Company profile

Air conditioning from Hitachi can justifiably be described as the art of exploiting the latest ideas and developments in technology to create a range of innovative products which provide a more comfortable and more productive environment in which people can happily live and work. It is also an art executed with a responsible concern for protecting the environment.

Ecological thinking begins at the very first stages of new product design and continues throughout production, installation procedures, equipment and operation.

Specifiers and users alike can always be assured that performance and costs are not the only parameters by which Hitachi products can be judged.

To achieve success with such objectives on a global scale requires not only enormous resources but also a commitment to the future. As one of the largest companies in the world, Hitachi is well positioned to undertake this commitment with confidence that comes from successfully responding to the changing needs of people for over 90 years.

In Japanese, Hitachi means sunrise - we are the forefront of research and development turning new ideas and innovations into new products. Of its \$81.4 billion sales worldwide in 2003, close to 5.2% was invested into research and development programs. This vast amount of money has given Hitachi the opportunity to conceive many 'world firsts' – examples of which include the technologically advanced and acclaimed scroll and semi-hermetic screw compressors. These have been incorporated in Hitachi's air conditioning systems and water chillers which have revolutionised air conditioning worldwide.

The majority of our room air conditioning products are developed at our Tochigi Works in Japan. This is the main focus not only for production but also for research and development with respect to all our room air conditioning products. To assist in production and distribution worldwide we have seven affiliated production companies for room air conditioners and compressors.

Hitachi's advanced air conditioning products are specified all over the world, wherever there is a requirement for ultimate performance and cost effective, long term reliability. A wide range of units coupled with a choice of advanced control systems mean Hitachi can provide solutions to meet every possible air conditioning application or specification. Authorised distributors all over the world contribute their own specialised technical support and practical assistance to provide individual system designs, commissioning and after sales service.

Hitachi Authorised Distributors are committed to providing an unrivalled support from a combination of experienced engineers, local product and spare parts stock, supported in turn by on-going technical support from Hitachi.

From the initial product concept at Hitachi's research and development facility in Japan, product development is dedicated to providing the products the customer requires. Product design and development is continuous with priority being given to the use of ecologically friendly refrigerant. To satisfy your cooling and heating requirements and to ensure the optimum indoor environment, consider Hitachi the first and last word in air conditioning.

Environmental Management Systems Approval Certificate

Quality control

Tochigi Works and its overseas affiliates have acquired International Standard Quality Management System ISO9001 and ISO14001 authorisation. The Tochigi Works performs thorough product quality control using various environmental tests. Hitachi Room Air Conditioning Indoor and Outdoor units are manufactured according to this ISO certification system.

Hitachi products all carry the necessary 'CE' declaration markings, and also feature in the extensive Eurovent Listing programme. Listing in the Eurovent directory helps ensure peace of mind for the installer and the end user, as it certifies the important operating parameters and performance of the units.

Product range overview

Hitachi's new range of Room Air Conditioning systems has developed significantly in recent years following a great deal of investment in research and development and testing facilities at various Hitachi factories and laboratories, around the world.

Hitachi has continuously developed sophisticated energy saving air conditioning systems that reduce CO₂ emissions and help to protect the global environment.

The latest Room Air Conditioning offering from Hitachi is the Cut Out range of Wall and Floor Mounted units.

Available in the MonoMultizone or Summit range the units have a stylish design and are available in a variety of colours.

The Hitachi range of Room Air Conditioners feature a vast array of significant features all designed with the user in mind.

- High efficiency DC Inverter PAM control
- Eco friendly R410a refrigerant
- High power and performance for greater energy efficiency
- Low ambient working range -10°C for cooling, -15°C for heating
- Remarkably low sound levels

- Strong heating capacity under low ambient temperature conditions
- Zone by zone heating or cooling for up to four areas, and wide selection of indoor unit type and capacities
- Highest air quality
- Easy installation and servicing
- An elegant design

Features and benefits

All DC Inverter

As you would expect from an Industry leader such as Hitachi, we have been at the forefront of technological development and advancement. As the pioneer of 'DC' Inverter driven Room Air Conditioners, our units boast the significant advantage of all DC Inverter driven compressors and fans. Enhanced inverter performance and system performance are achieved by the addition of a 'DC' drive.

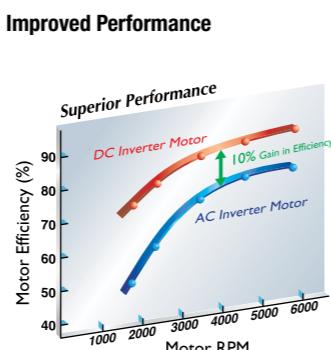

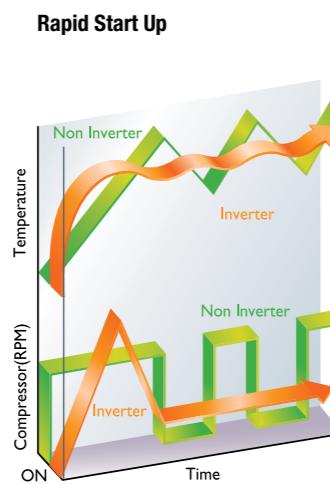

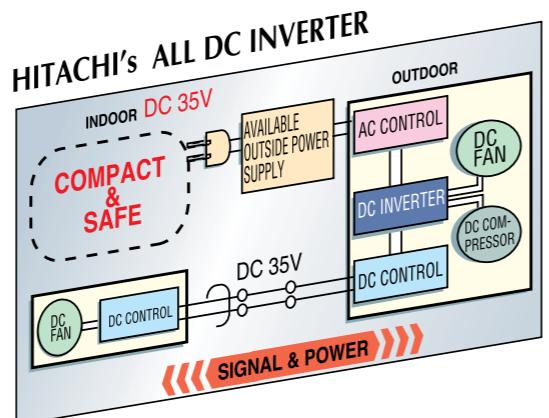

Advantages include:

Rapid start up

The variable speed compressor (inverter) enables the system to rapidly reach the desired room temperature setting. Once the desired room temperature has been achieved the compressor rotation speed is reduced, saving up to 30% in energy usage (when compared to conventional systems) without compromising comfort levels.

Improved performance

The inclusion of a DC driven motor delivers an enhanced performance over standard AC motor driven systems. This enhanced performance can be as much as 10%!

Cooling at
-10 °C
Heating at
-15 °C

High performance cooling at -10°C and heating at -15°C

The cooling and heating performance is even more impressive than previously. The units have been designed for cooling operation under low temperatures down to -10°C. At outdoor temperatures as low as -15°C, the PAM controlled range of inverter split systems continue to provide high capacity heating performance.

Compressor Technology

Digital DC Scroll Compressor

The motor uses digital control to maximise PAM control performance.

- Loss during high-speed revolution is reduced thanks to digital control of the motor.
- Shaft runout during high-speed revolution is lessened by three balancers mounted on the crank shaft.
- Efficient operation with drastically reduced refrigerant leakage is ensured by the automatic compression system, in which the tip of the slewing scroll is kept in absolute contact with the fixed scroll, in addition to special processing of the scroll surface.

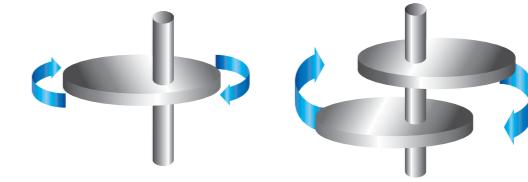

DC Twin Rotary Compressor

Today all Monozone and two Multizone room air conditioning units have Hitachi's new twin rotary compressor which has even less vibration and even higher performance efficiency than conventional rotary compressors.

- Two rotating cylinders ensure well balanced rotation unlike the conventional single-rotary type, thus greatly reducing any vibration noise.
- The compressor's operation is magnificently improved by the independent operation of the cylinders leading to greater efficiency and lower vibration.

Drawing of cylinder balance

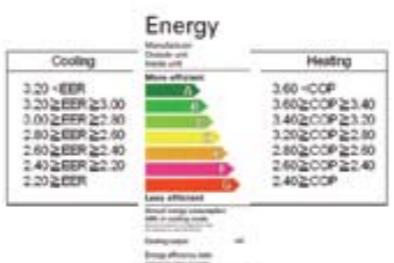

Comparison of vibration

Single - 1	Twin - 1/5
------------	------------

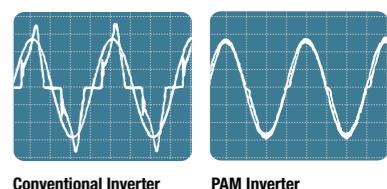

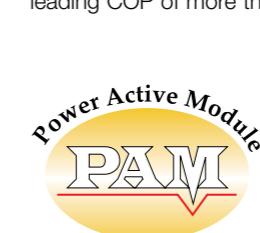

High Energy Efficiency

Hitachi conforms to the 2002/31/EC Directive - 92/75/EEC "Energy labelling Directive (ELD)", which is applicable from June 2004 on all air conditioning products up to 12Kw cooling capacity. The DC inverter PAM technology helps us to achieve the 'A' class, the highest level of energy efficiency which is clearly indicated on the standard labelling system.

PAM - Minimised loss of performance

Hitachi's PAM (Power Active Module) control system mirrors the current pulse waveform to avoid distortion and therefore achieve almost 100% power factor to enhance power efficiency. This cutting edge device is employed in all Hitachi Mono/Multizone products for your comfort and energy saving for our environment. It ensures the efficient use of input power and minimises loss to less than 1%. The PAM range boasts an industry leading COP of more than 4.0.

Features and benefits

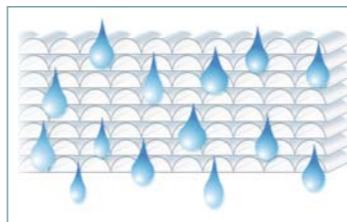

Nano-Titanium Filter ('Cut Out' range only)

In our new Cut Out models we have introduced the Hitachi state of the art Nano-Titanium Catalyst which dramatically improves the functions of deodourisation, bacteria elimination and anti-bacterial measures. Titanium Oxide has been used as a photocatalyst for many years but Hitachi have now enhanced it by reducing its size to a nanometer – over 1000 times smaller than ordinary bacteria agent.

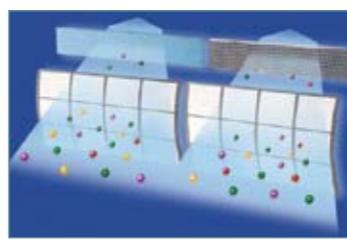

This ultrafine catalyst can therefore catch smaller microbes or bacteria which may escape from other filters leading to higher air quality circulating around the room.

Air Quality

Either the SPX-CFH5 or SPX-CFH11, washable carbon and anti-bacteria air purifying filters are included in all of Hitachi's room air conditioning products. This ensures that the micro dust, pollen particles and odours that can collect on filters can be easily removed. The filters can be washed and reused up to 20 times.

Breathable structure. Micro level dust is absorbed by static electricity

SPX-CH5, SPX-CH11

Reusable after washing

R410A Refrigerant

Hitachi is using the new R410A refrigerant in all of its room air conditioning products to ensure its continual environmentally friendly approach as well as the on going development of techniques for saving energy and reducing power consumption.

Automatic Operational Control

All air conditioning units are made with easy servicing in mind. All components can be easily reached and self diagnosis is made easy. Errors are easily identified by the blinking patterns made by lights on the LED outside the indoor and inside the outdoor units.

Auto restart

If the auto start mode is selected at the ON/OFF switch, then the unit automatically resumes operation in the mode that was in use before it was switched off. This saves time for the user on start up and setting selection.

Auto changeover

The built-in microcomputer continuously selects the best operating mode to achieve the required heating and cooling temperature. The sensor checks the operating mode periodically to provide maximum comfort for the user.
(Applicable to all DC Inverter models.)

Easy to use remote control

All units come with a standard easy to use wireless or wired remote control, equipped with 24hr timer. All commands are shown on the liquid crystal display while convenient, frequently-used functions (sleep mode timer, fan speed and louver control) can be operated with one touch buttons.

Self Diagnosis System for Easy Servicing

All air conditioning units are made with easy servicing in mind. All components can be easily reached and self diagnosis is made easy. Errors are easily identified by the blinking patterns made by lights on the LED outside the indoor and inside the outdoor units.

New Weekly Timer

Main Functions:

- Programs can be set for one week.
- Up to 5 patterns can be set for each day (A pattern includes 'start time' + 'end time' 'different setting temperature').
- Programs can overlap to the next day.
- 4 different fan speeds: Auto/Hi/Med/Low/Silent

Controls

The new 'Cut Out' range of air conditioning units now has a larger possible variety of controls. The easy to use wireless or wired remote controllers are still available but in addition there is also the option to fit this to a **Simple Weekly Timer** and Hitachi's **H Link adaptor**.

Monozone/Multizone

Extensive range and full indoor/outdoor compatibility

The Hitachi Multizone range was the world's first all DC Inverter Multisplit system with zone by zone cooling or heating for up to four rooms.

Hitachi DC scroll and DC twin-rotary compressor, together with award-winning DC inverter PAM technology, aid the achievement of a system power factor of almost 100%, thus providing unparalleled performance and efficiency. The all DC Inverter system ensures extremely sensitive and accurate

temperature control through fuzzy logic and offers remarkably low sound levels.

The wide range of units have been designed for cooling operation under low temperatures, down to -10°C. This feature enables cooling to be obtained even in winter on buildings with high internal heat gains due to lighting, people and machines, particularly in areas such as shops and lecture rooms. The heating operation under low temperature, down to -15°C can also be performed.

The recent integration of Multizone and Monozone employing R410A refrigerant provides a comprehensive selection of DC inverter PAM mono and multi split systems, maintaining full compatibility of indoor unit throughout the range.

Monozone/Multizone compatible indoor unit range caters for all requirements offering wall mounted, floor standing, 60cm x 60cm cassettes, and in the ceiling duct units, designed to offer elegance and comfort to any application.

Comprehensive range/long pipe length and easy installation

You can choose and connect freely from different types of indoor and outdoor units depending on the number of rooms, width and shape of the room.

The single Monozone outdoor units work on a 20m to 30m maximum length of piping, and are made in four different capacities.

Multizone outdoor units can have a maximum chargeless piping length up to 70m when one outdoor unit is used with four indoor units in various locations. A maximum combination of indoor units can provide a wide selection of 6.5kW to 12.0kW.

Main Key Benefits

- DC Inverter PAM control
- Wide selection of indoor unit types and capacities
- Compatibility between product ranges of outdoor and indoor units
- Highest COP and low noise
- Cooling available under -10°C ambient temperature*
- Heating available under -15°C ambient temperature
- Auto restart by previous mode and Auto changeover**
- Washable carbon and anti-bacteria air purifying filter
- 24hr remote control timer
- R410A refrigerant

NOTES: * Except RAM 80QH5 ** Auto changeover for Monozone only

Cut out wall mounted unit

RAK Technical Description

The latest addition to Hitachi's Room Air Conditioning range is the new Cut Out range of units, this includes the new Multizone Wall Mounted unit, fully compatible with Hitachi's Multizone outdoor unit. Available in cooling and heating capacities from 2.5kW to 5.0kW, this new range still includes all the important features associated with Hitachi units such as R410A refrigerant, Hitachi DC scroll or DC twin rotary compressor and of course its DC inverter driven PAM technology.

Control Options

This unit is available with a wider range of control systems including:

- Simple Weekly Timer
- Wired Remote Control
- H-Link adaptor

Framed flat wall mounted

RAK Technical Description

Hitachi's R410A All DC Inverter Ranges elevate air conditioning to a new level, incorporating significant advances in electronics technology.

With cooling and heating capacities from 2.0kW to 5.0kW, the all DC Inverter PAM driven mono split Monozone/Multizone Framed Flat range incorporates the R410A refrigerant, Hitachi DC Scroll, or DC Twin Rotary compressor all working together for high performance and ultimate efficiency.

- New Flat Framed design
- DC inverter PAM control
- Low noise down to 20dBA on sleep mode
- Heating available even at -15°C ambient temperature
- Auto restart and Auto changeover
- Washable carbon and anti-bacteria air purifying filter
- 24hr remote control timer
- R410A refrigerant

Cut out floor mounted unit

RAF Technical Description

The latest addition to Hitachi's Room Air Conditioning range is the new Cut Out range of units, this includes the new Multizone Floor Mounted unit, fully compatible with Hitachi's Multizone outdoor units. Available in cooling and heating capacities from 2.5kW to 5.0kW, this new range still includes all the important features associated with Hitachi units such as R410A refrigerant, Hitachi DC scroll or DC twin rotary compressor and of course its DC inverter driven PAM technology.

Additional features of the new Cut Out range include:

Air flow control system

Lower blowing type

In heating mode

The warm air is controlled more accurately to stay at floor level.

In cooling mode

Cool air is controlled to be distributed more evenly around the room and not to be focused on one particular area.

Control options

This unit is available with a wider range of control systems including:

- Simple Weekly Timer
- Wired Remote Control
- H-Link adaptor

White and Dark Silver

Beige and Chocolate

Available in a range of colours:

- White and Dark Silver
- Beige and Chocolate
- Detachable stand

60cm x 60cm cassette

RAI Technical Description

Fits into 60cm x 60cm ceiling module

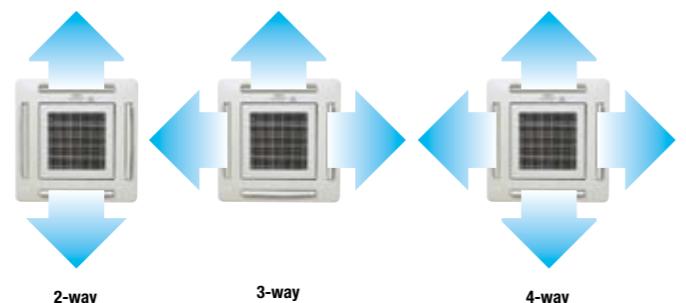

With its compact design the 60cm x 60cm ceiling unit neatly fits inside a standard ceiling module which minimises the installation work.

Silent

The noise level is just 25dB (sleep mode) thanks to the 3D – twisted wing design of the compact turbo-fan.

Flexible air flow system

The user can select between 2-way, 3-way or 4 way operation of auto swing louvers.

Built-in drain pump

This ductable unit is equipped with an internal drain pump to remove accumulated condensation water from the drain pan even while it is operating. A float switch monitors the water level and automatically activates the pump as necessary.

One-touch panel

The panel can be swung open up to 90° with just one push so that the filter can be removed for cleaning.

NOTES:

Cooling Capacities Conditions

Indoor Air Inlet Temperature: 27 °C DB
19 °C WB
Outdoor Air Inlet Temperature: 35 °C DB
Piping Length: 7.5 meters
Piping Lift: 0 meters

Heating Capacities Conditions

Indoor Air Inlet Temperature: 20 °C DB
7 °C DB
Outdoor Air Inlet Temperature: 6 °C WB
Piping Length: 7.5 meters
Piping Lift: 0 meters

Sound Pressure Level Measurement Distance

RAK
1m from discharge grille
0.8m beneath the unit's height centre

RAF
1m from discharge grille
Half of unit height from floor level

RAI
1.4 m beneath the unit

RAD
1.5 m beneath the unit

RAM
1m from suction/discharge grille
Approx. 1m from floor level

In the ceiling

RAD Technical Description

- Compact design – 750 mm wide and 235 mm high
- Newly developed wired remote controller with built in 12 hour timer
- Optional remote controller also available using SPX-RCK1 remote control kit
- Air in-take pre filter as standard
- Air in-take direction can be horizontal or vertical by interchanging the bottom panel with the fan cover.

- Auto re-start by previous mode and Auto Changeover
- Ready to connect to PCS-6RAD adapter

Built in drain pump

This ductable unit is equipped with an internal drain pump to remove accumulated condensation water from the drain pan even while it is operating. A float switch monitors the water level and automatically activates the pump as necessary.

Accessories

RAR-3U1 / RAR-3U2 / RAR-3U3 / RAR-3U4

Wireless Remote Control

Standard wireless remote control compatible with most of the Mono/Multizone, Summit and Bigflow range.

SPX-RCK2

Wireless Remote Control Kit

Wireless remote control which can be used in place of the standard wired remote control used for RAD models (PM RAD 18 NH7). Applicable to RAD 25/35/50 NH7 and RAD 50/60/70 DH7.

PM RAD 18 NH7

Wired Remote Control

Standard hard wired remote control with built in 12 hour timer. Applicable to 'In the Ceiling' (RAD 25/35/50 NH7) and 'Monoduct' ranges (RAD 50/60/70 DH7).

PSC-6RAD

RAC Adapter

This adapter enables some of the units from the room air conditioning range to be part of the H-Link transmission system and can be controlled by CS Net. Applicable to RAD 25/35/50 NH7 and RAD 50/60/70 DH7 only.

SPX-RCK3

Wired Remote Control Kit

SPX-WKT1

**Weekly Timer
Wired Remote Control**

Summit

Summit cut out wall mounted unit

RAS/RAC Technical Description

Hitachi have now extended their Summit range to include the new Cut Out Wall Mounted unit. With heating and cooling capacities from 2.5kW to 5.0 kW the Cut Out wall mounted unit incorporates all the features that are expected from Hitachi's Summit range in addition to the following benefits.

- New stylish design.
- DC PAM inverter technology.
- High efficiency scroll compressor.
- H-Link/Weekly timer/Wired remote.
- Plasma air purifying system.

White and Dark Silver

Beige and Chocolate

Available in a range of colours:

- White and Dark Silver
- Beige and Chocolate

Summit framed flat

RAS/RAC Technical Description

Hitachi's R410A All DC Inverter Ranges elevate air conditioning to a new level, incorporating significant advances in electronics technology.

With cooling and heating capacities from 2.0kW to 5.0kW, the all DC Inverter PAM driven mono split SUMMIT Framed Flat range incorporates the R410A refrigerant, Hitachi DC Scroll, or DC Twin Rotary compressor all working together for high performance and ultimate efficiency.

- New Flat Framed design
- DC inverter PAM control
- Highest COP up to 4.31 (AA) in cooling/ 4.30 (AA) in heating
- Low noise down to 20dBA on sleep mode
- Cooling available under -10°C ambient temperature
- Heating available even at -15°C ambient temperature
- Auto restart and Auto changeover
- Washable carbon and anti-bacteria air purifying filter
- 24hr remote control timer
- R410A refrigerant

Summit

Summit cut out floor mounted unit

RAS/RAC Technical Description

Hitachi have now extended their Summit range to include the new Cut Out floor mounted unit. With heating and cooling capacities from 2.5kW to 5.0 kW the Cut Out wall mounted unit incorporates all the features that are expected from Hitachi's Summit range in addition to the following benefits.

- New stylish U-flat design.
- DC PAM inverter technology.
- High efficiency scroll compressor.
- H-Link/Weekly Timer/Wired Remote.
- Removable Stand.

Available in a range of colours:

- White and Dark Silver
- Beige and Chocolate

White and Dark Silver

Beige and Chocolate

Monoduct

RAS/RAC Technical Description

Hitachi has extended its room air conditioning offering to include the new Monoduct range. The R410A, all DC Inverter range of 'In-the-ceiling' units are ideal for light commercial and residential use.

- DC Inverter PAM Control
- Low noise down to 28dBA on sleep mode
- Newly developed wired remote controller with built in 12 hour timer
- Optional remote controller also available using SPX-RCK1 remote control kit
- Adjustable static pressure
- Drain pump as standard
- Air in-take pre filter as standard
- Air in-take direction can be horizontal or vertical by interchanging the bottom panel with the fan cover.
- Heating available under -15°C ambient temperature
- Cooling available under -10°C ambient temperature
- Auto re-start by previous mode and Auto Changeover
- Air in-take direction can be horizontal or vertical by interchanging the bottom panel with the fan cover.
- Ready to connect to PCS-6RAD adapter
- Cooling available under -10°C ambient temperature

Bigflow

RAS/RAC Technical Description

The Hitachi R410A mono split system offers a cost effective and efficient solution to climate control in one zone. With cooling only and heat pump models available and with their compact design, reliability and high efficiency, this range is suited to a wide variation of applications.

- Energy label A class COP
- Low noise down to 23dBA on sleep mode
- Heating available under -10°C ambient temperature
- Auto restart by previous mode
- Washable carbon and anti-bacteria air purifying filter
- 24hr remote control timer
- R410A refrigerant

General Data
