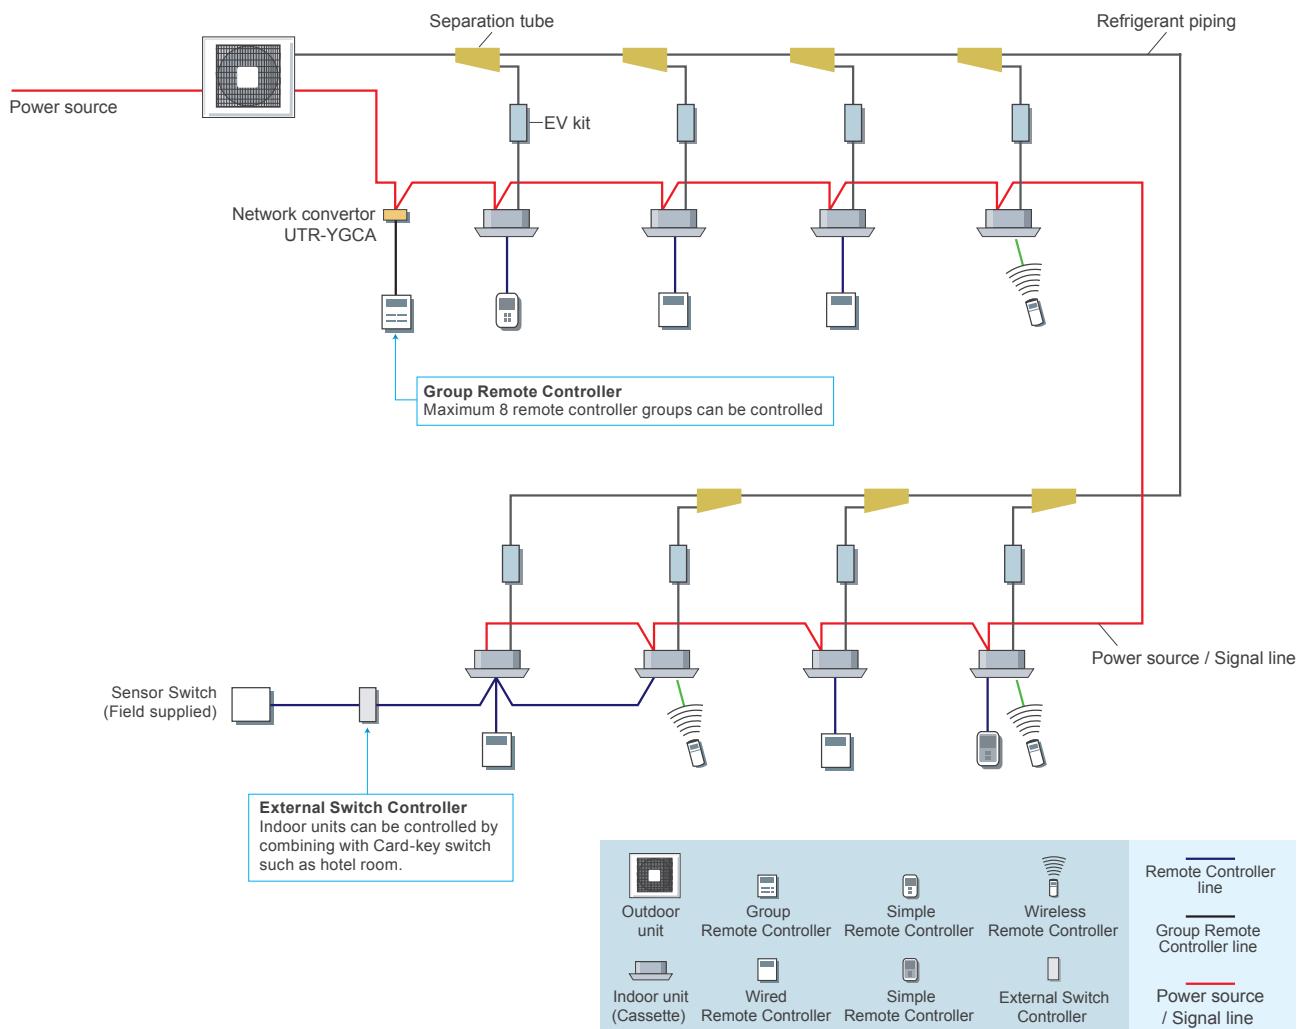

System function

Five types of controllers are available to meet the varied needs of the building and the user. Tighter control over the air conditioned environment can be achieved by combining group remote controller which can operate all the indoor units at the same time, a wired remote controller with a weekly or daily schedule, a wireless remote controller and a simple remote controller.

System diagram

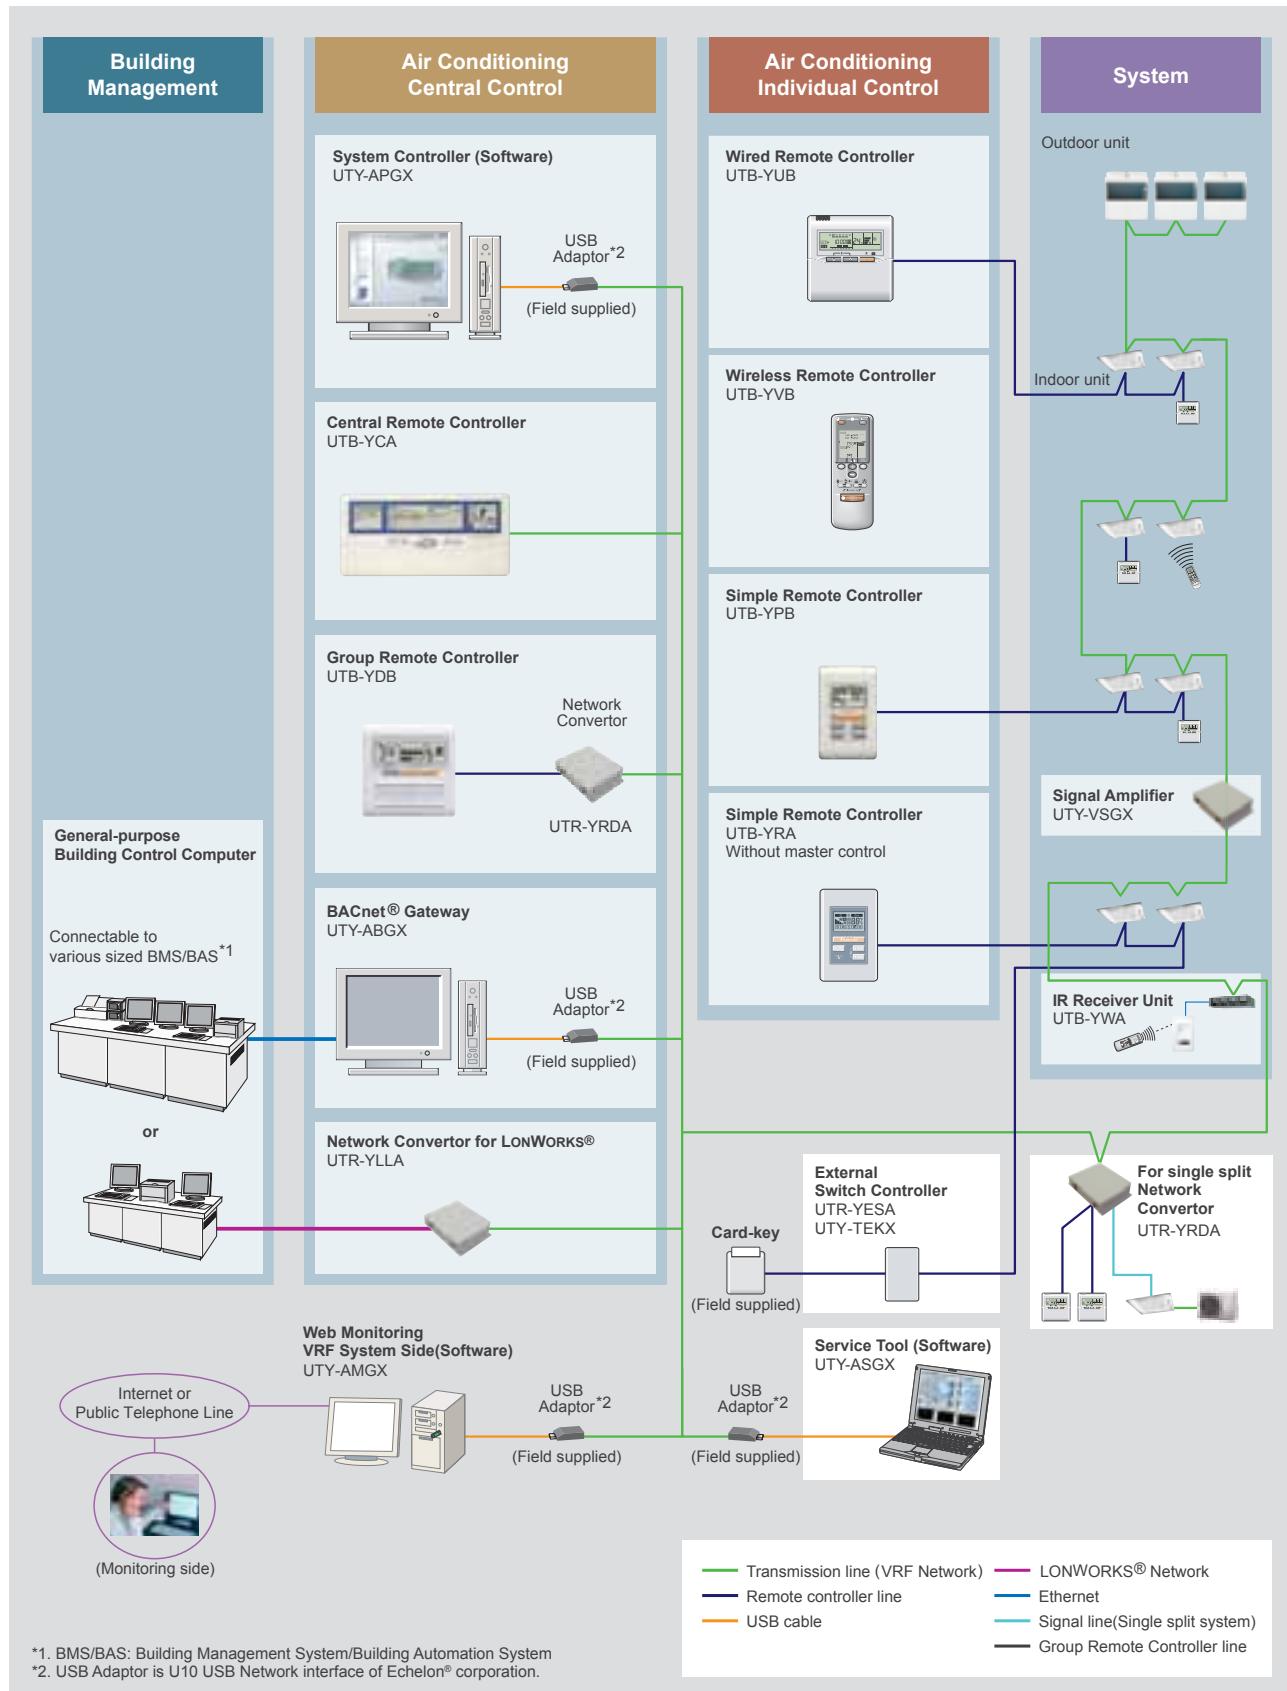

Max. connectable indoor units	Max. piping length	Max. total signal line
8 indoor units	70m	150m

Control Systems for S series

System diagram

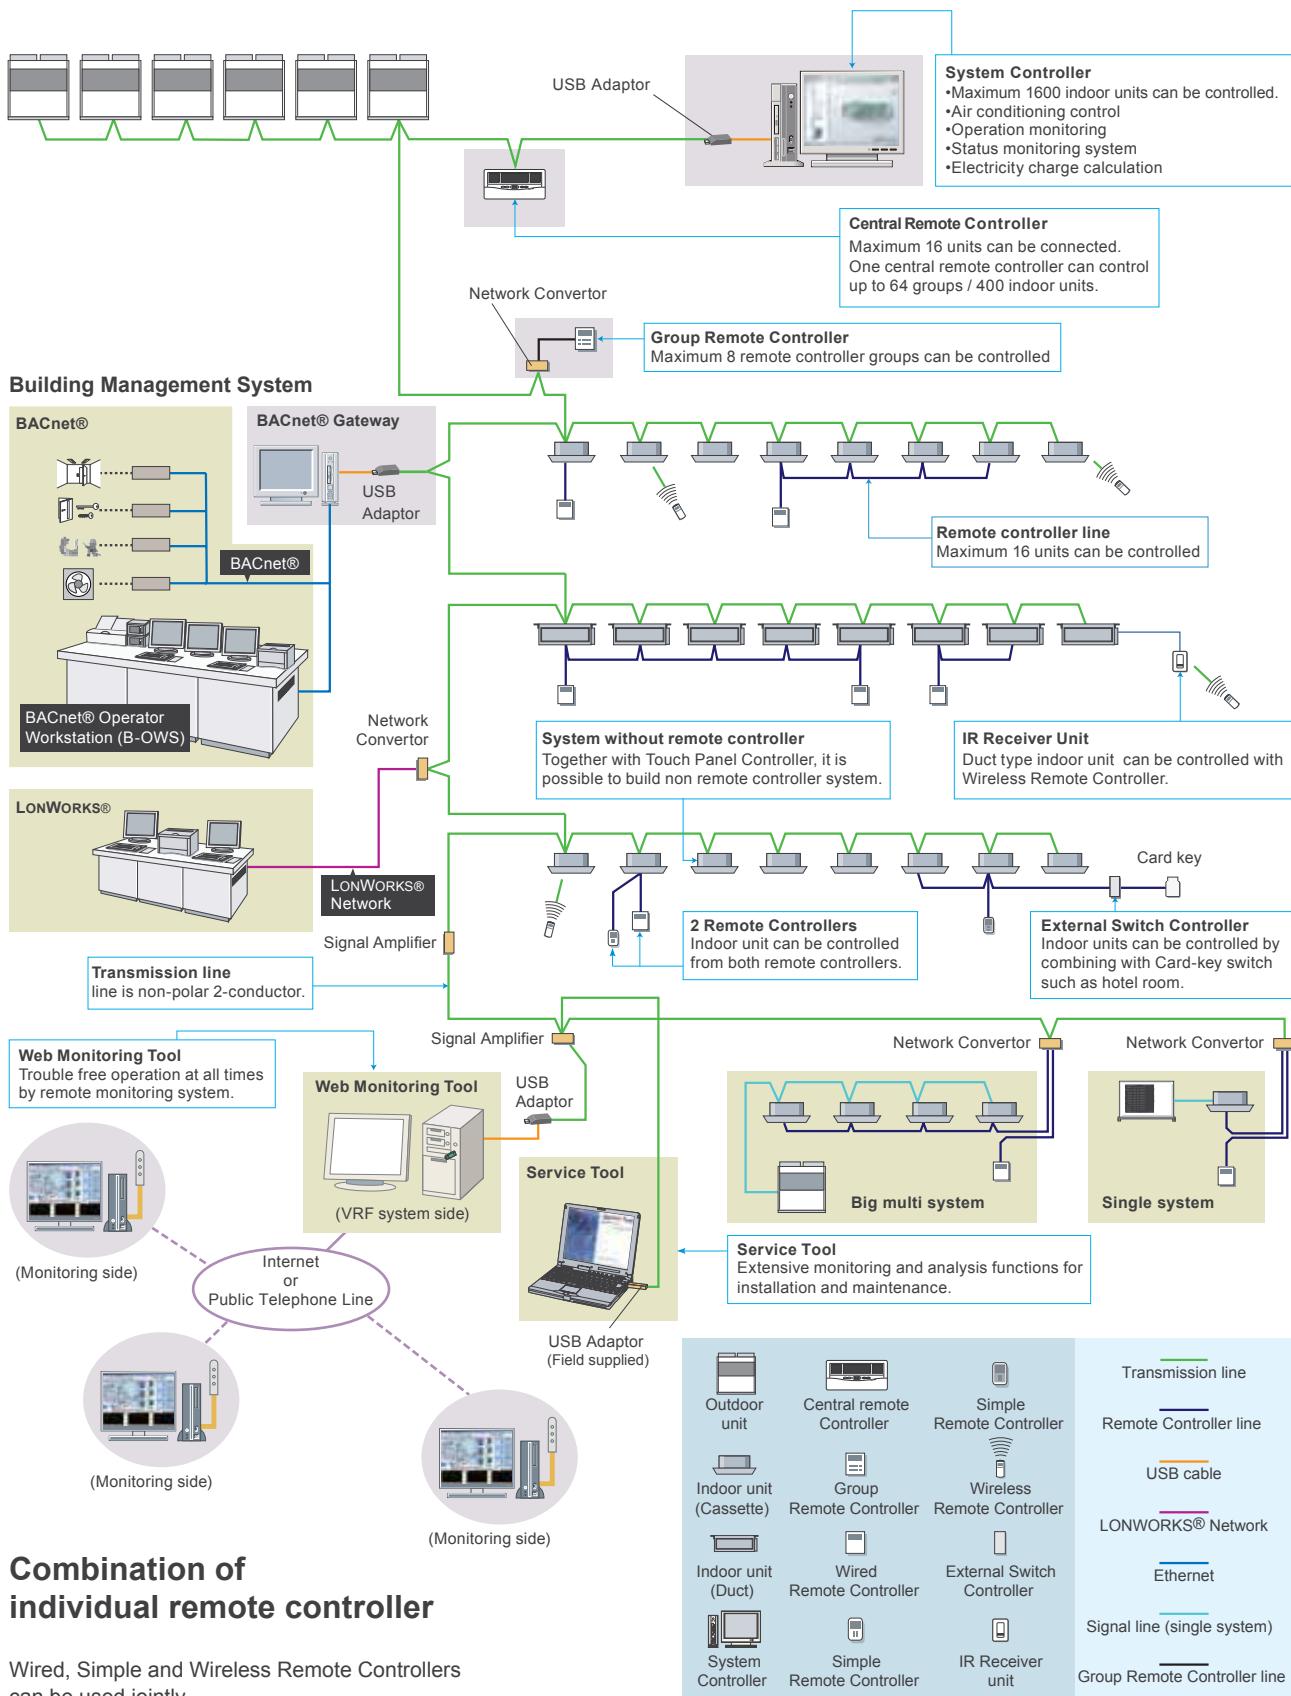

It supports every user's needs by offering a variety of control systems available, such as individual control, central control and building management system control options

Wiring system

Max. transmission line length
2,000m

- Wiring construction of the control system is made of power source wiring, transmission wiring and remote controller wiring.
- Total wiring length (total length of transmission line) can be extended up to 2000m (by using signal amplifiers).

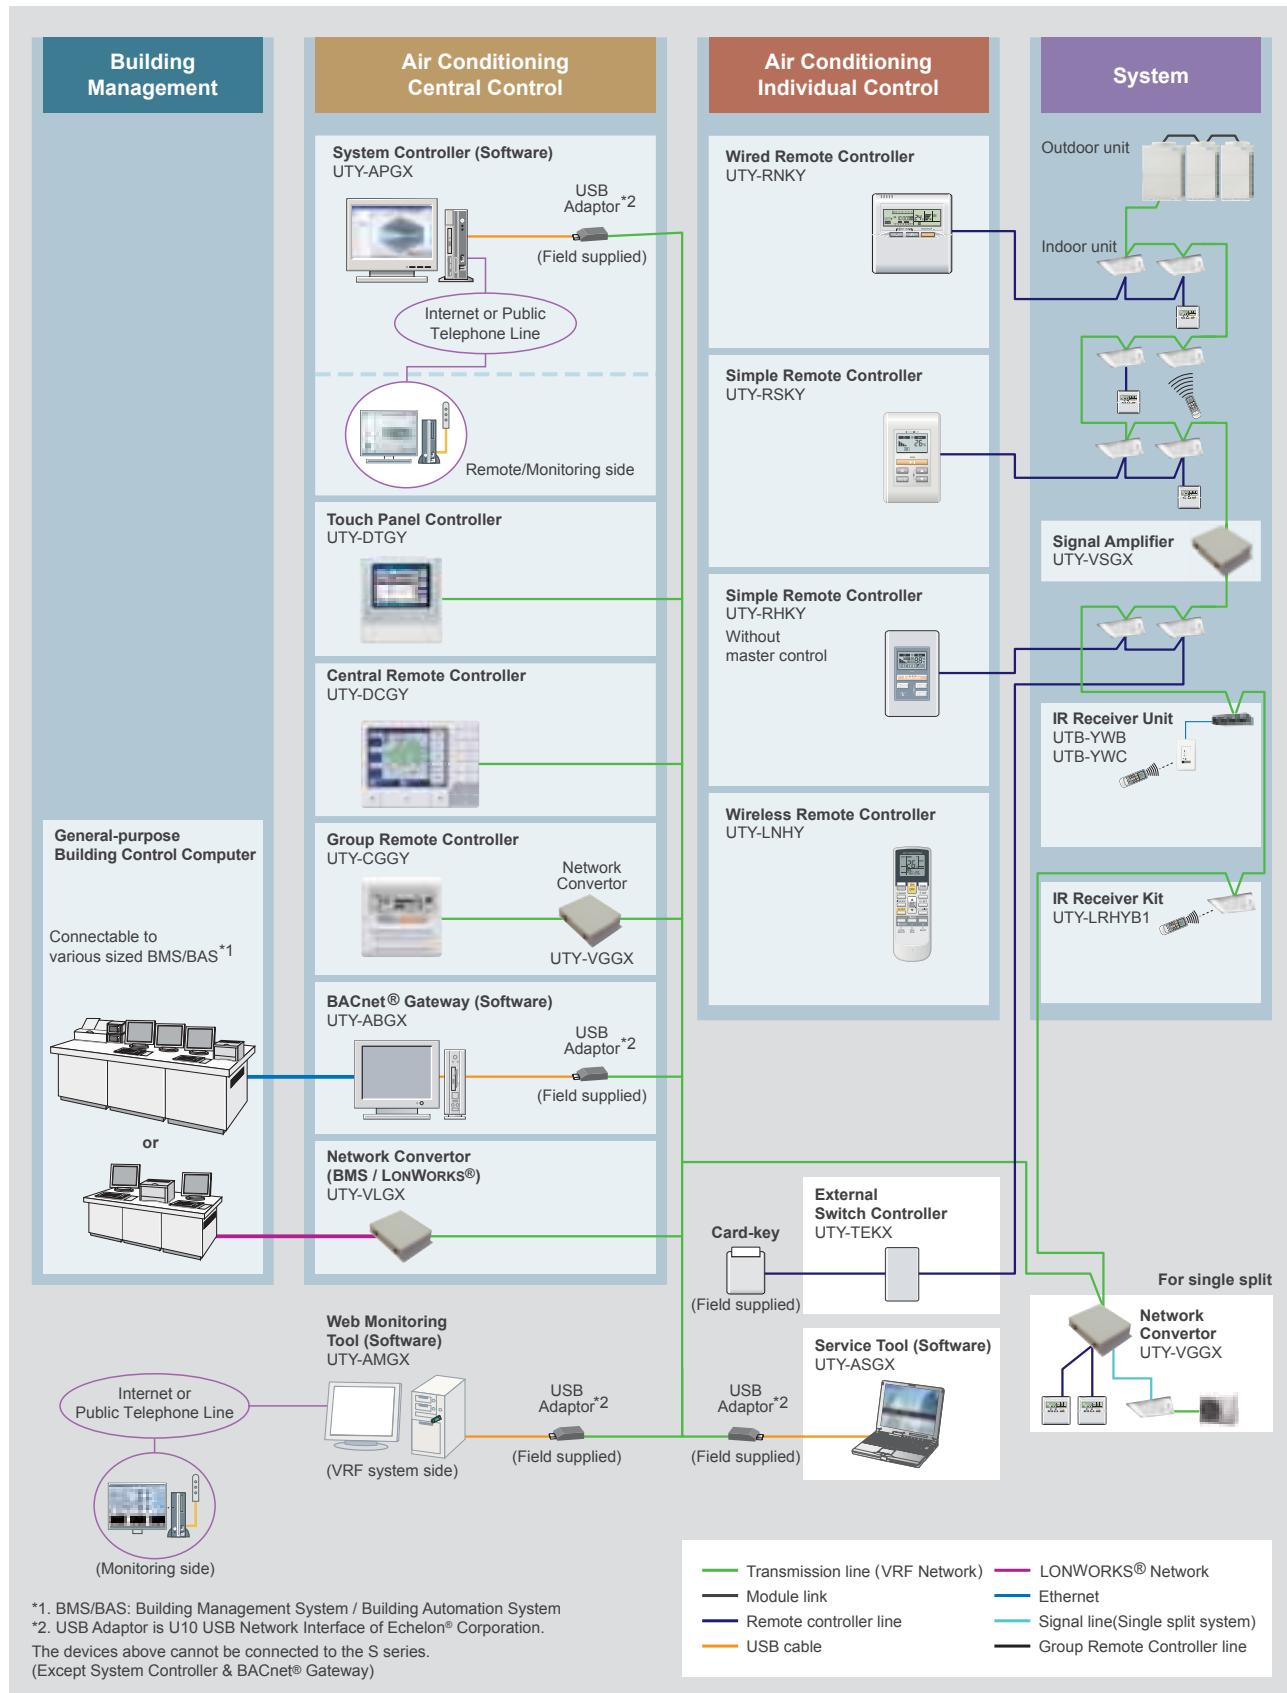

Combination of individual remote controller

Wired, Simple and Wireless Remote Controllers can be used jointly.

Control Systems for V-II series

System diagram

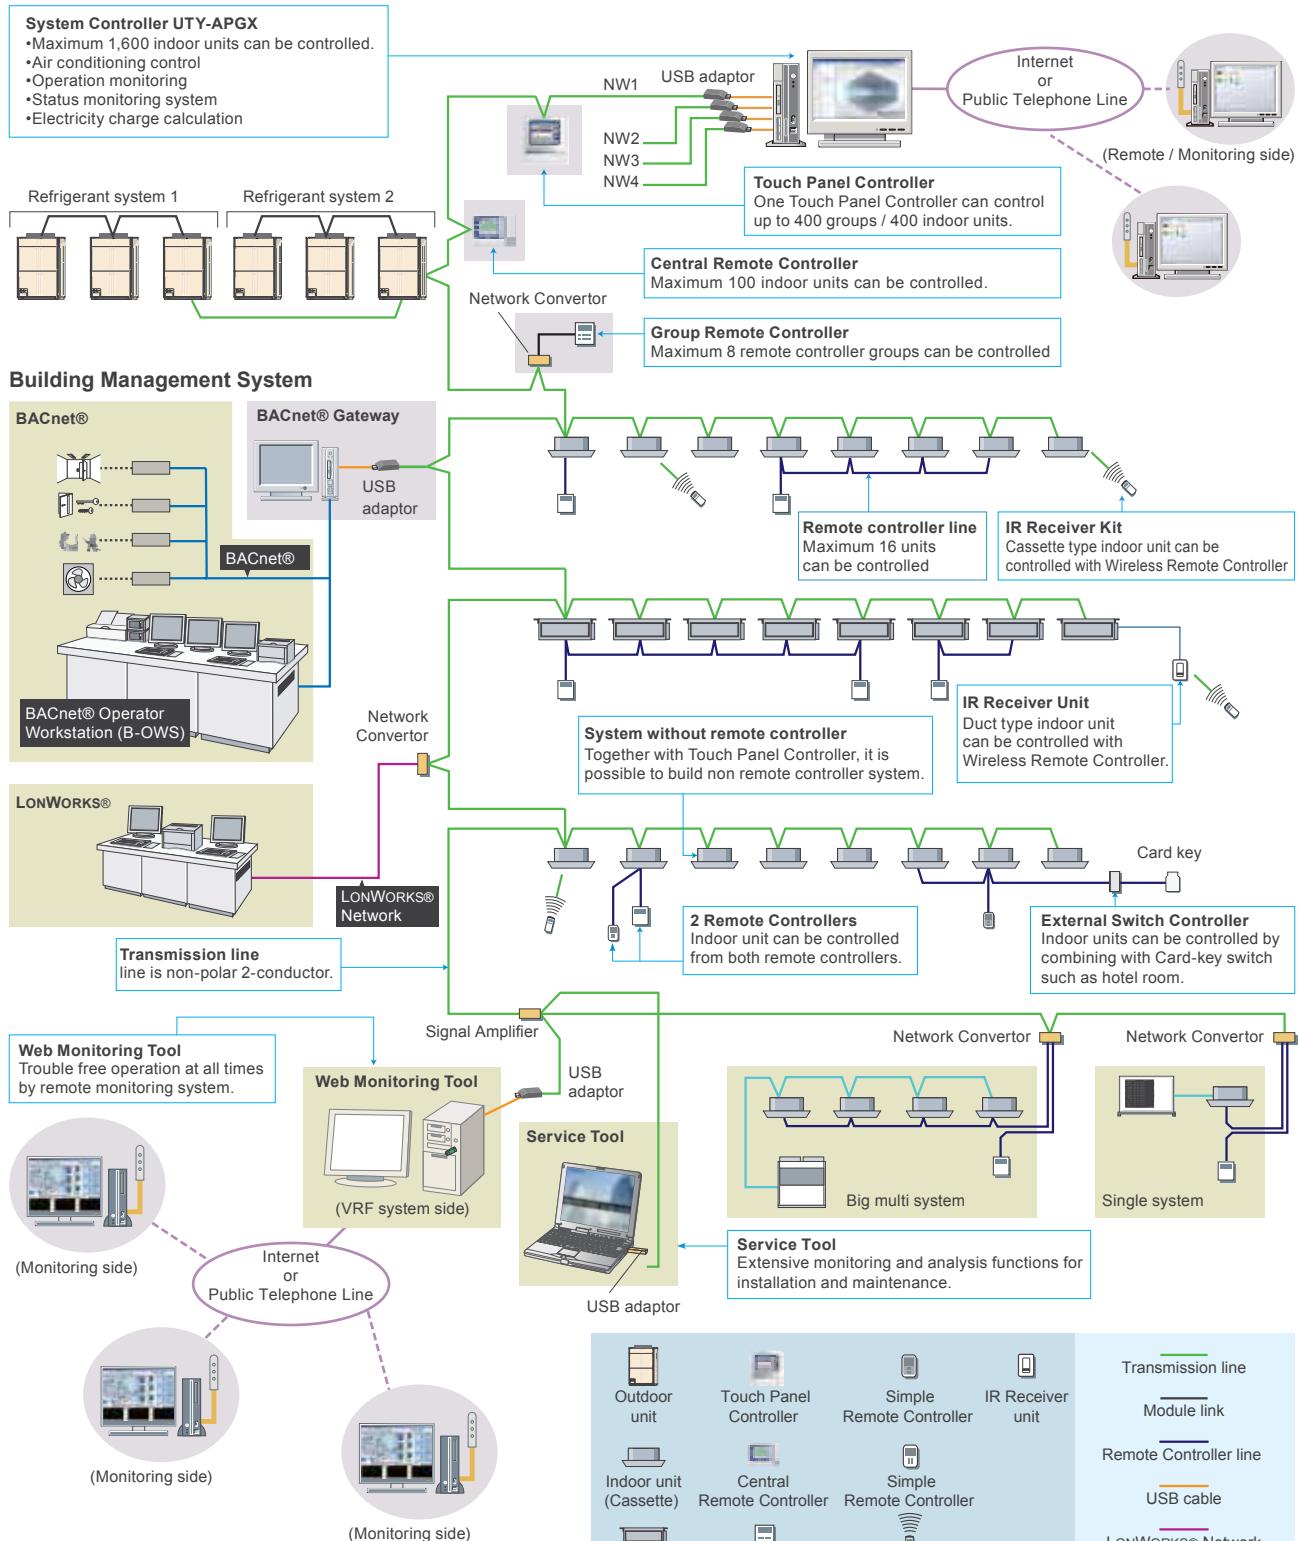

The V-II system supports every users needs by offering a variety of Control systems, including individual control, central control and building management control options.

Wiring system

Max. transmission
line length
3,600m

- Wiring construction of the control system is made of power source wiring, transmission wiring and remote controller wiring.
- Total wiring length (total length of transmission line) can be extended up to 3,600m (by using signal amplifiers).

Combination of individual remote controller

Wired, Simple and Wireless Remote Controllers can be used jointly.

Controller

Wired Remote Controller

UTB-YUB/UTY-RNKY

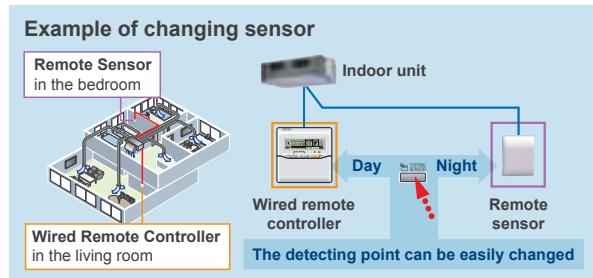

- The room temperature can be controlled by detecting the temperature accurately from the built-in sensor
- Simple operation with Built-in Weekly / Daily Timer.
 - Control up to 16 indoor units.
 - Up to 2 wired remote controllers can be connected to a single indoor unit.

Max. controllable
16
indoor units

Accurate and comfortable

Indoor temperature can be detected accurately by the inclusion of a thermo sensor in the body of the wired controller. This new wired remote controller and the optional remote sensor allows flexibility in sensor location, suitable for all requirements.

Displayed temperature is set temperature.

Built-in timers

- Weekly timer:** Possible to set ON/OFF time to operate twice each day of the week.
Setback timer: Possible to set temperature for two times spans and for each day of the week.
At "Weekly timer" + "Set back timer" setup

Diagnosis check function

Two methods are available for determining the cause of failure in the event of a malfunction occurs:

Simple installation

Components are compatible with standard switch boxes. Flat back surface allows to be installed wherever it is needed.

Simple Remote Controller

UTB-YPB/UTY-RSKY

UTB-YRA/UTY-RHKY (Without master control)

Compact remote controller provides access to basic functions

- Up to 16 indoor units can be controlled with one remote controller.
- Suitable for hotels or offices as it is easily operated with no complex functions.

Max. controllable
16
indoor units

UTB-YPB/UTY-RSKY UTB-YRA/UTY-RHKY
Without master control

User-friendly operation

- A large On / Off button is provided in the centre of the remote controller for easy operation.
- Background light enables easy operation in a darkened room.
- Following an error display, diagnostics can be carried out on the controller.

Functions

Model	UTB-YPB/UTY-RSKY	UTB-YRA/UTY-RHKY
On / Off	●	●
Fan control	●	●
Master control	●	— *1
Room temp. setting	●	●

*1: "Master control" setting is not available. It is recommended to use together with other type controller.

Specifications

Model name	UTB-YUB/UTY-RNKY	UTB-YPB/UTY-RSKY	UTB-YRA/UTY-RHKY
Power Source	DC 12V	DC 12V	DC 12V
Dimensions (H x W x D) (mm)	120 x 120 x 17	120 x 75 x 14	120 x 75 x 14
Weight (g)	160	90 (100 : UTY-RSKYT)	90 (100 : UTY-RHKYT)

DC12V is supplied by the indoor unit.

Wireless Remote Controller

UTB-YVB/UTY-LNHY

Simple and sophisticated operations
with a choice of 4 daily timers

- A single controller controls up to 16 indoor units.

Max. controllable
16
indoor units

Selectable
4
daily timers

UTB-YVB

UTY-LNHY

Built-in timers

Select from 4 different timer programs:

On / Off / Program / Sleep

Program timer: The program timer operates the ON and OFF timer once within a 24 hour period.

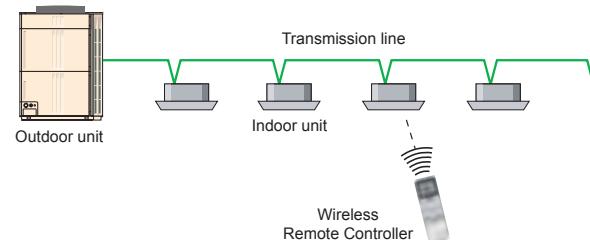

Sleep timer: The sleep timer function automatically corrects the set temperature according to the time setting to prevent excessive cooling or heating during sleep hours.

Easy installation and operation

- Code selector switch prevents indoor unit mix-up. (Up to 4 codes can be set.)
- Wide and precise transmitting range.

System addressing

During installation work, system addressing can be performed using the Wireless Remote Controller, thus eliminating manual switch setting.

IR Receiver Unit

UTB-YWA/UTB-YWB/UTB-YWC

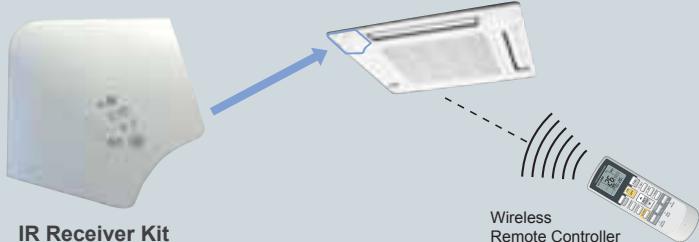

Necessary to control for all duct type by
Wireless Remote Controller

IR Receiver Kit

UTY-LRHYB1

Cassette type indoor unit can be controlled
with Wireless Remote Controller

Specifications

Model name	UTB-YVB/UTY-LNHY	UTB-YWA/UTB-YWB/UTB-YWC	UTY-LRHYB1
Battery	1.5V (R03 / LR03 / AAA) x 2	DC 12V	DC 12V

Weight (g)	70	150	140

Controller

Group Remote Controller

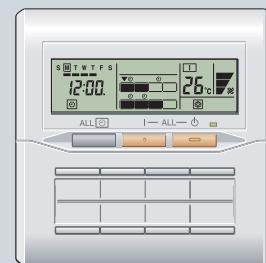

UTB-YDB / UTY-CGGY

Group control of indoor units with simple operation

- Up to 8 remote controller groups can be controlled by one Group Remote Controller.
- Up to 64 Group Remote Controllers can be connected in one VRF network system.
- Network Convertor is required to connect Group Remote Controllers to a VRF network system.
(Network Convertor allows up to 4 Group Remote Controllers)

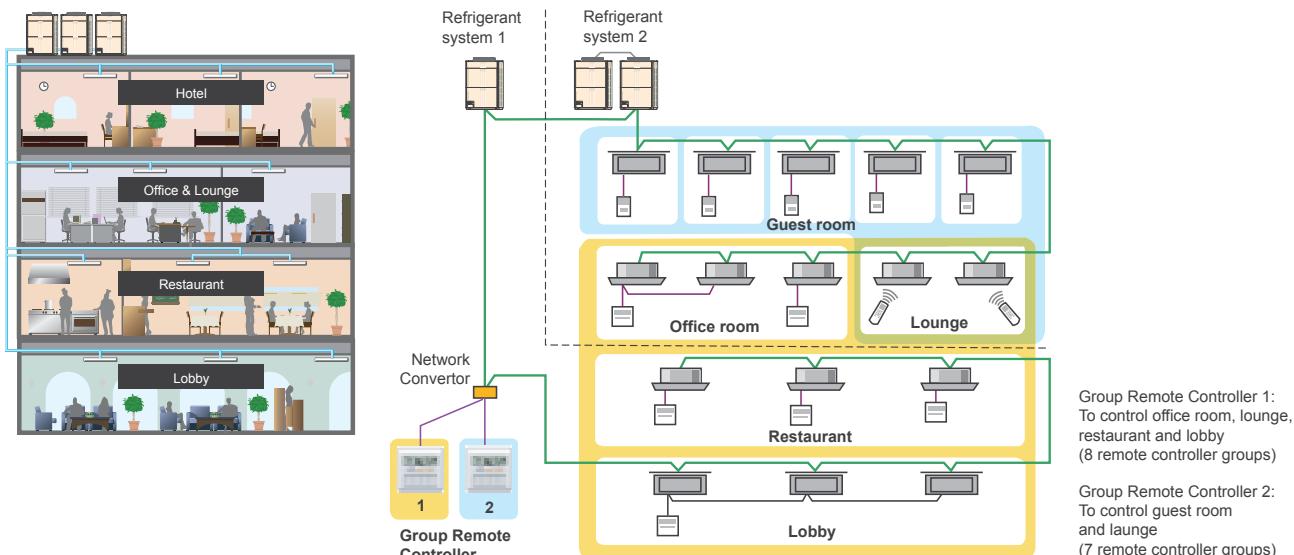

Max. controllable
64
group R.C. in a VRF
network system

Max. controllable
8
remote
controller groups

Control up to 8 remote controller groups

- Single Group Remote Controller controls and monitors up to 8 remote controller groups.

High performance and compact size

ON / OFF, Operating mode, Room temperature and Fan speed setting can be controlled / monitored centrally or individually.

Built-in weekly timers

The weekly timer is provided as a standard function.

- The timer can be set up for up to 4 times per day. (On / Off, operating mode, set temperature)
- Allows separate settings for each day of the week.

Specifications

Model name	UTB-YDB / UTY-CGGY
Power Source	DC 12V
Dimensions (H x W x D) (mm)	120 x 120 x 17
Weight (g)	200

DC12V is supplied by a network converter.

Central Remote Controller

UTY-DCGY

Central control of small- and medium-sized buildings and tenants.

- Individual control and monitor of 100 indoor units
- 5 inch TFT color screen
- User friendly view and easy operation
- External input / output contact
- Detachable power supply unit
- Corresponds to 7 different languages like English, Chinese, French, German, Spanish, Russian, Polish.

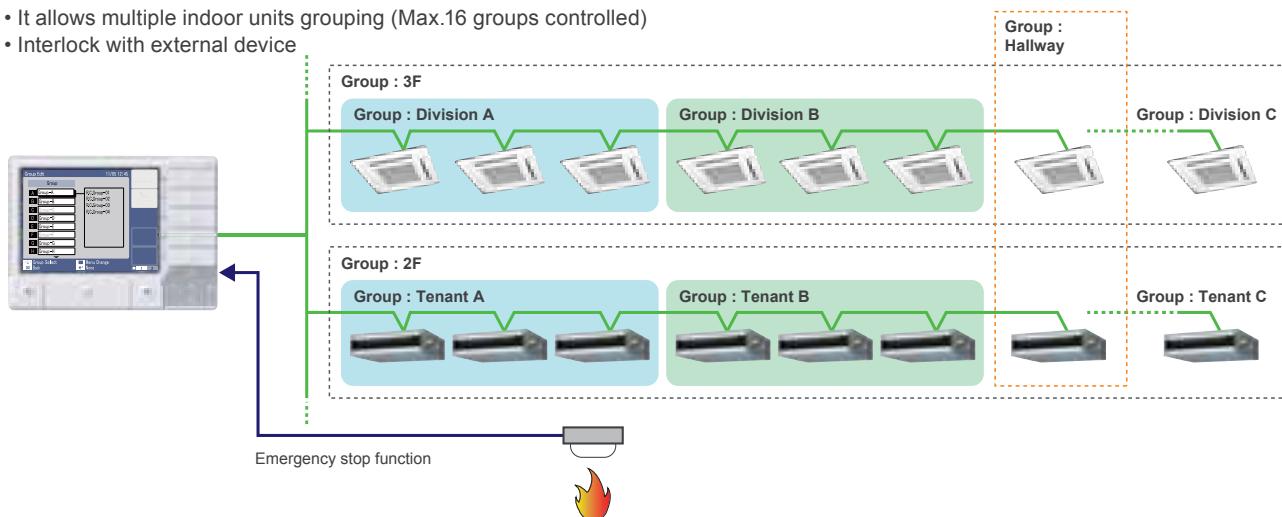

Max. controllable
100
Indoor units

Max. controllable
16
groups

System overview

- It allows multiple indoor units grouping (Max.16 groups controlled)
- Interlock with external device

Easy Installation

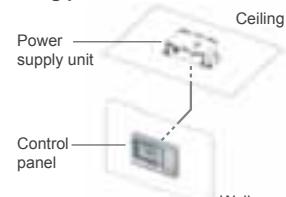

- The control panel and power supply unit can be installed separately.
- For flexibility in installation, the Control panel can be built into the wall or fix on the wall.

Setting pattern 1

Control panel + Power supply unit

Setting pattern 2

Functions

- Diverse control of indoor units
- Automatic clock adjustment
- Weekly timer
- Error history

PACKING LIST		
Packing List	Control Panel / Power Supply Unit / Connecting cable, etc.	

Controller

Central Remote Controller

UTB-YCA

- Functionality in a compact housing with built-in weekly timer
- Up to 400 indoor units / 400 remote controller groups / 64 groups can be controlled by one system.
 - Up to 16 central remote controllers can be connected into one system allowing operation and monitoring to be achieved from the central control room, at each floor, by each tenant, or in the plant room.

Max. controllable
400
indoor units

Max. controllable
400
remote controller groups

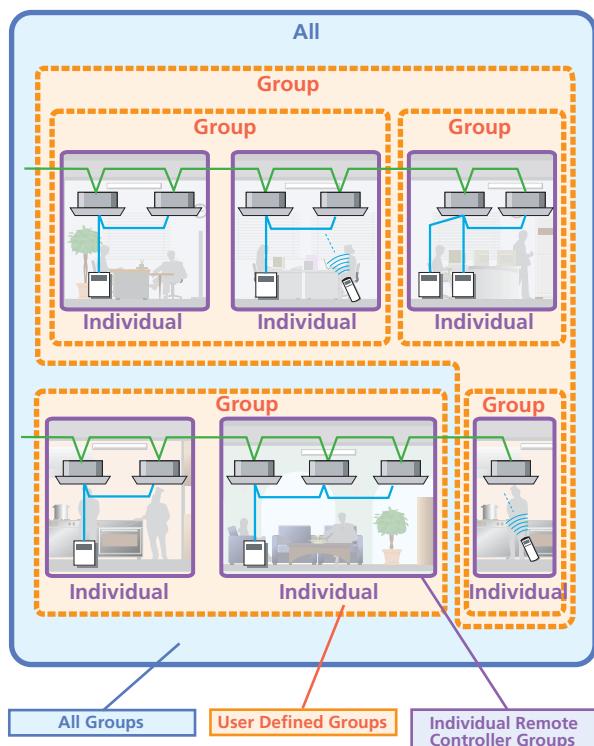

Max. controllable
64
groups

Control up to 400 indoor units

- The central remote controller performs system control after you select All Groups, User Defined Groups, or Individual Remote Controller Groups.
- Accurate control of functions such as Start / Stop, Operating Mode, Temperature, and Air Velocity ensures occupancy comfort.

Controllable method

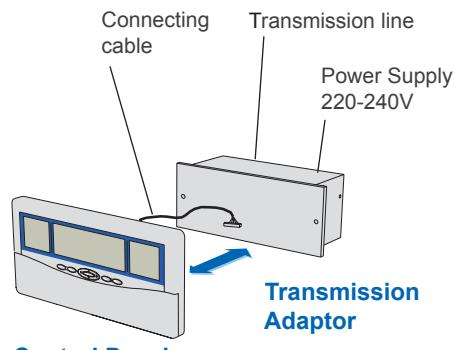

Central control

Any of 6 functions of the individual remote controller can be locked from the Central Remote Controller: all functions, timer mode, operating mode, temperature setting, filter reset, on/off. All functions can be controlled via the Central Remote Controller only.

Easy Installation

- The controller can be installed on any flat surface.
- The control panel and transmission adaptor can be installed separately.
- For flexibility in installation, the main unit can be built into the wall or exposed.

Functions

- Built-in weekly timer
- Memory functions
- Error display

Specifications

Packing List	Control Panel / Transmission Adaptor / Connecting Cable	

Touch Panel Controller

UTY-DTGY

- Large-sized 7.5-inch TFT color
- LCD Easy finger touch operation
- Stylish shape and design to suit all application
- No additional component is required for installation
- Up to 400 indoor units can be controlled
- Selectable 2 display types (Icon / List) in monitoring mode
- Corresponds to 7 different languages, English, Chinese, French, German, Spanish, Russian, Polish.

Max. controllable
400
indoor units

Easy operation

- Wide range of simple-to-understand icons
- Operation can be selected using your finger or the dedicated touch pen by pressing the appropriate on-screen icon
- Up-to-date status display
- Background color identifies current control operation blue for monitoring, green for operational control

Functions

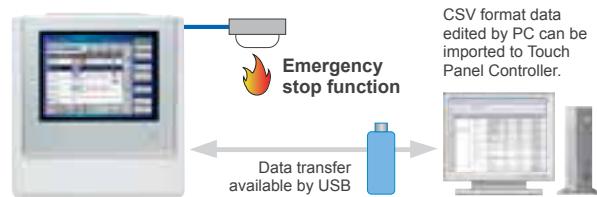

Individual control
Schedule control

Flexible grouping
Indoor units operation monitoring

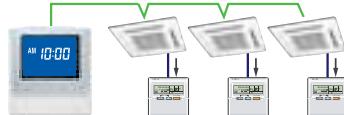

Versatility

- **Emergency stop function:** Air conditioner can be turned off through the external input control
- The stored data can be transferred via USB port
- CSV format data edited by PC can be imported to Touch Panel Controller.

Automatic clock adjustment

The time setting of each controller can be set in batch automatically.

Easy installation

- Touch Panel Controller is easily mounted to the wall.
- Flat back surface allows to be installed wherever it is needed.
- No additional component is required for installation.

Specifications

Software

UTY-APGX

System Controller realizes the advanced integrated monitoring & control of VRF network system from small scale buildings to large scale buildings.

- Up to a maximum of 4 VRF network systems, 1600 indoor units, and 400 outdoor units can be controlled.
- Supports VRF S series, V series and V-II series.
- In addition to air conditioning precision control function, central remote control, electricity charge calculation, schedule management, and energy saving functions are strengthened and building manager and owner needs are met.
- Corresponds to 7 different languages (English, Chinese, French, German, Spanish, Russian, Polish)

**Max. controllable
4
VRF network systems**

**Max. controllable
400
outdoor units**

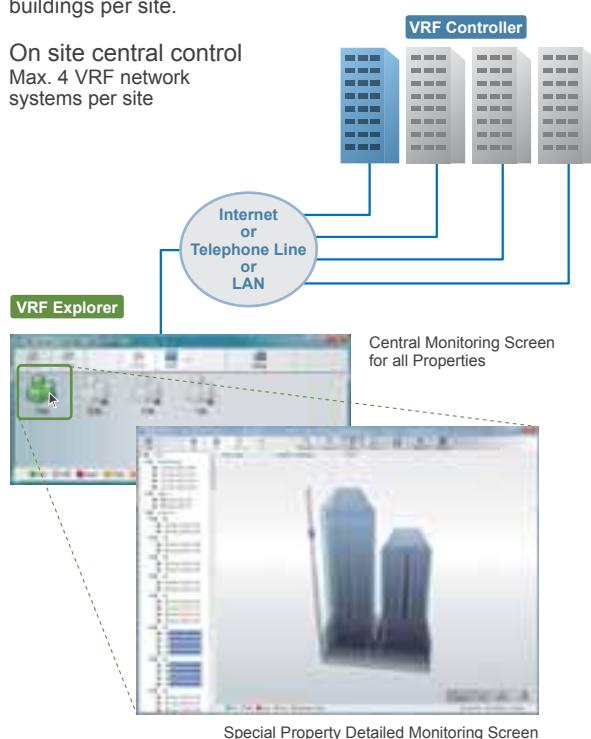

**Max. controllable
1,600
indoor units**

Remote centralized control

System Controller may be used on site or remotely over various networks for remote central control. System Controller requires

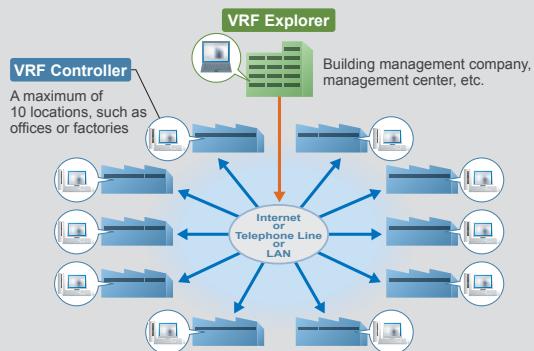

2 softwares working together. VRF Controller runs on site and communicate with VRF system. VRF Explorer runs remotely and provides user interface and communicate with the VRF Controller. VRF Controller and VRF Explorer program may run in a single PC or in different PCs separated by network. By using VRF Explorer software, one PC can perform central control of 10 VRF system sites with max. 20 buildings per site.

On site central control
Max. 4 VRF network systems per site

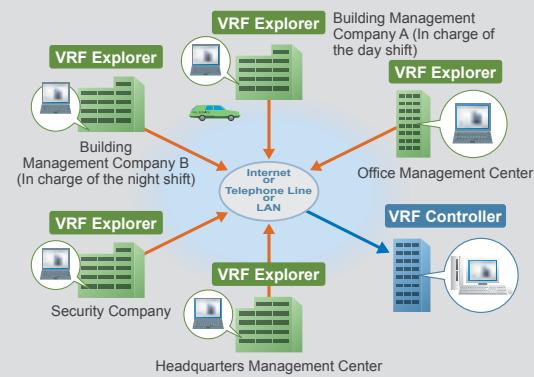

Remote central control

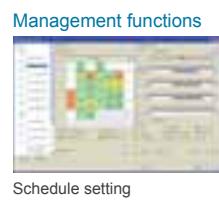

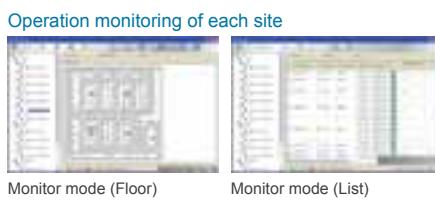

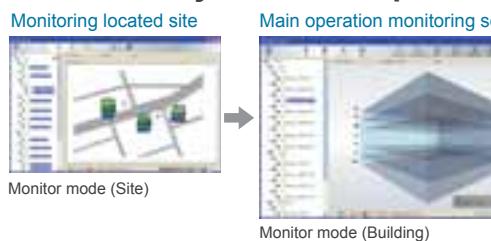

1 VRF Explorer can control or monitor up to 10 sites.

1 VRF Controller can be monitored from any number of VRF Explorers (Up to 5 connections simultaneously).

User friendly view and operation

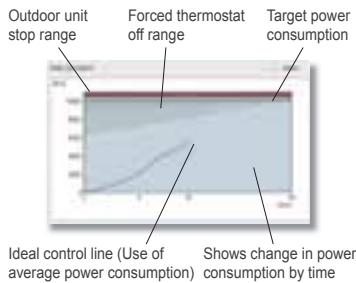

Functions

Energy saving management Option UTY-PEGX:software

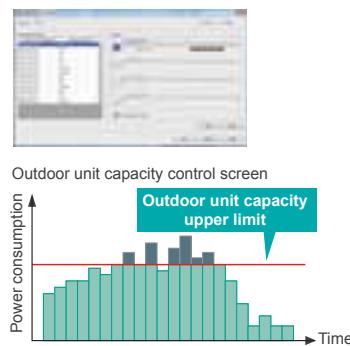

Peak cut operation

Controls overall operation while maintaining comfort according to the overall power consumption target value.

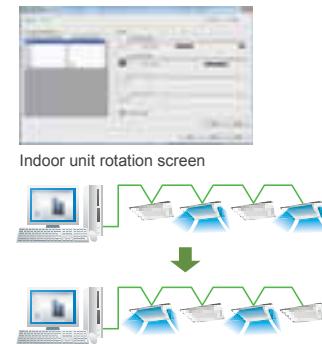

Outdoor unit capacity save

Sets an upper limit of outdoor unit capacity and performs capacity save operation at peak times.

Indoor unit rotation operation

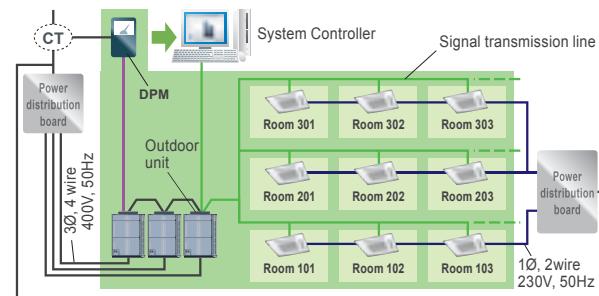

Reduces annual power consumption by operating indoor units in rotation.

Electricity charge apportionment

Apportions the power used by indoor and outdoor units and automatically calculates the electricity charge for each tenant. When you want to calculate the power used during a certain period in hotels, etc., computation linked with an electric meter is also possible. (Option)

Billing management for users for a set period Option

Others

- Batched stop
- Schedule control
- Divers control of indoor units
- Error display & E-mail notification
- Operating & control record
- Prohibition setting

Specifications

Model name	UTY-APGX
Personal Computer	AT compatible machine that runs Microsoft® Windows®
Operating System	Microsoft® Windows® XP Professional (Service Pack 3 or later / English version), Microsoft® Windows Vista® Home Premium, Business (Service Pack 2 or later / Corresponds to 7 different languages.*), Microsoft® Windows® 7 Professional (64-bit is not supported. / Corresponds to 7 different languages.*) *English, Chinese, French, German, Spanish, Russian, Polish
CPU	Intel® Pentium® / Celeron 2 GHz (VRF Controller), 1 GHz (VRF Explorer) or higher
HDD	40 GB or more of free space (5 GB for VRF Explorer PC)
Memory	2 GB or more (VRF Controller), 1 GB or more (VRF Explorer)
Interface	USB port is required for each of the followings for Server PC ; • Wibu Key (Software protection key) • Echelon® U10 USB Network Interface (Required for each VRF Network) Ethernet port is required for remote connection using internet.
Accelerator	Requires the internal graphics accelerator be compatible with Microsoft® DirectX® 9.0
Other Software Required	Adobe® Reader® 9.0 or later
PACKING LIST	
CD-ROM	Includes the software for System Controller. Both VRF Controller and VRF Explorer software is included.
Wibu Key	Software protection key to be inserted in a USB slot running System Controller. System Controller may only run on a PC with Wibu Key. Remote VRF Explorer software does not require Wibu Key.

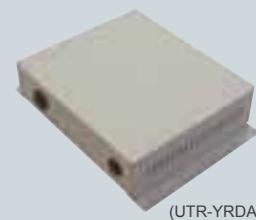

Personal computer must be field supplied. U10 USB Network Interface must be field supplied. Contact Echelon® Corporation or its local sales representative for detail.
Product Name : U10 USB Network Interface - TP/FT-10 Channel Model Number: 75010R

Adaptor & Convertor

Network Convertor

UTR-YRDA / UTY-VGGX / UTR-YGCA

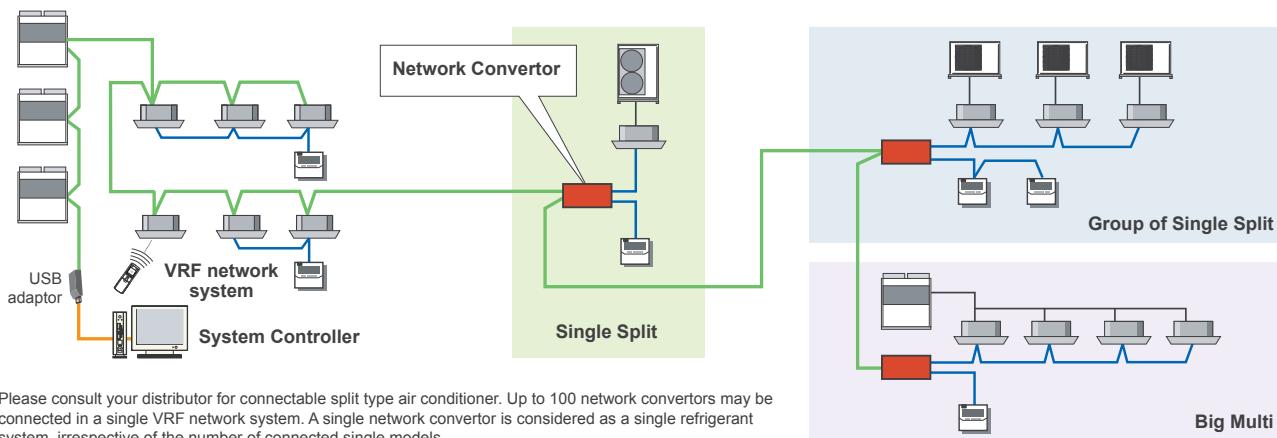

Max. controllable
16
Network
Convertor Units

- This network convertor is to be used for connecting single split system or group remote controller with the VRF network system.
- Please select the function by switching the dip switch during the installation.

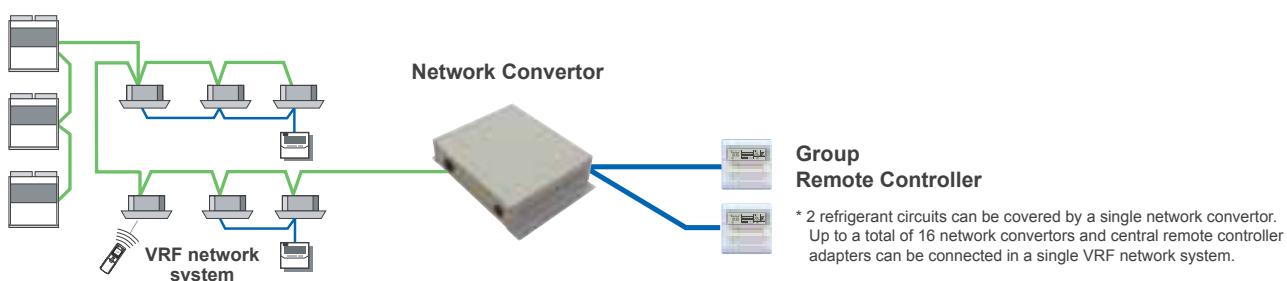

Installation example

- Split type systems can be controlled from a central remote controller or PC controller through connection to the VRF's network convertor.
- Standard remote controller and central remote controller provide On / Off control, master control, temperature and fan control, etc.
- A single network convertor can be used to connect and control up to 16 single units.

Used for connecting Group Remote Controller

4 group remote controllers can be connected to a single Network convertor.

Specifications

Model name	UTR-YRDA / UTY-VGGX / UTR-YGCA
Power Source	50-60Hz 220-240V
Power Consumption (W)	8.5
Dimensions (H X W X D) (mm)	67 x 288 x 211
Weight (g)	1,500

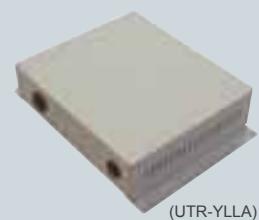

Model name	UTR-YLLA / UTY-VLGX
Power Source	220-240V 50/60Hz
Power Consumption (W)	4.5
Dimensions (H X W X D) (mm)	67 x 288 x 211
Weight (g)	1,500

Network Convertor for LONWORKS®

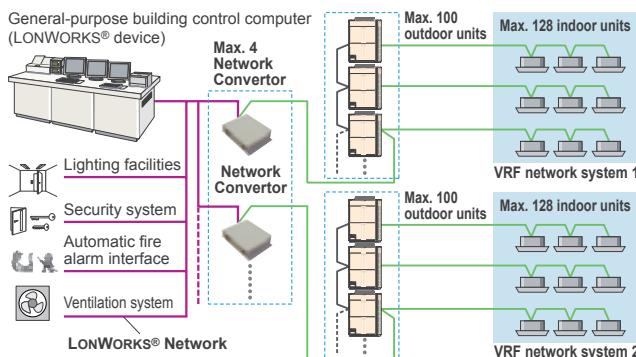

UTR-YLLA / UTY-VLGX

- For connection between VRF network system and a LONWORKS® open network for management of small to medium-sized BMS and VRF network system.
- The UTY-VLGX permits central monitoring and control of a VRF network system from a BMS through a LONWORKS® interface.
- Up to 128 Indoor units can be connected to one Network Convertor for LONWORKS®

Max. controllable
4 Units to BMS
Max. controllable
128 indoor units

Installation example

Transmission specifications (BMS side)

Transmission speed	78kbps
Transceiver	FT-X1 (Echelon® Corporation)
Transmission way form	Free topology
Terminal resistor	None (It attaches at the terminal of a network.)

BACnet® Gateway

Software

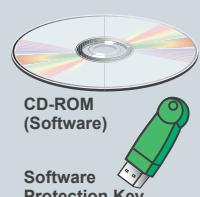

UTY-ABGX

- The VRF network system can be incorporated into a Building Management System.
- Enables central control of up to 1,600 indoor units through BACnet®, a global standard for open networks.
- Conforms to ANSI / ASHRAE Standards® 135-2004 BACnet® Application Specific Controller (B-ASC) BACnet® / IP over Ethernet.
- Connects up to 4 VRF network systems (1,600 indoor units / 400 outdoor units) per gateway.
- Supports VRF S/V series and V-II series

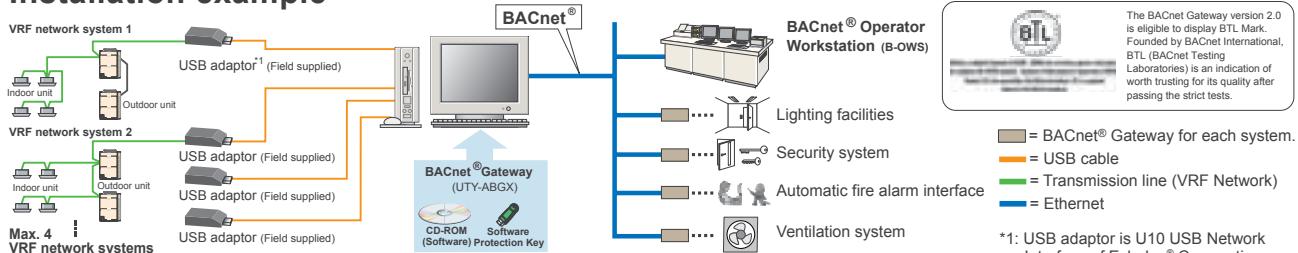

Max. controllable
4 VRF network systems

Max. controllable
400 outdoor units

Max. controllable
1,600 indoor units

Adaptor & Convertor, Service & Maintenance

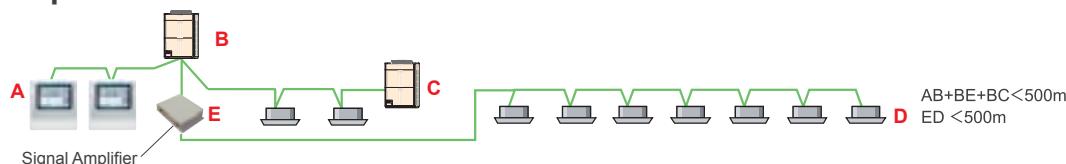

Signal Amplifier

UTY-VSGX

- Transmission Line length can be extended up to 3,600m for V-II series (2,000m for S series) with multiple Signal Amplifiers.
- Up to 8 signal amplifiers can be installed in a VRF network system.
- A signal amplifier is required,
 - (1) When the total wiring length of the transmission line exceeds 500m.
 - (2) When the total number of units on the transmission line exceeds 64.

Installation example

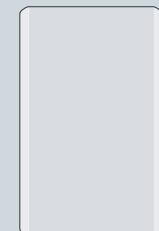

External Switch Controller

UTR-YESA / UTY-TEKX

Air conditioner switching can be controlled by connecting other sensor switches

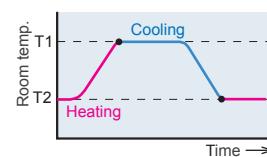

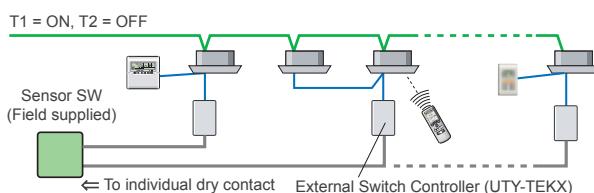

- In combination with a field supply Card-Key Switch or other sensor, the External Switch Controller allows control of the ON / OFF, Room temperature, Fan speed and Master control functions. This makes this product suitable for installations such as hotel rooms.
- Card-key or other sensor switches are available as a field supplied parts.

Installation example

Auto mode operation, which switches the cooling and the heating automatically, is enabled by using the sensor switch and External Switch Controller.

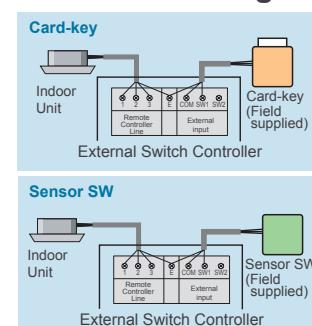

Note: All indoor units will operate in the same mode.

Note 1.
Please choose a thermosensor switch which can be set up for T1 and T2.

Note 2.
The remote controller's operation is prior to the auto mode operation.

Electrical wiring

Specifications

Model name	UTY-VSGX
Power Source	220-240V 50/60Hz
Power Consumption (W)	4.5
Dimensions (H X W X D) (mm)	67 x 288 x 211
Weight (g)	1,500

Model name	UTR-YESA / UTY-TEKX
Power Source	DC 12V
Dimensions (H X W X D) (mm)	120 x 75 x 30
Weight (g)	90

DC12V is supplied by the indoor unit.

Service Tool Software

UTY-ASGX

Extensive monitoring and analysis functions for installation and maintenance

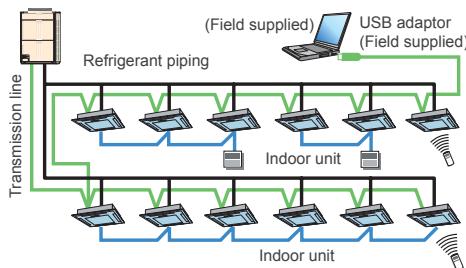

- Operation status can be checked and analyzed to detect even the smallest abnormalities
- Storage of data on system operation status on a PC allows access even from off site.
- Up to 400 indoor units (a single VRF network system) can be controlled and monitored for large scale buildings or hotels
- This software can be connected to any point of transmission line with USB adaptor (field supplied).
- Supports VRF S/V series and V-II series.

Max. Monitor and control
400
indoor units

Max. Monitor and control
100
outdoor units

Wiring connection

Functions

• Equipment Detail (Diagram)

- Equipment Detail (List)
- Error History
- Remote File Download
- System List
- Commissioning Tool

Web Monitoring Tool Software

UTY-AMGX

Product features

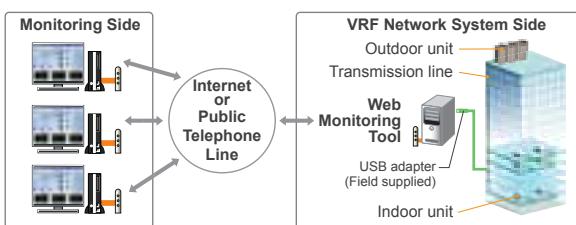

- Troubleshooting is performed by monitoring each air conditioning unit remotely during periodical system checks.
- Error notification can be automatically transmitted to several locations using the internet*1.
- Requires either a dedicated internet connection or public telephone line.
- Determination of an error occurrence can be made through error warnings and equipment status information obtained from a remote location.
- The monitoring data in a remote side can be optionally downloaded. And, this data can be displayed in offline mode of the service tool.
- Monitoring side computer is not required to install special software, requires only general web browser.
- Supports VRF S/V series and V-II series.

VRF network system
can be supported
4

1,600
indoor units
can be supported

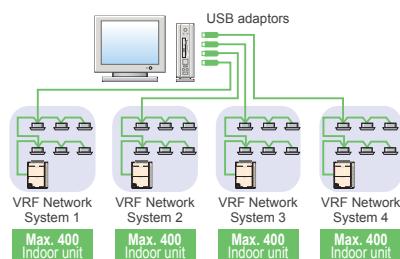

*1: Use of internet mail system required.

Web Monitoring System

Support 4 VRF network systems

USB adaptor (max. 4 adaptors per PC)
permit, monitoring of up to 1,600 indoor units.
Suitable for large-scale buildings or hotels.

Energy Recovery Ventilator

Suppresses indoor temperature changes while providing fresh air

High efficiency and low noise are achieved using a highly efficient element. Comfortable air-conditioned environment is provided by effectively determining whether to use heat-exchange ventilation or normal ventilation while meeting diverse needs.

Energy saving ventilation

Thanks to efficient recovery of thermal energy lost during Ventilation, you can save an air-conditioning fee.

Facility saving

Thanks to a drastic reduction of load incurred by outside air, you can make air-conditioners more compact in parallel with the recovery of thermal energy.

Humidity adjusting effect

In a cooling mode, a highly humid open-air is brought near to a dehumidified room atmosphere and then supplied.

In a heating mode, a room humidity is transferred to the dry outside air and then supplied.

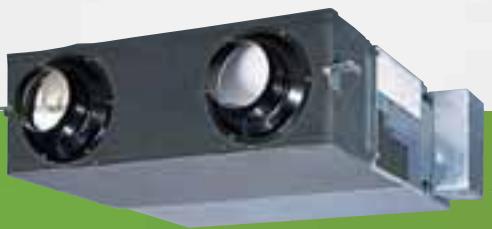

Sound shield effect

The ducts of the unit and the heat exchange element are characteristic of sound shield effect, so that the office and store environment can be preserved.

FUJITSU

More Comfortable Air Conditioning
Energy Recovery Ventilator

FUJITSU GENERAL LIMITED

Energy Recovery Ventilator

Energy recovery ventilator unit offers maximum comfort and greater energy savings.

UTZ-BX025A

UTZ-BX035A

UTZ-BX050A

UTZ-BX080A

UTZ-BD100A

Adopts a highly efficient counter-flow heat exchange element

Heat exchange ventilation and normal ventilation

Heat exchange ventilation

When a room is cooled or heated, the exhausted cooling / heating energy is recovered by heat-exchange ventilation.

Normal ventilation

This is used in the spring and autumn, when rooms are not cooled or heated, that is, when there is little difference between the indoor and outdoor air conditions. In addition, at night during the hot season, when the outside air temperature drops the outside air is drawn inside without heat exchange, alleviating the load on the air conditioning equipment.

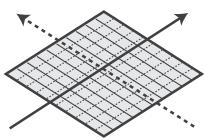

High Efficiency

Energy efficiency and ecology

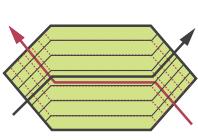

20%
Energy saving

Energy consumption is dramatically reduced by using a counterflow heat-exchange element. Air conditioning load is reduced by approximately 20%, resulting in significant energy savings. Recovers up to 77% of the heat in the outgoing air.

Features of heat exchange element

Other element
(Cross-flow element)

Fujitsu element
(Counter-flow element)

With the cross-flow element, air moves in a straight line across the element..With the counter-flow element , air flows through the element for a longer time (longer distance) ,so the heat-exchange effect remains unchanged.

More Comfort

Quiet operation

Significantly reducing low pressure loss and noise allows low-noise operation of 32 dB (High) or less for models with a capacity of 500 m³/h or less, and 37.5 dB (High) for models with a capacity of 1,000 m³/h.

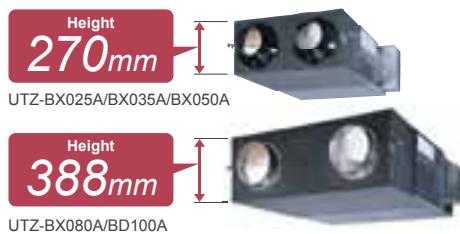

Long heat-exchanger service life

Cleaning reduced due to the special material heat exchanger.
The nylon/polyester fibre filter offers high dust retention capacity.

Easy Installation and Maintenance

Slim shape and easier installation

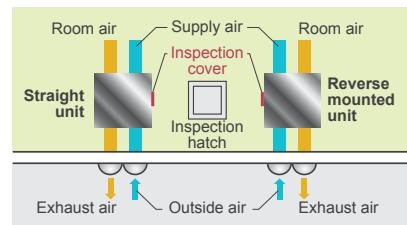

Counter-flow heat exchange element used for reduced noise and slimmer, more compact body shape.

Reverse mountable direct air supply / exhaust system

Adoption of straight air supply / exhaust system: Duct design is simplified because the air supply / exhaust ducts are straight.

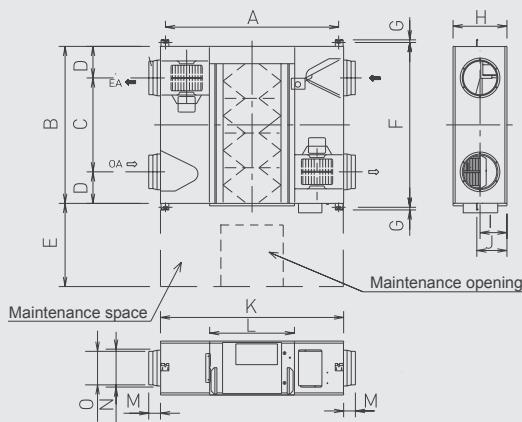

Since each unit can be mounted in reverse position, only one inspection hole is needed for two units: Two units can share one inspection hole so duct work is easier and more flexible.

Air to Water

WATERSTAGE™ is an Economical and Clean hot water heating system by Heat Pump

Complete Solution meets various needs

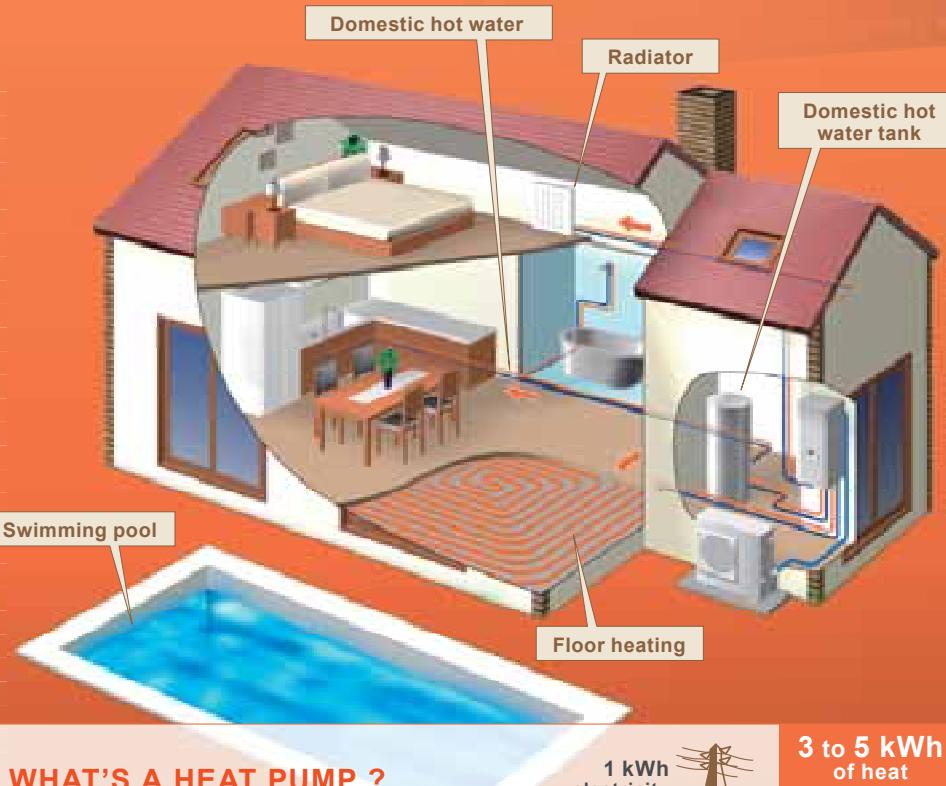

The clean energy produced by **WATERSTAGE** reliably delivers "comfort" to diverse spaces in the home up to the living room, bedrooms, bath and swimming pool.

164 High Power

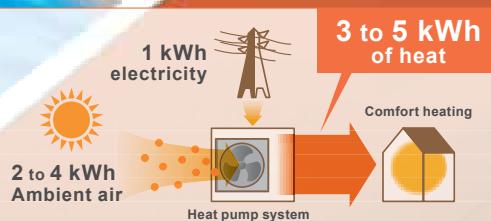

164 Comfort

165 Compact

WHAT'S A HEAT PUMP ?

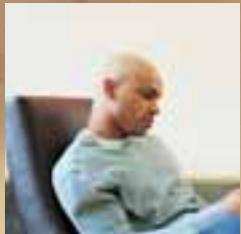

Absorbing the free energy from atmosphere. Heat pump system requires only 1kW of electricity to generate 3 to 5 kW thermal energy.

FUJITSU

Future Solution of **Domestic Heating**
Air to Water

WATERSTAGE™

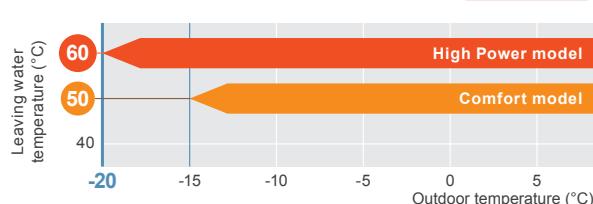

FUJITSU GENERAL LIMITED

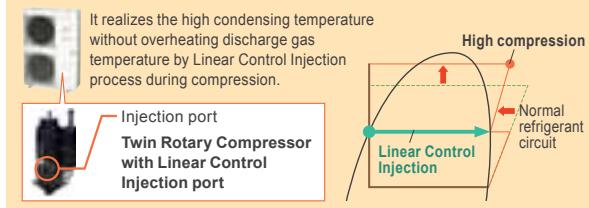

Powerful Heating & High Efficiency

High leaving water temperature

High leaving water temperature of 60°C keeps to -20°C of outdoor temperature without using backup heater.

FUJITSU GENERAL's advanced Linear Control Injection Technology (High Power model)

High COP

Air to water heat pumps work with much more efficiency and save more energy than a traditional heating system.

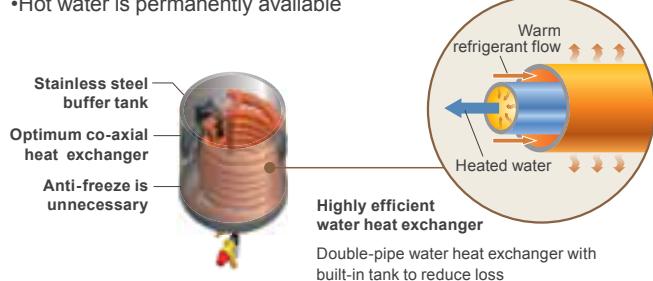

*The data refer to 16kW type Condition : Outdoor Temp. 7°C Heating Temp. 35°C.

High Reliability

High clean and durability

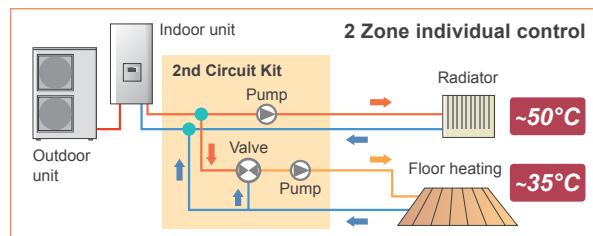

- Corrosion protected
- No fouling through heat exchanger construction
- Hot water is permanently available

Intelligent Control

2 Zone individual control

- 2 Zone individual control (2 under floor heating zones or under floor heating + radiator zone, etc.)*

*Optional parts are required.

MONOBLOC TYPE
Compact model

Monobloc unit
WPYA080LA
WPYA100LA

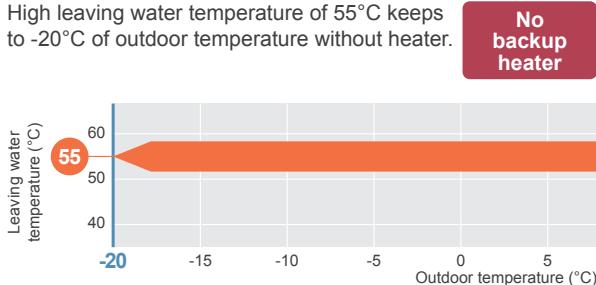

Control box
UTW-SCBYA

Compact & High Performance

High leaving water temperature

High leaving water temperature of 55°C keeps to -20°C of outdoor temperature without heater.

High COP

High COP is realized by using a DC twin rotary compressor, inverter technology, and high efficient water heat exchanger.

*Condition : Outdoor Temp. 7°C Heating Temp. 35°C.

Compact & light weight design

Weight
82kg

Intelligent Control

Wired remote controller (control box) is adopted standard.

Control box

And more

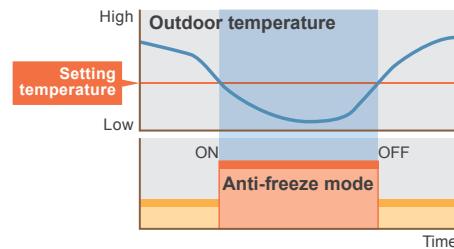

- Automatic heating curve control
- Cooling operation is possible*
- Anti-Legionella function
- Possible to docking the boiler and electric heater for backup

*Optional parts are required.

High Reliability

Anti-freeze function

Water circulation and compressor can be automatically performed at low outdoor temperature. Freezing of circulated water can be prevented.

Easy installation & maintenance

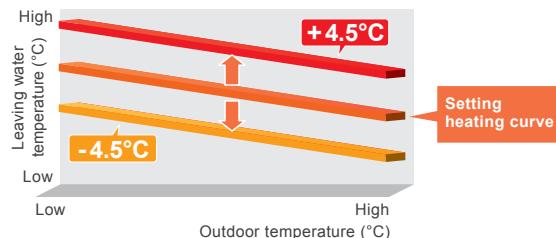

- No installation of refrigerant circuit connections.
- Closed type enables decrease in the supply frequency of circulating water.
- Easy access for maintenance operations

Smart & Comfort Control

Comfort

Flexible heating circuit

Automatic hot water temperature control matched to the application can be set. In addition, set temperature coefficient offset can be adjusted easily high or low side matched to the usage conditions.

Anti-legionella function

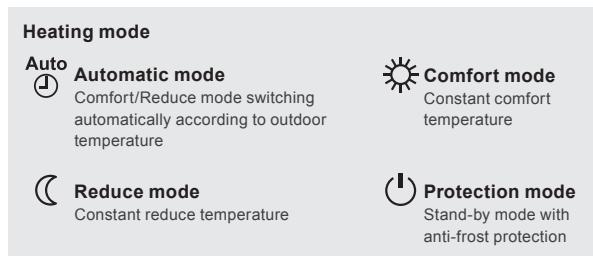

The growth of Legionella in DHW tank is suppressed and safe and clean hot water is supplied at all times.

Convenience

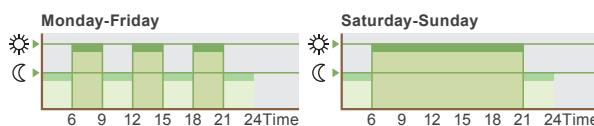

Programmed operation

- The setting of programmed operation can be easily set.
- Changing the heating mode linked with time is possible.

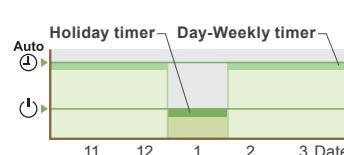

Day-Weekly timer setting

- The day-weekly timer can be set up for up to 3 times per day.
- Allows separate settings for each day of the week.

Holiday timer setting

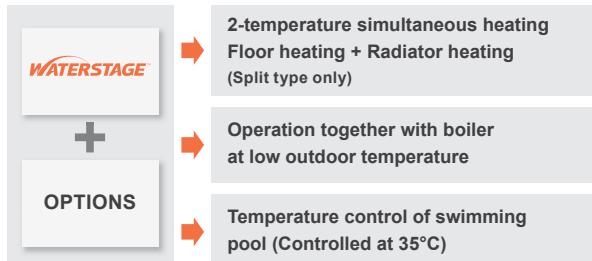

- The holiday timer can be set up for up to 8 periods
- If you are absent for a long time in the winter, freezing of room can be prevented.

Extendibility

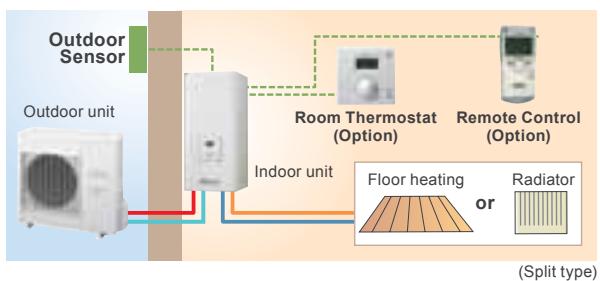

Diverse operation control

Meets diverse needs by combining with optional parts.

Remote control-extension

Optional remote controller allows controls of hot water depending on indoor temperature.

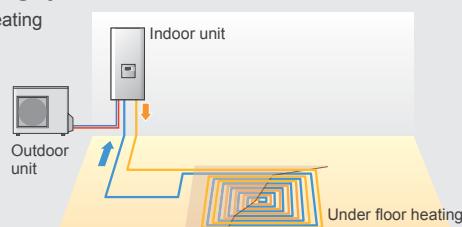

Design Versatility

Installation example

The water heating system can be freely constructed for a wide range of applications from floor heating to hot water showers.

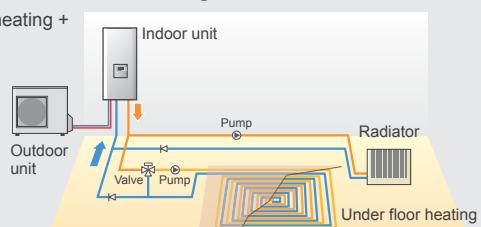

Single heating system

Under floor heating

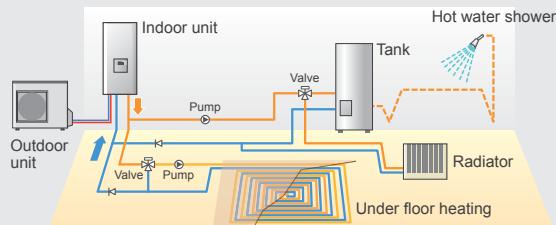

2 system simultaneous heating (Individual control)

Under floor heating + Radiator

3 types of heat distribution

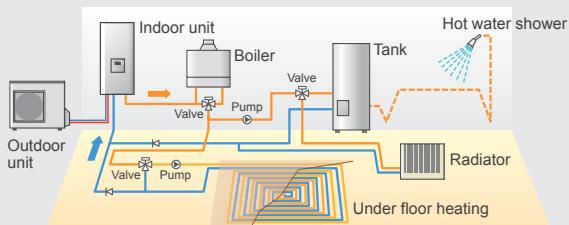

Under floor heating + Radiator + Sanitary hot water

System for low outdoor air temperatures

(additional heating boiler connection)

Under floor heating + Radiator + Sanitary hot water

Control Box

UTW-SCBYA

Deodoriser

This solves your problems
with distracting lifestyles smells and
other stubborn smells.

Deodorisation capacity

Approx. 150 times^{*1}
that of an air cleaner

(compared to conventional Fujitsu General products)

Bacteria elimination power

Removes 99.9%^{*2}
of airborne bacteria

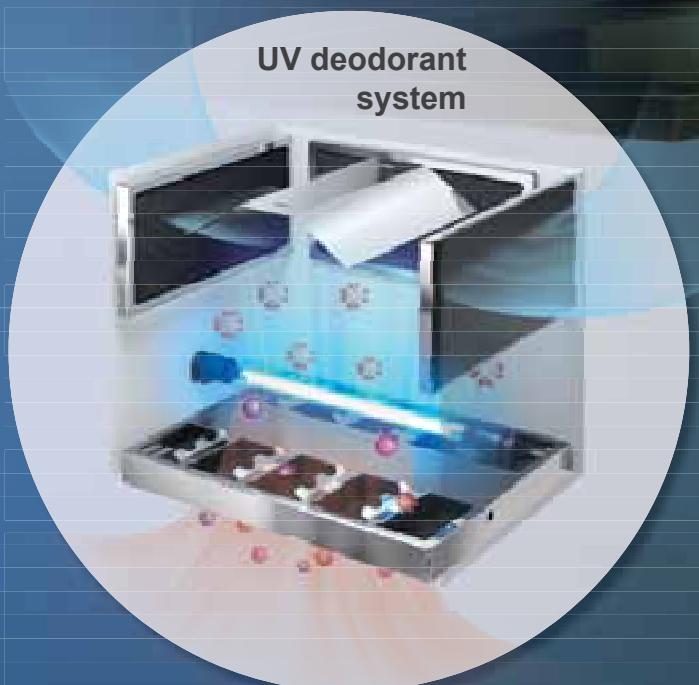

Economical

Filter replacement
unnecessary^{*3}

*1. Compared to our Model ACS-24NVU Air Cleaner using urine (substituted with ammonia), food and raw garbage (fermented beans used as compound odour). However, approximately 50 times the deodorising capability (our company's study) for faecal waste (skatol and compound odour). Tested with constantly emitted odour. Calculated from the fact that the balance ratio of concentration for the same generation volume with the concentration of odour intensity level 1 as 10 times is inversely proportional to the removal capability.

*2. Test organization: Kitasato Research Center of Environmental Sciences. Checked in UV deodorant system.

*3. Washing with water once a year is the standard when cleaned with a vacuum cleaner once a month. (The cleaning frequency can vary depending on the conditions of use in the home. Replacement may also be necessary, depending on the condition of use.)

Powerfully deodorises
Almost all odours

FUJITSU

For Comfortable Life
Deodoriser

AIR DEODORISER

FUJITSU GENERAL LIMITED

AIR DEODORISER

Powerfully removes odours by the world's first deodorisation decomposition technology.

Simultaneously displays air cleaning and bacteria elimination effects, and makes living more pleasant.

DASY30S

2 WORLD FIRST functions.

UV deodorant system

WORLD FIRST^{*1}

Powerful deodorisation & bacteria elimination by 3 wavelengths^{*2}

Ozone deodorisation

Large volume of ozone is generated by light (185nm). Ozone power decomposes odour molecules.

Photo catalytic deodorisation

Odour molecules are decomposed by illuminating a titanium oxide plate with light (254nm).

Bacteria elimination

Bacteria and virus are repelled by light (185nm) having a bacteria elimination power 1600 times that of sunlight.

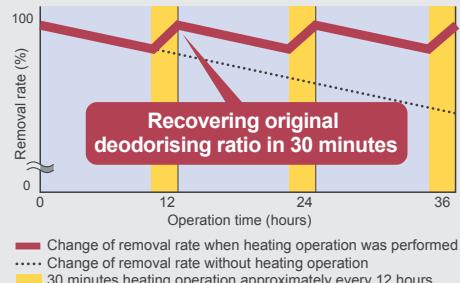

Automatic deodorisation capability regeneration system

WORLD FIRST^{*1}

Deodorisation capability regenerated by heating

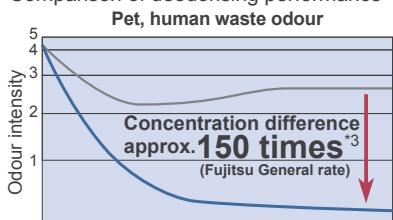

- Oxidation and decomposition capability is promoted by heating the filter for 30 minutes every 12 hours.
- Initial performance is maintained by removing odour molecules clinging to the filter.

Image of filter regeneration by heating operation

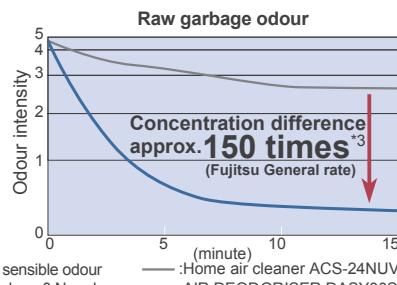

High Performance Verification Test Results

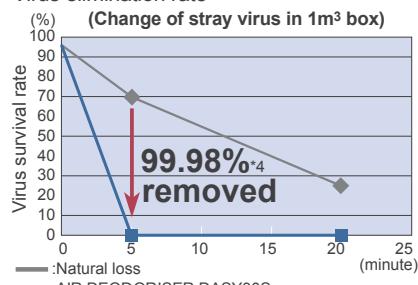

Comparison of deodorising performance

Odour intensity : 5.Very strong odour 4.Strong odour 3.Easily sensible odour 2.Weak odour but type of odour is sensed 1.Slightly sensible odour 0.No odour

Virus elimination rate

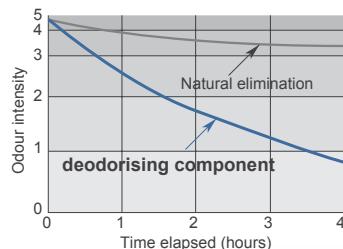

Removes permeated odours

The deodorising component^{*5} (weak ozone) discharged from the body decomposes and deodorises odours permeating the room from their source.

Deodorising effect of a piece of cloth permeated with the odour of 10 cigarettes

6 stage odour intensity method
(test room of 13.2m²)

Filter replacement unnecessary^{*7}

All filters do not require replacement. Economical
Washable. Replacement unnecessary.

1. Prefilter
2. Allergenic substance decomposition dust collection filter
Automatic deodorisation capability regeneration.
Maintenance-free
3. Heater unit
4. Compound metal oxidation catalyst honeycomb filter
5. Special activated charcoal filter

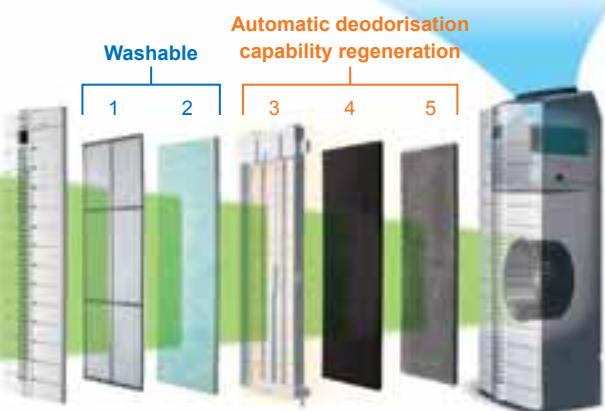

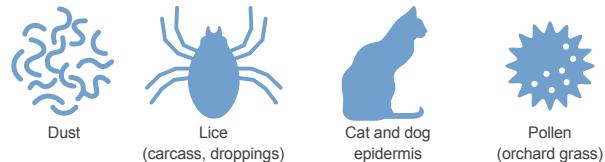

Air cleaning capability

Air is cleaned by powerful dust collection.

Prefilter: Removes pet hair and large dust particles.

Allergenic substance decomposition dust collection filter:

Removes pollen, lice, and other allergenic substances^{*6}

*1. Home air deodorisation machine announced November 7, 2005. *2. Generates light of 3 wavelengths; ozone generation 185nm, bacteria elimination 254nm, and photo catalyst activation 365nm. *3. Compared to our Model ACS-24NVU Air Cleaner using urine (substituted with ammonia), food and raw garbage (fermented beans used as compound odour). However, approximately 50 times the deodorising capability (our company's study) for faecal waste (skatol and compound odour). Tested with constantly emitted odour. Calculated from the fact that the balance ratio of concentration for the same generation volume with the concentration of odour intensity level 1 as 10 times is inversely proportional to the removal capability. *4. Test organization: Kitasato Research Center of Environmental Sciences. Checked in UV deodorant system. *5. Generates very weak ozone. However, the concentration is less than the volume existing in the natural state in forests, etc. The deodorising effect varies depending on the room size and amount of ventilation. *6. Test organization: Tested by Shinshu University using lice carcass, lice faeces, cat epidermis, dog epidermis, and orchard grass. *7. Washing with water once a year is the standard when cleaned with a vacuum cleaner once a month. (The cleaning frequency can vary depending on the conditions of use in the home. Replacement may also be necessary, depending on the condition of use.) *Photographs and illustrations are images. •Harmful substances (carbon monoxide, etc.) of tobacco cannot be removed.

Specifications

Model No.		DASY30S	
Rated voltage	V	220-240	
	Hz	50/60	
Operation modes		AUTO, QUIET, HIGH, HI-POWER	
Air flow	m ³ /min	At minimum 0.8, at maximum 3.0	
Operating sound	dB	At minimum 19, at maximum 45	
Power consumption	W	At minimum 11, at maximum 35	
Applicable floor space	m ³	~33 *By amount of generation source	
Dust collection function		Non-woven fabric pleat filter	
Deodorising method		UV ozone + compound honeycomb	
Bacteria elimination method		Bacteria elimination lamp	
Filter life		Catalytic honeycomb filter: Automatic refreshing Dust collection filter: Water washing refreshing	
Sensor		Gas sensor	
Motor drive		Inverter	
Off timer	h	1	
Product outside dimensions	mm	274 x 653 x 215	
Product weight	kg	6.4	
Installation		Floor installation (wall mounting bracket installable)	
Power cord length	m	2	
Safety devices		Overcurrent prevention (current fuse) Excessive temperature rise prevention (automatic reset thermostat) Excessive temperature rise prevention (temperature fuse)	
Remote controller		Accessory	

Feature Explanation

Comfortable function

Human sensor

Human sensor catches movements of people in a room.

Up / down swing flaps

The up/down flaps automatically swing up and down.

Double swing automatic

Complex swing action of flaps enables automatically to swing both horizontal and vertical directions.

Automatic air flow adjustment

The micro-computer automatically adjusts the air flow effectively to follow the changes of room temperature.

Auto restart

In the event of a temporary power failure, the air conditioner will automatically restart in the same operating mode as before, once the power supply is restored.

Auto-changeover

The unit automatically switches between heating and cooling modes based on your temperature setting and the room temperature.

10°C HEAT operation

The room temperature can be set to go no lower than 10°C, thus ensuring that the room does not get too cold when not occupied.

Connectable distributing duct

Connectable fresh air duct

Fresh air intake

Fresh air can be taken in by a fan which can be connected using external control unit.

Economy mode

Limits the maximum operation current, and performs operation with the power consumption suppressed.

Powerful mode

Operation at maximum air flow and compressor speed, and quickly makes the room comfortable.

Low Noise Mode

Sound noise level of outdoor unit can be selected.

Energy saving mode

This mode raises the set temperature slightly in the cooling mode and lowers the set temperature in the heating mode to economically control the operation of the unit.

V-PAM control models

i-PAM control models

Convenient function

Sleep timer

The micro-computer gradually changes the room temperature automatically to afford a comfortable night's sleep.

ON-OFF timer

ON-OFF timer can be set to operate once.

Program timer

This digital timer allows selection of one of four options: ON, OFF, ON → OFF or OFF → ON.

Weekly timer

Different on-off times can be set for each day.

Weekly + setback timer

Weekly + Setback timer can set temperature for two times spans and for each day of the week.

Filter sign

Indicates the filter cleaning period by lamp.

Clean function

Automatic filter

The filter is automatically cleaned after the time is set for the air conditioner.

UV filter cleaner

UV (ultraviolet rays) suppresses the growth of mold and germs inside the indoor unit.

Long-life ion deodorization filter

The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine-particle ceramic.

Apple-catechin filter

Fine dust, invisible mold spores, and harmful microorganisms are absorbed onto the filter by static electricity, and further growth is inhibited and deactivated by the polyphenol extracted from apples.

Coil dry

The indoor unit can be dried to prevent the growth of mold and bacteria.

Washable panel
